

I Taught Dave All He Knows About Golf.

**He told me
how I could avoid
colorectal cancer.**

When Dave told me what he learned about colorectal cancer, I listened. His doctor told him colorectal cancer (cancer of the colon or rectum) is the second-leading cancer killer. And that the risk increases as you age, especially after 50. Screening tests are often the only way to detect the disease in the early stages—when there may not be any symptoms and when treatment can be most effective. Everyone 50 and older should get colorectal cancer screening tests. So now I do. Now Dave enjoys a good golf game and I enjoy good health.

Screening tests can save lives.
Talk to your doctor about your
screening options.
