

publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

A. By order approve such proposed rule change; or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR-Phlx-2001-114 and should be submitted by March 7, 2002.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.¹²

Margaret H. McFarland,

Secretary.

BILLING CODE 8010-01-U

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Sunrise Airlines, Inc. d/b/a Flair Airlines of its Intent To Resume Operations

AGENCY: Office of the Secretary, Department of Transportation.

ACTION: Notice of Order to Show Cause (Order 2002-2-5) Docket OST-2001-8695.

SUMMARY: The Department of Transportation is directing all interested persons to show cause why it should not issue an order finding Sunrise Airlines, Inc., fit, willing, and able to

resume scheduled passenger operations as a commuter air carrier, subject to conditions.

DATES: Persons wishing to file objections should do so no later than February 22, 2002.

ADDRESSES: Objections and answers to objections should be filed in Docket OST-2001-8695 and addressed to the Department of Transportation Dockets (SVC-124, Room PL-401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, and should be served upon the parties listed in Attachment A to the order.

FOR FURTHER INFORMATION CONTACT: Ms. Delores King, Air Carrier Fitness Division (X-56, Room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-2343.

Dated: February 8, 2002.

Read C. Van De Water,

Assistant Secretary for Aviation, and International Affairs.

BILLING CODE 4910-62-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE-2002-11]

Petitions for Exemption; Summary of Petition Received

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petition for exemption received.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption part 11 of Title 14, Code of Federal Regulations (14 CFR), this notice contains a summary of certain petitions seeking relief from specified requirements of 14 CFR, dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before March 6, 2002.

ADDRESSES: Send comments on any petition to the Docket Management

System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590-0001. You must identify the docket number FAA-2001-11097 at the beginning of your comments. If you wish to receive confirmation that FAA received your comments, include a self-addressed, stamped postcard.

You may also submit comments through the Internet to <http://dms.dot.gov>. You may review the public docket containing the petition, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Dockets Office (telephone 1-800-647-5527) is on the plaza level of the NASSIF Building at the Department of Transportation at the above address. Also, you may review public dockets on the Internet at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: Sandy Buchanan-Sumter (202) 267-7271, Office of Rulemaking (ARM-1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

This notice is published pursuant to 14 CFR §§ 11.85 and 11.91.

Issued in Washington, DC, on February 11, 2002.

Donald P. Byrne,

Assistant Chief Counsel for Regulations.

Petitions for Exemption

Docket No.: FAA-2001-11097.

Petitioner: Business Jet Services.

Section of 14 CFR Affected: 14 CFR § 135.145.

Description of Relief Sought: To permit Business Jet Services to place turbo-jet airplanes in service without conducting proving flights.

[FR Doc. 02-3637 Filed 2-13-02; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

[RSPA-2002-11270, Notice No. 02-4]

Advisory Notice; Enhancing the Security of Hazardous Materials in Transportation

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Advisory notice.

SUMMARY: This notice advises shippers and carriers of voluntary measures to enhance the security of hazardous materials shipments during

¹² 17 CFR 200.30-3(a)(12).

transportation. The notice addresses personnel, facility, and en route security issues and includes contact points for obtaining additional, more detailed information.

FOR FURTHER INFORMATION CONTACT: Susan Gorsky, Office of Hazardous Materials Standards, Research and Special Programs Administration, telephone (202) 366-8553.

SUPPLEMENTARY INFORMATION: As a result of the terrorist attacks on the World Trade Center and the Pentagon on September 11, 2001, and subsequent threats related to biological materials, the Research and Special Programs Administration (RSPA, we) is engaged in a broad review of government and industry hazardous materials transportation safety and security programs. As part of this review, we established the Hazardous Materials Direct Action Group (Hazmat DAG). The Hazmat DAG met with representatives of the hazardous materials industry, emergency response community, and state governments to discuss transportation security issues in the wake of the September 11 attacks and continuing terrorist threats.

In the wrong hands, hazardous materials pose a significant security threat, particularly those that may be used as weapons of mass destruction. Persons who offer, transport, or store hazardous materials in transit should review their security measures and make any necessary adjustments to ensure the security of hazardous materials shipments.

Based in part on discussions in the Hazmat DAG and on the results of our initial internal review of ongoing security programs and practices, we identified a number of actions for persons involved in the transportation of hazardous materials to implement to enhance security. You should consider actions commensurate with the level of threat posed by the specific hazardous materials you handle. These possible actions are not government regulations or mandates. However, we strongly suggest that you consider implementation of the following measures as appropriate to your industry and operations.

I. Security Plan

The most important action a shipper or carrier should consider is the development and implementation of a security plan. You can use a risk management model to assess security risks and develop appropriate measures to reduce or eliminate risk. Most risk management models utilize the following steps:

(1) Identify areas of concern and partners that may be affected or with whom coordination may be appropriate;

(2) Assemble detailed information on system operations;

(3) Identify control points where interventions can reduce or eliminate risk;

(4) Select and prioritize options to meet identified security goals;

(5) Take action to implement the strategy;

(6) Verify implementation of the strategy; and

(7) Evaluate the effectiveness of the strategy to determine whether additional actions are necessary.

You may first want to list materials you handle, and identify those materials with the potential to be used as weapons of mass destruction or targets of opportunity. Then, consider a review of your current activities and operations from a transportation security perspective. Ask yourself, "What are we doing now? What could go wrong? What can we do differently?" The next step is to consider how to reduce the risks you have identified. For hazardous materials transportation, a security plan likely will focus on personnel, facility, and en route security issues. To assist you in performing appropriate risk assessments, we posted a Risk Management Self-Evaluation Framework on our website (<http://hazmat.dot.gov>).

II. Personnel Security

Your employees can be one of your most critical assets as you endeavor to improve the security of your shipping or transportation operations. You should consider taking one or more of the following actions:

- Assure your employees are familiar with your security plan and properly trained in its implementation. Training should include company security objectives, specific security procedures, employee responsibilities, and organizational security structure.

- Encourage your employees to report suspicious incidents or events.

- Implement routine security inspections.

- Convene regular employee/management meetings on security measures and awareness.

- Have an internal communication system to inform your staff of events, facts, trends, updates, and the like. Because Internet communications may be accessed by others, consider alternative methods for communicating sensitive information.

At the same time, you should be aware of the possibility that someone you hire may pose a potential security

risk. You should consider establishing a process to verify the information provided by applicants on application forms or resumes, including checking with former and current employers and personal references provided by job applicants.

III. Facility Security

You should consider taking one or more of the following steps to prevent unauthorized access to your facility:

- Establish partnerships with local law enforcement officials, emergency responders and other public safety agencies with jurisdiction over your facility. Through such relationships, you can learn about threats, trends, and successful and unsuccessful security programs.

- Request a review of your facility and security program by local law enforcement officials.

- Restrict the availability of information related to your facility and the materials you handle. Encourage authorities in possession of information about your facility to limit disclosure of that information on a need-to-know basis.

- Add security guards and increase off-hours patrols by security or law enforcement personnel.

- Improve fencing around your facility. Check the adequacy of locks and other protective equipment. Consider equipping access gates with timed closure devices. Conduct frequent inspections.

- Install additional lights, alarm systems, or surveillance cameras.

- Restrict access to a single entry or gate.

- Place limits on visitor access; require visitors to register and show photo identification and have someone accompany visitors at all times.

- Require employees to display identification cards or badges.

- Conduct security spot checks of personnel and vehicles.

- Upgrade security procedures for handling pick-ups and deliveries at your facilities. Verify all paperwork and require pick-ups and deliveries to be handled only by appointment with known vendors. Require vendors to call before a delivery and to provide the driver's name and vehicle number. Accept packages and deliveries only at the facility front gate.

- Secure hazardous materials in locked buildings or fenced areas. Have a sign-out system for keys.

- Secure valves, manways, and other fixtures on transportation equipment when not in use. Lock all vehicle and delivery trailer doors when not in use. Secure all rail, truck, and barge

containers when stored at your location. Use tamper-resistant or tamper-evident seals and locks on cargo compartment openings.

- Periodically inventory the quantity of hazardous materials you have on site in order to recognize if a theft has occurred.

- Keep records of security incidents. Review records to identify trends and potential vulnerabilities.

- Report any suspicious incidents or individuals to your local Federal Bureau of Investigation (FBI) office and to local law enforcement officials.

IV. En Route Security

Shippers and carriers can work together to assure the security of hazardous materials shipments en route from origin to destination:

- Shippers should assess the transportation modes or combinations of modes available for transporting specific materials and select the most appropriate method of transportation to assure efficient and secure movement of product from origin to destination.

- Know your carriers. Have a system for qualifying the carriers used to transport hazardous materials. Use carrier safety ratings, assessments, safety surveys, or audits and ask the carrier to provide information on security measures it has implemented. Verify the carrier has an appropriate employee hiring and review process, including background checks, and an on-going security training program.

- Verify the identity of carrier and/or driver prior to loading a hazardous material. Ask the driver for photo identification and commercial drivers license and compare with information provided by the carrier. Ask the driver to tell you the name of the consignee and the destination for the material and confirm with your records before releasing shipments.

- Identify preferred and alternative routing, including acceptable deviations. Strive to minimize product exposures to communities or populated areas, including downtown areas; avoid tunnels and bridges where possible; and expedite transportation of the shipment to its final destination.

- Minimize stops en route; if you must stop, select locations with adequate lighting on well-traveled roads and check your vehicle after each stop to make sure nothing has been tampered with. Consider using two drivers or driver relays to minimize stops during the trip. Avoid layovers, particularly for high hazard materials.

- Shippers and rail carriers should cooperate to assure the security of rail cars stored temporarily on leased track.

- If materials must be stored during transportation, make sure they are stored in secure facilities.

- Train drivers in how to avoid highjacking or stolen cargo—keep vehicles locked when parked and avoid casual conversations with strangers about cargoes and routes.

- Consider if a guard or escort for a specific shipment or hazardous material is appropriate.

- Consider utilizing advanced technology to track or protect shipments en route to their destinations. For example, you may wish to install tractor and trailer anti-theft devices or utilize satellite tracking or surveillance systems. As an alternative, consider frequent checks with drivers by cell phone to ensure everything is in order.

- Install tamper-proof seals on all valves and package or container openings.

- Establish a communication system with transport vehicles and operators, including a crisis communication system with primary and back-up means of communication among the shipper, carrier, and law enforcement and emergency response officials.

- Implement a system for a customer to alert the shipper if a hazardous materials shipment is not received when expected. When products are delivered, check the carrier's identity with shipping documents provided by the shipper.

- Get to know your customers and their hazardous materials programs. If you suspect you shipped or delivered a hazardous material to someone who may intend to use it for a criminal purpose, notify your local FBI office or local law enforcement officials.

- Report any suspicious incidents or individuals to your local FBI office and to local law enforcement officials.

V. Additional Information

Up-to-date information is a key element of any security plan. You should consider methods to: (1) Gather as much data as you can about your own operations and those of other businesses with similar product lines and transportation patterns; (2) develop a communications network to share best practices and lessons learned; (3) share information on security incidents to determine if there is a pattern of activities that, when considered in isolation are not significant, but when taken as a whole generate concern; and (4) revise your security plans as necessary to take account of changed circumstances and new information.
