Importance: High

To whom it may concern;
(subject)Spyware/Adware

I am operating a computer that is completely uptodate and is less than a year old. But, as to date, I have had to reformat this computer 3 times due to spyware. If I see in the text before I download something off of the Internet that it contains spyware, I refuse to down load it!. I am now running a spyware detector to stop these companies from bogging down my system with JUNK that I did not ask for and darn sure don't want.

Gater and When u are just 2 of the biggest names in in the spyware business. However some of these spyware companies are making it almost impossible to delete there JUNK out of your system without having to go into your registry to get rid of it!! This is a last option for me as this is a very dangerous thing to do.

I Highly consider what these companies are doing is an invasion of my privacy, a threat to my computer, and is morally wrong and ought to be illegal.

Thank you for your time,
