MITIGATION Resources for Success

FEMA Publications 372 CD

- ▶ The Resources for Success CD was developed by the Federal Insurance and Mitigation Administration and representatives from all ten FEMA Regions with contributions from community and private sector leaders. The CD is both an educational resource and a marketing tool.
- ▶ The Development Team designed this CD to meet the needs of a broad audience. Anyone concerned with building a safer future will find useful information, publications, technical fact sheets, photographs, case studies and Federal and State Mitigation Program information and contacts.
- ▶ The CD is **"self-launching"** and includes Acrobat Reader 4.0 for viewing all sections and documents. It has been formatted to provide easy navigation and access to both technical and non-technical information through a linked table of contents; title, subject and full text search functions; document links; and web links.
- ▶ The vast array of documents and photographs on the CD are available for exporting into other documents, websites, and publications and for use in educational and training presentations.
- ▶ The **"Mitigation Works"** section contains quotes supporting hazard mitigation from national, state, local and private sector leaders that can be used in publications, brochures and presentations.
- ▶ The **"Case Studies"** have been written and designed to function as independent documents that can be used as a part of educational, training and marketing presentations.
- ▶ Browsing through the various sections, you'll find ideas, examples of successful projects; federal, state and local contact information, photographs and inspiration.
