I only have a few comments on the issue of spyware and adware. It caused windows to crash twice on my computer, and led to six days of searching for one piece of spyware(which I still believe resides somewhere within my hard drive!). Other than that, it's great. So great that I'm not alone in wanting to find the makers of this 'software', and have some long, meaningful 'discussions' with the makers of this garbage. If this is shown to any of the lawyers representing various spyware/adware companies out there, be sure to thank them for all the pop-up ads and other little goodies embedded so deep in my hard drive that I don't think I'll ever be able to remove them. Thank them by having congress outlaw their products.
