Subject: Spyware Workshop - Comment, P044509

Spyware keeps coming into my computer...taking up space and slowing it down. I try to remove it at least once a week, but there is just so much of it it is depressing...not unusual to find dozens of new spyware programs within a day of removing all I could find. This is a severe invasion of privacy problem...and a black mark against the Internet. The Government should make Spyware illegal and stop it now.
