Subject: Spyware Workshop - Comment, P044509

Hi,

The answer to this must be that all Spyware or Adware should only be allowed to be placed on an individual PC by SPECIFIC REQUEST of the user. ie, the user must be given a CLEAR form, in secure format, requesting specific permission for this to be placed on their computers....and defining precisely the computers concerned. Also, this form should describe precisely what this spyware/adware is for, where it will be located, and how it can be removed, if required. This notification must be specifically and solely for that purpose, and not buried in amongst another communication....and it must make this very clear to the user. Otherwise this `software` represents an `intrusion`, and is in effect an invasion of privacy.

Kind regards,  
David Pardoe
