Are High Costs Putting Good Health Care Out Of REACH?

Congresswoman Loretta Sanchez Is Working To Bring

Affordable Health Care To Every Orange County Resident

“ There’s a health care crisis in America. More than 40 million citizens of the richest country in the world lack basic health insurance. It is unacceptable that the U.S. ranks lower than 10th in leading health indicators such as life expectancy and infant mortality rates. ”

– CONGRESSWOMAN **LORETTA SANCHEZ**

Affordable Prescription Drugs For Seniors On Medicare

Prescription drug prices continue to rise, leaving seniors with few options. That’s why Congresswoman Sanchez introduced the “Equal Access to Prescription Drugs for All Seniors Act” (H.R. 2461). This bill was designed to cover all drug costs for seniors if out-of-pocket drug expenses totaled more than 6% of their income. She is also pushing to allow the Federal Government to negotiate with drug companies for better prices.

Better Health Insurance Options For Self-Employed Workers

Congresswoman Loretta Sanchez introduced H.R. 741, the “Self-Employed Health Equity Adjustment to Lower Tax Hindrance Act” to help self-employed individuals afford health insurance by allowing them to take the health insurance deduction into account in determining net earnings from self-employment.

More Nurses And Health Care Workers For Orange County

The nursing shortage is especially bad in California. To combat the growing problem, Loretta has sponsored legislation to forgive student loans for those choosing nursing as a career. She has also co-sponsored legislation to create a minimum number of registered nurses per patient to increase the level of care for patients.
