

I Taught Nick All He Knows About Woodworking.

He told me how I could avoid colorectal cancer.

When Nick told me what he learned about colorectal cancer, I listened. His doctor told him colorectal cancer (cancer of the colon or rectum) is the second-leading cancer killer. And that the risk increases as you age, especially after 50. Everyone, both men and women, 50 and older should get colorectal cancer screening tests even if you don't have any symptoms. So now I do. Now Nick can use a table saw and I enjoy good health.

Screening tests can save lives. Talk to your doctor about your screening options.
