The statistics on sales and markets in this review were compiled from reports and records of auction sales from the State Departments of Agriculture of Kentucky, Tennessee, North Carolina, Virginia, and West Virginia; from data furnished by marketing recorders employed through the offices of the Agricultural Stabilization and Conservation Service (ASCS); and from information received directly from markets and trade sources. The statistics on prices by grades were based on the compilation of auction data recorded from warehouse sales tickets from representative markets in the burley area.

Review of the 1981/82 Marketing Season

The 1981 crop of burley tobacco brought record high prices. Volume was the heaviest since the 1963 crop and money received (just over \$1-1/3 billion dollars) is a new record. Quality showed little change from the previous year. Although the percentage placed under loan increased, receipts were still very small--around 0.1 percent of sales. Growers were allowed to sell their crops in either tied form or bales this year, and there was little difference in price for tobacco of similar quality. An estimated 65 percent of all marketings were sold in "baled" form and 30 percent "tied." Burley was also sold in sheets, which accounted for an estimated 5 percent of sales, but was not eligible for price support. Sales began November 23 and regularly scheduled auctions ended February 16 for a total of 40 sales days--9 less than last year.

Producers' sales at auction totaled 708 million pounds, up from 547.6 million pounds in 1980, and averaged \$180.68 per hundred pounds. This record high average was up \$14.74 from the 1980 average. In addition to auction sales, an estimated 10 million pounds were sold other than at auction. This, added to auction sales, brings total producers' sales of the 1981 crop to around 718 million pounds.

The majority of grades averaged from \$180 to \$184 per hundred pounds, and increases mainly of \$11 to \$17 over levels set last season. The smallest gains were recorded for nondescript and tips. Marketings sold well above their respective support price in most cases. The most noticeable change

in quality was an increase of about 9 percent in the mixed group. About one-third of sales was classified as third and fourth quality leaf. The predominant color was tan (about 48 percent). By group, flyings accounted for almost 5 percent of sales, lugs --14 percent, leaf --43 percent, tips --4 percent, mixed --29 percent, nondescript --2 percent, and various no-grade about 3 percent.

The Burley Cooperatives received 801,512 pounds of tobacco, compared with only 21,388 pounds last season.

Special Note on Producer Sales

Burley warehouses may choose to sell either 1,260 baskets or 340,200 pounds per set of buyers each day. Since some growers prefer to sell their entire crop at one time, these limits are not always sufficient to accommodate all, especially during the months of November and December. The solution for some growers is to allow the warehouse to include a portion of their crop in the daily auction sale, where the lots will be federally graded and purchased by the regular buyers. The warehouse will then purchase the remainder of the crop, based on the grades and prices received at auction. Also, some growers will sell all or portions of their crops directly to warehouses. These purchases are termed "nonauction" sales; and although they are first-hand producer marketings by ASCS regulations, they are not included in AMS producer sales because the volume and price are difficult to determine and these sales do not receive a true auction bid. Therefore, the producer sales shown in this publication will always be below total producer marketings since ASCS includes all sales by producers.

Type 32, Maryland

There was no federal inspection or market news on the four auction markets in Maryland during the 1982 marketing season. In a mail referendum held February 8-12, 84 percent of the producers who voted opposed mandatory USDA inspection of their product.

Growers in Maryland had been receiving free mandatory grading services from USDA since 1948.

Under the Omnibus Budget Reconciliation Act of 1981, however, user fees were imposed for auction sales at designated auction markets. Since Maryland Type 32 tobacco has not been under production quotas or price support since 1965, growers petitioned the Secretary of Agriculture to conduct the referendum allowing them to vote on terminating the designation of the four auction markets: Hughesville, LaPlata, Upper Marlboro, and Waldorf.
