

TS Alliance Praises Herscot Donation to Massachusetts General Hospital

The TS Alliance salutes Board Member Carol Herscot, and her husband Jim, for their recent \$10 million pledge to Massachusetts General Hospital (MGH) in Boston. The donation will be used to create a new center for children, adults and families affected by tuberous sclerosis complex (TSC). The state-of-the-art “Carol and James Herscot Center for TSC” will be directed by Elizabeth A. Thiele, MD, PhD, who also serves on TS Alliance Board of Directors.

(Click [HERE](#) to read the MGH news release.)

“The TS Alliance and its constituents are inspired by the Herscots’ lifetime devotion to advancing TSC research, treatment and public education,” says Nancy Taylor, TS Alliance CEO. “We also thank Dr. Thiele and Massachusetts General Hospital for their stellar efforts to develop what will be one of the most sophisticated and comprehensive TSC programs in existence. The Herscots, Dr. Thiele and MGH are to be lauded for their overwhelming level of commitment to TSC patients and their families.”

The TS Alliance will partner with the new center to develop a multimedia, internet-based TSC educational resource in collaboration with WGBH, the public television station in Boston.
