Gentle people, I would like to add my two cents to you regarding what I think about spyware/adware. I go to my Spybot and AdAware programs - daily- and have to remove 12 to 16 different spyware that have been added. This is, to say the least, very aggravating to me. I seem to always get "Hit Box", Double Click, etc anytime I am surfing the net for information. I really would appreciate if something could be done to stop this practice. If I want to get something, I have plenty of local places I can shop at or order from a reputable company online. Thank you for taking the time to read this email.
