To Whom it May Concern,

Spyware is just wrong. It's an electronic peeping-tom (which the last time I checked was illegal). An invasion of one's privacy. It comes unannounced. It's your computer & you have a right to regulate what is on it. It's akin to hacking without the malicious intent. I find it very offensive to have some company, for their own profit, track what I do or where I go on or off line. We need to take the bull by the horns & wrestle it to the ground.
