The statistics on sales and markets in this review were compiled from reports and records of auction sales from the State Departments of Agriculture of Kentucky, Tennessee, North Carolina, Virginia and West Virginia; and from data furnished by marketing recorders employed through county ASCS offices; and from information received direct from markets and trade sources. The statistics on prices by grades were based on the compilation of auction data recorded from warehouse sales tickets from representative markets in the Burley area.

Record average prices and improved quality for the 1976 Crop of Burley Tobacco.

Volume heaviest since 1963.

Marketing season consisted of most sales days ever - 70.

Slightly smaller percentage placed under loan; 6.5 percent compared with 7.5 last season.

Averages improved by \$5 to \$9 per hundred for most grades compared with last season. The top average recorded was \$120 per hundred.

Producers' sales at auction this season amounted to 654,820,057 pounds and averaged \$114.24 per hundred. Last season 634,764,000 pounds returned \$105.56.

Better quality was a result of a larger percentage of first, second and third quality appearing for sale. Also, less mixed and nondescript grades and greenish color was marketed.

This marketing season was marked by unusually severe weather causing postponement of sales at several markets during the year. Extreme cold and dry air caused delay in preparing tobacco for market.

Around 3.7 million pounds were sold experimentally untied in sheets, baled and tied this year at selected markets.

ASCS records show around 17 million pounds of tobacco has been declared excess and will be deducted from the 1977 crop quota.

The loan level for the 1977 crop of Burley tobacco is set at \$117.3 per hundred pounds.
