American Society for Health System Pharmacists (ASHP),	Baxter ATC-212 dispensing system, 111
antibiotic administration, 221	bed alarms for fall prevention in older patients
American Society of Anesthesiologists (ASA), 259, 265,	described, 291
407, 604	studies, 292, 293
amphotericin, topical, 193	bed sores, 156
analgesics	beds or mattresses for pressure ulcer prevention
acute abdominal pain management, 396	described, 301
acute abdominal pain management studies, 397, 399	studies, 302, 304
antiemetics for PCA, 404	bedsores, 301
research needs, 398	behavior-based safety interventions, 450
surgeon decision making, impact on, 398	Best Medicine, The, 570
anesthesia	beta-blockers, perioperative
body temperature and, 231	described, 271
intraoperative monitoring and, 265	research needs, 274
pre-anesthesia checklists, 259	studies, 272, 276
simulator-based training, 512	bloodstream infections, catheter-related (CR-BSI)
anesthesia crisis resource management (ACRM), 504	defined, 163
anesthesia equipment checklists, 466	risks, 164
antibiotic resistance and pneumococcal vaccines, 390	bronchopulmonary secretions, 185
antibiotics	business community and patient safety, 603

calorimetry, 359	antibiotics and, 141
Candida species in catheter-related infections, 163	barrier precaution studies, 129
capnography, 267	barrier precautions and, 127
cardiac disease, heparin and warfarin monitoring, 88	relationship to VRE, 128
cardiac events	research needs, 131, 144
hypothermia, 231	SSI and, 222
reducing with beta blockers, 271	transferability, 127
care delivery and interventions, nurse staffing and, 423,	Cockpit Management Attitudes Questionnaire (CMAQ),
426, 430	502
catheter colonization, 163	computerized discharge summaries, 479
catheter related infections	computerized discharge summaries, 479 computerized physician order entry (CPOE) with CDSS
central venous, 167	CDSS described, 589
catheter-related bloodstream infection (CR-BSI)	computerized sign-out program, 476, 479
antibacterial coatings and antiseptic agents, 169	continuous intravenous insulin infusion (CII) during
CHG solutions and, 175	surgery, 238
defined, 163, 164	continuous oscillation
intravenous antimicrobial use of, 179	described, 185, 187
catheter-related infections	studies, 187, 189
bloodstream, 163	cranial computed tomography (CT), 376
central venous, 164	Crew Resource Management (CRM)
urinary tract, 149	aviation application vs. health care, 504
Centers for Disease Control and Prevention (CDC), 42,	aviation environment, 501
164, 194, 602	described, 501
antibiotic administration, 221	effectiveness measurement tools, 502
pneumococcal vaccines, 385	health care environment, 504
central venous catheters	operating room environment, 505
antibacterial coatings or antiseptic agents, 169, 174	peer monitoring, 505
barrier precautions during insertion, 165	research needs, 507
CHG and PI studies, 177, 178	studies, 503, 506
chlorhexidine gluconate at the insertion site, 175	critical incident technique, 41
heparin and, 178	critical pathways
infection studies, 167	described, 581

automated dispensing systems, 112 described, 101 dispensing variations, 101 JCAHO standards, 102 research needs, 105 safety targets, 102 studies, 103, 104, 106 urethral catheters compared to suprapubic, 159 latex, 149 patient discomfort, 156 research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 silver alloy catheters, 149 silver alloy catheters, 149 silver alloy catheters, 149 research needs, 151 suability testing, 461 vancomycin, systemic use with central venous catheters, 179 antibiotic studies, 142, 143 antibiotic studies, 142, 143 antibiotic studies, 142, 143 antibiotic readuring and research needs, 198 research needs, 149 barrier precaution studies, 129 barrier precautions studies, 129 barrier precautions undies, 129 barrier precautions undies, 129 barrier precautions undies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 496 research needs, 497 research needs, 497 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 described, 494 research needs, 151 surfairin momograms, studies, 89, 96 venous thromboembolism prevention, 333 varfarin nomograms, studies, 89, 96 venous thromboembolism prevention, 16, 292, 451, 561, 570 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 498 transferability, 127 studies, 496, 497	unit-dose dispensing	risk in neurosurgery, 337
described, 101 dispensing variations, 101 JCAHO standards, 102 research needs, 105 safety targets, 102 ventilation when transporting critically ill patients, 538, studies, 103, 104, 106 urethral catheters compared to suprapubic, 159 latex, 149 patient discomfort, 156 research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 surinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precaution studies, 129 barrier precaution studies, 128 research needs, 131, 144 transferability, 127 research needs, 498 research needs, 131, 144 transferability, 127 research needs, 497 research needs, 497 research needs, 191, 144 research needs, 497 research needs, 497 research needs, 131, 144 research needs, 497		
dispensing variations, 101 JCAHO standards, 102 research needs, 105 safety targets, 102 studies, 103, 104, 106 urethral catheters compared to suprapubic, 159 latex, 149 patient discomfort, 156 research needs, 157 silicone, 149 urethral strictures, 157 urethard strictures, 157 silicone, 149 silver alloy catheters, 149 silver alloy catheters, 149 situriary tract infections (UTIs) catheters and, 149 urinary tract infections (UTIs) catheters and, 149 presearch needs, 151 urinary tract infections (UTIs) catheters and, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotics and, 141 barrier precaution studies, 129 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 transferability, 127 studies, 334 therapy factors, 337 therapy factors, 337 urethral catheters and, 156 ventilation when transporting critically ill patients, 538, 541 urenthal catheters and, 149 research needs, 185, 187 described, 185 continuous oscillation, 185, 187 described, 185 retrictancy supriation of subglottic secretions, 190 continuous oscillation, 185, 187 described, 189 research needs, 189 research needs, 195, 199, 203 SDD, 193 semi-recumbent positioning, 185, 186 sucralfate, 198 Veterans Health Administration (VHA), 449 vomiting due to PCA, 404 variating to to PCA,		
JCAHO standards, 102 research needs, 105 safety targets, 102 studies, 103, 104, 106 urethral catheters compared to suprapubic, 159 latex, 149 patient discomfort, 156 research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 antibiotics and, 142 barrier precaution studies, 129 barrier precaution studies, 129 barrier precaution studies, 129 barrier precaution studies, 129 testing to the test of the studies, 129 testing to the studies, 131, 144 transferability, 127 tentilation when transporting critically ill patients, 538, weithlation when transporting critically ill patients, 538, 546 ventilation when transporting critically ill patients, 538, 541 urethral catheters and, 148 ventilation of subglottic secretions, 190 continuous aspiration of subglottics studies, 190 secrethed, 185 patient positioning studies		
safety targets, 102 studies, 103, 104, 106 studies, 149 patient discomfort, 156 research needs, 157 silicone, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, essitant enterococci (VRE) antibiotics and, 141 barrier precaution studies, 129 barrier precaution studies, 129 barrier precaution studies, 129 barrier precaution studies, 129 testing, 401 studies, 190, 193 studies, 190, 193 semi-recumbent positioning studies, 189 research needs, 195, 199, 203 semi-recumbent positioning, 185, 186 sucralfate, 198 veterans Health Administration (VHA), 449 vomiting due to PCA, 404 ward stock system, 102 warfarin about, 87 dosing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warfarin nomograms, studies, 92 warfarin nomograms, studies, 92 warfarin precaution studies, 129 barrier precaution studi		therapy factors, 337
safety targets, 102 studies, 103, 104, 106 studies, 149 patient discomfort, 156 research needs, 157 silicone, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, essitant enterococci (VRE) antibiotics and, 141 barrier precaution studies, 129 tventilation when transporting critically ill patients, 538, 541 ventilation when transporting critically ill patients, 538, 541 ventilation when transporting critically ill patients, 538, 541 ventilator-associated pneumonia (VAP) continuous aspiration of subglottic secretions, 190 continuous aspiration of subglottics secretion, 180 continuous aspiration of subglottics, 190 continuous aspiration o	research needs, 105	urethral catheters and, 156
studies, 103, 104, 106 urethral catheters compared to suprapubic, 159 latex, 149 patient discomfort, 156 research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, resistant enterococci (VRE) antibiotics and, 141 barrier precautions studies, 129 barrier precautions studies, 129 barrier precautions studies, 129 barrier precautions studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 498 transferability, 127 continuous oscillation, 185, 187 continuous oscillation, 185, 187 described, 185 patient positioning studies, 189 research needs, 195, 199, 203 semi-recumbent positioning, 185, 186 sucralfate, 198 sucralfate, 198 veterans Health Administration (VHA), 449 vomiting due to PCA, 404 ward stock system, 102 warfarin about, 87 dosing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 498 transferability, 127 studies, 189 continuous oscillation, 185, 186 continuous oscillation, 185, 187 described, 185 patient positioning studies, 189 research needs, 19, 199 continuous oscillation, 185, 186 described, 185 patient positioning studies, 189 research needs, 19, 199 continuous oscillation, 185, 186 described, 185 patient positioning, 185, 186 sucralfate, 198 vereaerch needs, 19, 199 continuous oscillation, 185, 186 described, 185 patient positioning, 185, 186 sucralfate, 198 sucralfate, 198 sucralfate, 198 vereaerch needs, 194 verearch needs, 194 vereach needs, 194 vereach needs, 496 verous thromboembolism prevention, 333 warfarin nomograms, studies, 99 venous thromboembolism preven		
urethral catheters compared to suprapubic, 159 latex, 149 patient discomfort, 156 research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 silver alloy catheters, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 dosing and monitoring errors, reducing, 87 research needs, 151 sability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotics and, 141 barrier precautions studies, 129 barrier precautions studies, 129 barrier precautions studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 transferability, 127 ventilator-associated pneumonia (VAP) continuous assipiration of subglottic secretions, 190 continuous oscillation, 185, 187 continuous oscillation, 185, 187 described, 185 research needs, 189 subglottic secretions, 190 continuous oscillation, 185, 187 described, 185 patient positioning studies, 189 research needs, 195, 199, 203 sucralfate, 198 sucralf		
compared to suprapubic, 159 latex, 149 continuous aspiration of subglottic secretions, 190 continuous aspiration of subglottic secretions, 190 continuous oscillation, 185, 187 described, 185 research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 195, 199, 203 SDD, 193 semi-recumbent positioning, 185, 186 sucralfate, 198 vuralfate, 198 vuralfate, 198 vverans Health Administration (VHA), 449 vomiting due to PCA, 404 warfarin about, 87 research needs, 190 warfarin about, 87 monitoring errors, reducing, 87 monitoring, 88 venous thromboembolism prevention, 333 vancomycin-resistant enterococci (VRE) warfarin nomograms, studies, 89, 96 venous thromboembolism prevention, 333 vancomycin-resistant enterococci (VRE) warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 web-based programs, 478 research needs, 195, 199, 203 vomition, 185, 186 semi-recumbent positioning studies, 189 research needs, 195, 199, 203 variation positioning, 185, 186 sucralfate, 198 vuralfate, 195, 199, 203 venition precumbent positioning, 185, 186 semi-recumbent, 189 veniture positioning, 185, 186 semi-recumbent, 199 vuralfate, 198 vuralfate,		ventilator-associated pneumonia (VAP)
latex, 149 patient discomfort, 156 research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 suriary tract infections (UTIs) catheters and, 149 prevalence, 149 usability testing, 461 vancomycin, essistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precautions and, 127 C. difficile relationship, 128 tresearch needs, 131, 144 transferability, 127 continuous oscillation, 185, 187 described, 185 patient positioning studies, 189 patient positioning studies, 189 research needs, 195, 199, 203 semi-recumbent positioning, 185, 186 sucralfate, 198 vetrans Health Administration (VHA), 449 vomiting due to PCA, 404 warfarin about, 87 dosing and monitoring errors, reducing, 87 dosing and monitoring errors, reducing, 87 venous thromboembolism prevention, 333 varier precaution studies, 142, 143 warfarin nomograms, studies, 99 venous thromboembolism prevention, 333 varier precaution studies, 129 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 498 transferability, 127 studies, 496, 497	compared to suprapubic, 159	
patient discomfort, 156 research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 silver alloy catheters, 149 silver alloy catheters, 149 silver alloy catheters, 149 surinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 498 transferability, 127 described, 185 patient positioning studies, 189 research needs, 195, 199, 203 subjectioning studies, 189 subjectioning, 185, 186 sucralfate, 198 Veterans Health Administration (VHA), 449 vomiting due to PCA, 404 ward stock system, 102 warfarin about, 87 dosing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 99 warfarin nomograms, studies, 92 antibiotic studies, 142, 143 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
research needs, 157 silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 surinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 149 antibiotic studies, 142, 143 antibiotic studies, 142, 143 antibiotics and, 141 barrier precautions studies, 129 barrier precautions studies, 129 tresearch needs, 131, 144 tresearch needs, 131, 144 tresearch needs, 131, 144 tresearch needs, 131, 144 tresearch needs, 151 semi-recumbent positioning studies, 189 research needs, 195, 199, 203 semi-recumbent positioning, 185, 186 semi-recumbent positioning, 185, 186 semi-recumbent positioning, 185, 186 such 199, 203 semi-recumbent positioning, 185, 186 such 199, 2	· · · · · · · · · · · · · · · · · · ·	
silicone, 149 urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precaution studies, 129 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 195, 199, 203 SDD, 193 semi-recumbent positioning, 185, 186 sucralfate, 198 veterans Health Administration (VHA), 449 vomiting due to PCA, 404 warfarin about, 87 desing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 vancomycin-resistant enterococci (VRE) warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 barrier precautions and, 127 wrong-site surgery, avoiding C. difficile relationship, 128 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
urethral strictures, 157 urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 498 transferability, 127 SDD, 193 semi-recumbent positioning, 185, 186 sucralfate, 198 semi-recumbent positioning, 185, 186 sucralfate, 198 sucralfate, 198 semi-recumbent positioning, 185, 186 sucralfate, 198 semi-recumbent positioning, 185, 186 sucralfate, 198 sucralfate, 19		
urinary catheters impregnated with antibiotic, 149 silver alloy catheters, 149 studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precautions studies, 129 barrier precautions studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 496, 497	urethral strictures, 157	
impregnated with antibiotic, 149 silver alloy catheters, 149 veterans Health Administration (VHA), 449 studies, 150, 153 vomiting due to PCA, 404 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 498 transferability, 127 successors sucralfate, 198 Veterans Health Administration (VHA), 449 vomiting due to PCA, 404 ward stock system, 102 ward stock system, 102 warfarin about, 87 dosing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warfarin nomograms, studies, 92 warfarin plankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497	,	
silver alloy catheters, 149 studies, 150, 153 vomiting due to PCA, 404 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 498 transferability, 127 Veterans Health Administration (VHA), 449 vomiting due to PCA, 404 variants due to PCA, 404 varfarin vomiting due to PCA, 404 varfarin vomiting due to PCA, 404 varfarin vomiting due to PCA, 404 varfarin about, 87 dosing and monitoring errors, reducing, 87 monitoring, 88 venous thromboembolism prevention, 333 vancomycin-resistant enterococci (VRE) warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
studies, 150, 153 urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 498 transferability, 127 vomiting due to PCA, 404 ward stock system, 102 warfarin dosing and monitoring errors, reducing, 87 monitoring, 88 varfarin nomitoring, 88 venous thromboembolism prevention, 333 vancomycin-resistant enterococci (VRE) warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 131, 144 research needs, 498 studies, 496, 497		
urinary tract infections (UTIs) catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 131, 144 transferability, 127 warfarin nome system, 102 warfarin about, 87 dosing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 498 transferability, 127 studies, 496, 497		
catheters and, 149 prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 131, 144 transferability, 127 warfarin about, 87 dosing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 498 transferability, 127 studies, 496, 497		,
prevalence, 149 research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 131, 144 transferability, 127 about, 87 dosing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 494 research needs, 498 studies, 496, 497		•
research needs, 151 usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 transferability, 127 dosing and monitoring errors, reducing, 87 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
usability testing, 461 vancomycin, systemic use with central venous catheters, 179 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 transferability, 127 monitoring, 88 self-management, studies, 89, 96 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497	• · · · · · · · · · · · · · · · · · · ·	
vancomycin, systemic use with central venous catheters, 179 self-management, studies, 89, 96 venous thromboembolism prevention, 333 vancomycin-resistant enterococci (VRE) warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 antibiotics and, 141 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 barrier precautions and, 127 wrong-site surgery, avoiding described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
venous thromboembolism prevention, 333 vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 transferability, 127 venous thromboembolism prevention, 333 warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 494 research needs, 498 studies, 496, 497		
vancomycin-resistant enterococci (VRE) antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 transferability, 127 warfarin nomograms, studies, 92 warming blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 494 studies, 496, 497		
antibiotic studies, 142, 143 antibiotics and, 141 barrier precaution studies, 129 barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 transferability, 127 werning blankets for normothermia during surgery, 231 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 494 studies, 496, 497		
antibiotics and, 141 web-based health information, 16, 292, 451, 561, 570 web-based programs, 478 web-based programs, 478 wrong-site surgery, avoiding described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
barrier precaution studies, 129 web-based programs, 478 barrier precautions and, 127 wrong-site surgery, avoiding C. difficile relationship, 128 described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
barrier precautions and, 127 C. difficile relationship, 128 research needs, 131, 144 research needs, 137 transferability, 127 wrong-site surgery, avoiding described, 494 research needs, 498 studies, 496, 497	,	
C. difficile relationship, 128 described, 494 research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
research needs, 131, 144 research needs, 498 transferability, 127 studies, 496, 497		
transferability, 127 studies, 496, 497
