**You know how expensive computers are and how often you have to upgrade them. Why in the world don't you understand what a pain these adware and spyware companies are causing us? I have to use my computer for research while I attend graduate school, and I can tell you that I am not happy with having to clean it every 2 or 3 days just to get the performance out of my cpu that I paid for, not anyone else---ME. I pay for this computer and I am sick and tired of these companies exploiting and trying to ruin my computer. If this continues I will give my computer up and then where will these companies go? PS EVERYONE AT MY COLLEGE FEELS THE SAME WAY.**
