Spyware is denying us use of our computers. Our systems were crashing 2-3 times a day until we installed Spybot and removed over 2 dozen DSOs from 3 computers.

Imagine, if you will, someone walking into your home at will and rummaging through your file cabinets, your mail, your outstanding bills, and your wallets however they wish.

Oh, but that can't happen? There are laws protecting your privacy?

Oh, really?

Please -- PROTECT US !!
