Subject: Spyware Workshop - Comment, P044509

I am a well knowledge computer user. I am tired of all the spyware/adware that is out here today. I don't like things showing up on my desktop that I didn't put there. I don't want anyone else to know my business of what I am doing or where I am going. Our web surfing should be nobody else business except our own. I don't want my personal information being passed on to a company that I have no interest with. We don't this with snail mail, why do it online. It is a pain in the butt to have to scan my computer everyday to get rid of all the spyware on my computer. I don't like the fact that these companies can know what we are doing while we are surfing on the. Internet. To me it is an invasion of privacy. I hope you all do something about this problem.

Thank you
