Federal Trade Commision:

I feel that spyware is on the same of not worse level than the telemarketing and it should be made law not to infect computers with unwanted junk so to speak. Evidently it slows down a pc to where its almost impossible to use.

Furthermore if I decide I want to buy a product i will go search for it. If the adware and spyware companies want to use my isp connection to advertise then I feel they should be required to share the profit they make with me (which Im sure they would not) then I don't want their programs running on my pc and I will do everything in my power to stop it.

Thank You
Yours Very Truly
