Subject: Spyware Workshop - Comment, P044509

    Please stop the spread of spyware and adware. I have helped some friends get rid of it when their computers were rendered useless.   Consumers should have a choice of what goes on their own computers. Allowing anyone to put junk on it is just plain stupid. Allowing spyware is almost as bad as allowing viruses.
    If I don't download it, I don't want it.
