Dear FTC,

Why should these companies be allowed to turn our computers into a Reality TV show for their pleasure? What is the legality of an individual or the Government doing this?

The government is not allowed to intrude on us without a court order. These companies (often foreign or foreign owned) should not have more rights to us than our own Government. The Constitution protects us from the Government, what protects us from these voyeurs?

High priced lobbyists are not a replacement for democracy. Our privacy needs armor plated protection.

"By the people ... for the people ..."

not

"Buy the people ... for the Corporations ..."
