## Whiskeytown Fall/Winter 2004-05 Operating Schedule

DATE	ELEVATION (feet)
10/31/04	1209.0 +/- 0.5
11/07/04	1206.6 +/- 0.5
11/14/04	1204.0 +/- 0.5
11/15/04 - 1/28/05	Between 1198.5 and 1204.0 depending on natural inflow.

### Notes:

1) Due to the Carr Tunnel Outage through 1/28/05, Whiskeytown cannot be initially drawn down to normal winter levels. Substantial fluctuations in lake elevation may occur due to pre-releases or flood inflows. Since Clear Creek releases are anticipated to occur for Fish and Wildlife objectives, under drier scenarios lake levels may slowly drop toward 1198.5 by 1/28/05. When Carr Tunnel is returned to service, final operating targets will be posted.

2) Between 11/1/04 and 1/28/05, target elevations may be revised downward depending on seasonal wetness trends.
