"Revisions to the WIC Food Package"

For someone with a toddler that has very few teeth and no money to buy food he can eat, there are many ideas pertained to that.

- * Some of the Gerber toddler food selection. Like meat sticks and juices. (this is the only meat my son can eat and its not cheap for us to buy)
- * Bread, pasta or crackers something for a toddler to eat.

My son is on WIC. But doesn't get much due to allergies of food and not having enough teeth. When we signed up we thought it would be more food. He can only eat $\frac{1}{2}$ egg 2 times a week. Due to an allergy. He cant eat Peanut Butter until hes 3 years old. He cant eat ches because hes lactose intolerant. It would be nice to have more choices for toddlers. Thank You for taking the time to listen.
