Subject: Spyware Workshop - Comment, P044509

This ad-ware and spyware and others are destroying my computer but taking over internet options. And they put there system on whether you want it or not. Even when you click no the run it in the back ground and the next time you log off or reboot it pops right up!! And then you have to go through hours of defense to get it off and with some of them; like cool web search and mali[something] you can't get it off unless you do a complete format and reload windows and that takes hours and hours!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Any -more I do custom installs[which is nothing but being able to see what going to be put on and the ability to eliminate it]but they don't give you [adware-spyware] that option cause its hidden in some-one elses free program. Lycos is another company that sneaks there junk on. Mali-[something] completely looked up my computer the other day that I couldn't even get Windows X-P to boot and it took me many hours to format the system and put the operating system back on.

And when ad-ware and spy-ware stoppers come out they go to work to stop them. So this is not there right to ruin our computers, our systems, or our time!!!! They didn't pay for these systems[for mine ,I ahve \$4000.00 into it] so they shoudn't be able to put anything on them through deceptive practices. They don't have the free speech right when they use some-one elses equipment!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Have a Good Day!!!!!!!!!!!!!!
