Colorectal Cancer Screening Tests Can Save Lives.

And now, Medicare can help pay for them.

Colorectal cancer is the second-leading cancer killer in the U.S. Screening tests can detect colorectal polyps, which are small growths that may become cancer if not removed. Screening tests can also find colorectal cancer early, when there may not be any symptoms and treatment can be most effective.

Medicare now helps pay for colorectal cancer screening tests.

Talk with your doctor about your screening options.
