7FCM4- C4-03-0073-B***

***FSC Class(es) 7910, 7920, 7930, 8465***

---

**Worldwide Shipping**

**Multiple Award**

This Federal Supply Schedule no longer has a prescribed beginning and ending date. The Schedule period is continuous. See Contractor information inside for contract begin and expiration dates.

This document replaces the Cumulative Edition issued July 1, 2004

## 1. Publicizing Contract Actions

The Federal Supply Schedules have been synopsised in the Commerce Business Daily and satisfy the requirements of the Competition in Contracting Act (Pub. Law 98-369) and FAR Part 5, Publicizing Contract Action.

## 2. Ordering Information

The brand names of items that have been awarded under this schedule are listed by Special Item Number (SIN) in the "Supplies and/or Services" section. Locate the contractor for a particular brand name in the "contractors" section at the back of this schedule. This section contains the contractor's ordering address, telephone number, contract number and contract effective date. Consult the contractor's catalog/price list for more detailed ordering information.

**SERVICES:** Refer to Ordering Procedures for Services (Requiring a Statement of Work) at <http://www.gsa.gov/schedules-ordering>.

Ancillary (product-related) services priced at hourly rates or other types of fixed pricing should be purchased using the ordering guidelines of FAR 8.404.

### **PRODUCTS:**

#### **Orders under \$2500:**

Place order directly with contractor for the item that best meets your needs.

#### **Orders over \$2500:**

To ensure a "Best Value" determination is made, as required by FAR 8.404:

- Review **GSA Advantage!**® (<http://www.gsaadvantage.gov>), an on-line electronic ordering system  
- or -
- Review 3 schedule price lists.

#### **Orders over the Maximum Order Threshold:**

Each schedule contract has a maximum order threshold. In addition to following the ordering procedures for orders above \$2500, customers shall

- Review price information on **GSA Advantage!**® or review additional schedule contractors' price lists.
- Request price reductions from schedule contractor(s) appearing to provide a best value
- Place the order with the schedule contractor providing the best value.

**NOTE:** You can now access Federal Supply Schedule contract award information online at [www.gsa.gov/elibrary](http://www.gsa.gov/elibrary), then click on the "Schedules E-Library" button.

**When determining what is a "best value," you may consider the following:**

- Special features of the supply/service are required but not provided by a comparable supply/service
- Trade-in considerations
- Probable life of the item selected compared to that of a comparable item
- Warranty considerations
- Maintenance availability
- Past performance
- Environmental and energy efficiency considerations

**Documentation.** Minimum documentation is generally all that is required (e.g., contractor's name, item purchased and price paid). Additional documentation is necessary when the requirement is defined to a particular brand name and only for orders exceeding the micro-purchase threshold (see FAR 8.404(b)(7)).

## 3. GSA Advantage!

(Electronic Commerce) [www.gsa.gov](http://www.gsa.gov)

This on-line electronic ordering system allows customers to search for products, review delivery options and place orders.

### HOW TO ACCESS **GSA Advantage!**®

1. You must be able to connect to the Internet.
2. Have access to a web browser (i.e., Netscape, Internet Explorer).
3. Use your web browser to connect to the GSA Home Page:  
**[www.gsa.gov](http://www.gsa.gov)**

Select - **GSA Advantage!**® — On-Line Shopping Service

If you need more information or assistance contact:

Internet e-mail address: [GSA.Advantage@gsa.gov](mailto:GSA.Advantage@gsa.gov)

GSA Advantage voice mail hotline: (703)305-7359

- or -

If you are not able to connect to the Internet, contact your GSA Customer Service Director for assistance (see Customer Service Directors listing under paragraph 21).

## 4. Contractor Award Information

<http://www.gsalibrary.gsa.gov/elib/eLibrary.jsp>

For a listing of the very latest contract award information you can:

Click on the website above and then click on "Schedules E-Library". You can search the E-Library by SIN, Contractor, Contract Number, Schedule Number or by a key word. When you get to the Schedule you want, you'll see the list of SIN's and the Contractors listed below each SIN. When the Contractor's Internet address is available, it will be shown and you can use it to link to their website. The E-mail address, if available, will enable you to E-mail the Contractor for price lists or any other contract information. (**Note:** The Internet address and E-mail address will only be available if those contractors are on **GSA Advantage!**®).

Consult the contractor's catalog/price list for more detailed ordering information, such as:

- Contract items awarded.
- Maximum order provisions.
- Geographic coverage (delivery area).
- Contract price or discount.

- Quantity discounts.
- Prompt payment terms.
- Government purchase card terms.
- Commercial delivery terms.
- Expedited Delivery.
- Ordering address(es).
- Payment address(es).
- Warranty provision.
- Export packing charges.
- Applicable terms and conditions of rental, maintenance, installation and repair.
- Environmental and energy efficiency

## 5. Small Business Participation

The General Services Administration and the Small Business Administration strongly support the participation of small business concerns in the Federal Supply Schedules Program. To enhance small business participation, SBA policy requires agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals. See [www.gsa.gov/smallbusiness](http://www.gsa.gov/smallbusiness) for guidance on goal setting and goal submittal via the Internet.

For orders exceeding the micro-purchase threshold, FAR 8.404 requires agencies to consider the catalogs/price lists of at least three schedule contractors or to consider reasonably available information by using the **GSA Advantage!**® on-line shopping service ([www.gsaadvantage.gov](http://www.gsaadvantage.gov)). The catalogs/price lists, **GSA Advantage!**®, and the Federal Supply Service Home Page ([www.gsa.gov](http://www.gsa.gov)) contains information on a broad array of products and services offered by small business contractors.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting price lists for a best value determination.

For orders exceeding the micro-purchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

## 6. Ordering Information – JWOD (NIB/NISH) Products

The Javits-Wagner-O'Day (JWOD) Program (NIB/NISH) provides many products to Federal customers under its mandatory source authority. Before making any open market purchase from a schedule contractor, ordering agencies should determine if there is a comparable JWOD (NIB/NISH) product. Please call a JWOD representative at (703) 603-7743 (ext. 112) or (703) 603-7750 (ext. 118), or email [info@jwod.gov](mailto:info@jwod.gov) to check if there is an appropriate product manufactured by people who are blind or have other severe disabilities.

## 7. UNICOR Products

UNICOR (Federal Prison Industries, Inc.) provides items that may be similar to some of the items in this schedule. Prior to making a purchase from the schedule, ordering agencies should check with UNICOR to see if UNICOR's product meets their specific need. For your convenience, this check can be made quickly by calling the UNICOR Customer Service Group at (800) 827-3168.

## 8. Contractor Team Arrangements

Federal Supply Schedule contractors may use "Contractor Team Arrangements" (see FAR 9.6) to provide solutions when responding to a customer's requirements. The policy and procedures outlined in this part will provide more flexibility and allow innovative acquisition methods when using the Federal Supply Schedules.

For more information go to [www.gsa.gov/contractorteamarrangements](http://www.gsa.gov/contractorteamarrangements), click on Schedules, click on BPAs and Contractor Team Arrangements.

## 9. Maximum Order

If the "best value" selection places your order over the Maximum Order, identified in the contractor's catalog or price list, you have an opportunity to obtain a better schedule contract price. Before placing your order, contact the contractor to ask for a better discount price.

The contractor may:

1. offer a new lower price for this requirement;
2. offer the lowest price available under the contract; or
3. decline the order within 5 days.

A delivery order that exceeds the maximum order may be placed with the contractor selected in accordance with FAR 8.404. The order may be placed under the Schedule contract.

## 10. Price Reductions

There may be circumstances when a customer finds it advantageous to request a price reduction, such as where the quantity of an individual order clearly indicates the potential for obtaining a reduced price. Customers that obtain a further price reduction may still place these orders against the Schedule contract. MAS contractors will not be required to pass on to all schedule users a price reduction extended only to an individual customer for a specific order.

## 11. Blanket Purchase Agreements (BPA)

Federal Supply Schedule contracts contain BPA provisions to maximize your purchasing and administrative savings. This feature permits schedule customers and contractors to set up "accounts" to fill a "recurring requirement". These accounts establish a period for the BPA and generally address issues, such as frequency of ordering and invoicing, authorized callers, discounts, delivery locations and times. Agencies may qualify for the best quantity/volume discounts available under the contract, based on the potential volume of business that may be generated through such an agreement, regardless of the size of the individual orders. In addition, agencies may be able to secure a discount higher than that available in the contract based on the aggregate volume of business possible under the BPA. Finally, contractors may be open to a progressive type discounting where the discount would increase once the sales accumulated under the BPA reach certain prescribed levels. Use of a BPA may be especially useful with the new Maximum Order feature. **For more information go to [www.gsa.gov/blanketpurchaseagreement](http://www.gsa.gov/blanketpurchaseagreement), click on Schedules, click on BPAs and Contractor Team Arrangements**

## 12. Incidental Items

For administrative convenience, open market (non-contract) items may be added to a Federal Supply Schedule BPA or the individual task/delivery order if the items are clearly labeled as such on the order, all applicable acquisition regulations have been followed, and price reasonableness has been determined by the ordering activity for the open market items.

## 13. Environmental Products

In order to assist our customers who have determined that their acquisition needs can best be met by purchasing an EPA designated item (considering price, availability and performance requirements), our Schedule contractors have been requested to identify such products on their individual catalogs and or price lists.

Schedule contractors have been requested (where possible and/or feasible) to identify items that:

- Have recycled content (meet EPA designated item criteria)
- Are energy and/or water conserving (e.g., Energy Star)
- Have reduced pollutants (e.g., low volatile organic compounds (VOCs) and chromate-free)

**Note:** Customers should review contractor literature and contact the contractor directly to obtain complete information regarding environmental claims.

Please visit our Environmental Website at:  
[www.gsa.gov/enviroservices](http://www.gsa.gov/enviroservices)

## 14. Variable Contract Periods

Generally, Federal Supply Schedules will no longer have a prescribed beginning and ending date. The schedule periods will

be continuous, and will contain contracts with contract periods that commence on the Date of Award (DOA) and expire in five years (exclusive of any options) from the DOA.

## 15. Authorized Users

The agencies and activities named below may use contracts established under this Federal Supply Schedule.

1. All federal agencies and activities in the executive, legislative and judicial branches.
2. Government contractors authorized in writing by a federal agency pursuant to 48 CFR 51.1.
3. Mixed ownership government corporations (as defined in the Government Corporation Control Act).
4. The Government of the District of Columbia.
5. Other activities and organizations authorized by statute or regulation to use GSA as a source of supply. (Questions regarding activities authorized to use this schedule should be directed to Customer Vendor Relations contact point identified in this document.)

## 16. Geographic Coverage

All Federal Supply Schedules provide contractors the opportunity to offer worldwide coverage. Schedule contractors have three categories of geographic coverage; (1) Domestic, which will cover delivery to the 50 states, Washington D.C., Puerto Rico, (2) Worldwide, which will cover delivery domestically AND overseas; and (3) Overseas Only, which will cover delivery to overseas destinations other than Puerto Rico.

## 17. Purchase Card

Agencies may make payments for oral or written delivery orders by using the Government purchase card. **Payments made using the Government SmartPay purchase card ARE NOT eligible for any negotiated prompt payment discount.**

"Government purchase card" means a uniquely numbered GSA SmartPay credit card issued to named individual Government employees or entities, to pay for official Government purchases.

Effective March 20, 1998, GSA began requiring Federal Supply Schedule contractors to accept the GSA SmartPay purchase card as a method of payment for acquisitions up to the micro-purchase threshold, currently \$2,500. This requirement is being phased in and by January 1, 1999, all Federal Supply Schedule contracts must include this requirement. The card may be used for payment in excess of this threshold if the using agency and contractor agree.

Information about the GSA Fleet, Travel and Purchase Payment is available at:

[www.gsa.gov/smartpay](http://www.gsa.gov/smartpay)

and within your agency's written internal operating procedures.

The contractor shall not process a transaction for payment through the credit card clearinghouse until the purchased supplies have been shipped or services performed. Unless the cardholder requests correction or replacement of a defective or faulty item in accordance with other contract requirements, the contractor shall immediately credit a cardholder's account for items returned as defective or faulty.

## 18. For Further Assistance

### GSA CONTACTS

#### Gerri Winters, Contract Specialist ( A-I)

## Contractor Listing

The following pages list all of the businesses that have been awarded a contract in association with this schedule. You are provided the contractor name, address, phone, fax, email address, business size, contract number, contract period, list of awarded SINs, domestic contact name, phone, fax, email, overseas contact name, phone, fax, email, and geographic coverage.

### GSA Advantage® Program

Those contracts that have been loaded to the **GSA Advantage®** system are indicated with the Advantage Logo. If you would like more information about **GSA Advantage®**, please consult paragraph 3 of this

schedule.

### Business Size and Minority Business Enterprise indicators:

“s” small business  
“o” other than small business  
“a” minority  
“b” other than minority business  
“w” woman-owned business  
“d” disadvantaged business  
“vo” veteran owned business  
“8(a)” 8(a) business  
“hz” HUBZone business

**ENVIRONMENTAL MATRIX INTRODUCTION**  
**(SIN's 375-361 and 375-362)**

Environmentally Preferable Purchasing (EPP) promotes Government use of products and services that have reduced impact on human health and the environment. Such purchases are required by Executive Order 12873, Federal Acquisition, Recycling and Waste Prevention.

Federal agencies can be both green and clean because Government buyers have a tool for comparing cleaning products on the basis of their environmental attributes. The matrix included in this schedule makes it easy to select a cleaning product based on local environmental needs. The matrix is a cooperative effort between the U.S. General Services Administration (GSA) and the U.S. Environmental Protection Agency (EPA) to facilitate the purchase of environmentally preferable products as required by Executive Order 12873.

All products in this program comply with OECD Definition of Ready Biodegradability (60% to 70% Biodegradable within 28 days), for each organic component above 1% in the ready to use product.

Products do not constitute a Hazardous Waste, as defined in 40 CFR Part 261, when offered for disposal.

Product must show evidence that the oral LD 50 toxicity (rat) is greater than 50 milligrams per kilogram, that the inhalation LC 50 toxicity (rat) is greater than 2 milligrams per liter, and that the dermal LD 50 toxicity (rabbit) is greater than 200 milligrams per kilogram.

Environmentally preferable, biodegradable cleaners/degreasers formulated to be readily biodegradable, have low toxicity and contain no phenolic compounds or petroleum solvents.

**ENVIRONMENTAL ATTRIBUTE MATRIX:**

The matrix lists the six (6) environmental attributes selected by the General Services Administration/Environmental Protection Agency. None of the attributes is considered more important than any other. Each government buyer is allowed to select the most relevant attribute(s) for their needs and balance the available environmental information, along with traditional factors such as price and performance, when making purchasing decisions. The following is a brief description of the six (6) attributes.

1. **SKIN IRRITATION:** Some ready-to-use cleaning products may contain chemicals that can cause skin redness or swelling. If potential skin irritation is a concern, products rated as negligible (none to slight) would be most preferable for this attribute. From most preferable to least preferable, select negligible (N), slight (SL), moderate (M), or strong (ST), in that order. An "Exempt" means that all chemical compounds in the ready-to-use product are less than 5% by weight.
2. **AIR POLLUTION POTENTIAL:** Products may contain volatile organic compounds (VOCs). When these products are used, the VOCs may escape to the atmosphere and react to form smog. Smog and other atmosphere pollutants have been shown to cause irritation of the eyes, nose, throat, and lungs and to cause asthma attacks. Many state and local authorities have restrictions on the use of VOCs. The numbers reported refer to the percent by weight of VOCs in the ready-to-use product. An "NA" (not applicable) indicates no VOCs of concern are present. The lower the number, the more preferable the product. An "NA" would be most preferable for this attribute.
3. **FRAGRANCES:** This attribute does not refer to natural odors which are associated with cleaning agents (e.g. a lemon odor in a citrus-based cleaner). It refers instead to fragrances that are added to the formulation to improve its odor or to mask an offensive odor. While fragrances added to a formulation have little cleaning value, they may provide aesthetic benefits important to many users on the other hand. A basic principle of pollution prevention is to avoid additives that are unnecessary. A "yes" indicates that fragrances have been added, a "no" indicates that they have not been added.
4. **DYES:** This attribute refers to dyes that have been added to a formulation to enhance or change the color of the product. While the addition of these dyes contributes little to the cleaning value of the product, it may be important for safety reasons. These additives may help end-users differentiate between products and other liquids, such as water. Again, a basic principle of pollution prevention is to avoid unnecessary additives. Dyes present for aesthetic reasons may not be providing a necessary function. End-users must decide what is necessary in their specific situation. A "yes" indicates that dyes have been added to the product, a "no" indicates that they have not been added.
