Subject: Spyware Workshop - Comment, P044509

I would like to add my thoughts about the SPYWARE problem.   I subscribe to Spyware Nuker and run it every day. Within a 24 hour period I have between 15 and 20 spys in my system and I am not even downloading new programs. Today for example Spyware Nuker tells me I have 17.   A few examples.....ValueClick, FastClick,Doubleclick,tribalfusion,cgi-bin, and MemoryMeter to name just a few.

I don't know if it is still true, but years ago even law enforcement needed a court order to monitor a persons telephone . How is it legal for these comapnies to monitor my computer usage?

I would certainly like to see some controls placed on spys.
