

I told Ella how to spice up her chicken soup.

She told me why she got a screening test for colorectal cancer.

When Ella talked to me about colorectal cancer, I listened — and learned. Her doctor told her that colorectal cancer is the second-leading cancer killer. And that the risk increases as you age. Everyone 50 and older should get screening tests. So that's exactly what I'm doing. Thanks to Ella!

Screening tests can save lives. Talk with your doctor about your screening options.
