In my opinion (a very strong opinion) there is NO valid reason for anyone to spy on me, my system or my surfing habits. NONE!

Further; it seems that those who wish to impose their messages on us who make use of the internet have come to believe that it is their inalienable right to hound and harass us with their messages. At least equally important to me is my right to privacy and to be kept free from unsolicited and unwelcome intrusions.

Please shut the Spyware and Ad (pop up) producers down and establish severe financial and, if possible, criminal penalties should they continue.
