The workshop will develop information that may be critical to the design of the pivotal studies required to assess plague vaccine efficacy.

**Date and Time:** This 1 1/2-day public workshop will be held on October 13, 2004, from 8:30 a.m. to 5 p.m., and October 14, 2004, from 8:30 a.m. to 12 noon.

The workshop will be divided into interactive sessions in which leaders in the plague research field will present topics of particular relevance to plague vaccines. The sessions will include the following topics: (1) Introduction to the "Animal Rule," (2) pathogenesis of plague, (3) plague vaccines and assessment of immune responses, (4) human disease and relevant animal models, and (5) implementation of the "Animal Rule" for plague vaccines. In addition, an expert panel will discuss the issues that will be critical for the development and eventual licensure of plague vaccines. The workshop's goal is to expedite the development and licensure of new plague vaccines by providing information critical to the development of the following: (1) Appropriate animal models, (2) immuno-assays, and (3) testing plans for vaccine evaluation.
