
Section 17

Agriculture

This section presents statistics on farms and farm operators; land use; farm income, expenditures, and debt; farm output, productivity, and marketings; foreign trade in agricultural products; specific crops; and livestock, poultry, and their products.

The principal sources are the reports issued by the National Agricultural Statistics Service (NASS) and the Economic Research Service (ERS) of the U.S. Department of Agriculture. The information from the 1997 Census of Agriculture is available in printed form in the Volume 1, Geographic Area Series; in electronic format on CD-ROM; and on the Internet site <<http://www.nass.usda.gov/census/>>. The Department of Agriculture publishes annually *Agricultural Statistics*, a general reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The ERS publishes data on farm assets, debt, and income on the Internet site <<http://www.ers.usda.gov/briefing/farmincome/>>. Sources of current data on agricultural exports and imports include *Foreign Agricultural Trade of the United States*, published by the ERS, and the reports of the U.S. Census Bureau, particularly *U.S. Imports of Merchandise on CD-ROM*, and *U.S. Exports of Merchandise on CD-ROM*.

The 45 field offices of the NASS collect data on crops, livestock and products, agricultural prices, farm employment, and other related subjects mainly through sample surveys. Information is obtained on some 75 crops and 50 livestock items as well as scores of items pertaining to agricultural production and marketing. State estimates and supporting information are sent to the Agricultural Statistics Board of NASS which reviews the estimates and issues reports containing state and national data. Among these reports are annual summaries such as *Crop Production*, *Crop Values*, *Agricultural Prices*, and *Livestock Production, Disposition and*

Income. For more information about concepts and methods underlying USDA's statistical series, see *Major Statistical Series of the U.S. Department of Agriculture* (Agricultural Handbook No. 671), a 12-volume set of publications.

Farms and farmland—The definitions of a farm have varied through time. Since 1850, when minimum criteria defining a farm for census purposes first were established, the farm definition has changed nine times. The current definition, first used for the 1974 census, is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year.

Acreage designated as "land in farms" consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator's total operation. Land in farms includes acres set aside under annual commodity acreage programs as well as acres in the Conservation Reserve and Wetlands Reserve Programs for places meeting the farm definition. Land in farms is an operating unit concept and includes land owned and operated as well as land rented from others. All grazing land, except land used under government permits on a per-head basis, was included as "land in farms" provided it was part of a farm or ranch.

Since 1945, an evaluation of census coverage has been conducted for each census of agriculture to provide estimates of the completeness of census farm counts. According to coverage evaluation results, the past five censuses of agriculture included an average of 92 percent of U.S. farms and 98 percent of agriculture production. The 1997 coverage evaluation program was designed to measure four components of error in the census farm

counts. These components include undercount due to farms not on the mail list; overcount due to farms duplicated or enumerated more than once; undercount due to farms incorrectly classified as non-farms; and overcount due to nonfarms incorrectly classified as farms. The first component, mail list undercount, is by far the largest component of coverage error. The percentage of farms missed in the census varies considerably by state. In general, farms not on the mail list tended to be small in acreage, production, and sales of agricultural products. For more explanation about mail list compilation and census coverage, see Appendixes A and C, *1997 Census of Agriculture*, Volume 1, reports.

Farm income—The final agricultural sector output comprises cash receipts from farm marketings of crops and livestock, federal government payments made directly to farmers for farm-related activities, rental value of farm homes, value of farm products consumed in farm homes, and other farm-related income such as machine hire and custom work. Farm marketings represent quantities of agricultural products sold by farmers multiplied by prices received per unit of production at the local market. Information on prices received for farm products is generally obtained by the NASS Agricultural Statistics Board from surveys of firms (such as grain elevators, packers, and processors) purchasing agricultural commodities directly from producers. In some cases, the price information is obtained directly from the producers.

Crops—Estimates of crop acreage and production by the NASS are based on current sample survey data obtained from individual producers and objective yield

counts, reports of carlot shipments, market records, personal field observations by field statisticians, and reports from other sources. Prices received by farmers are marketing year averages. These averages are based on U.S. monthly prices weighted by monthly marketings during specific periods. U.S. monthly prices are state average prices weighted by marketings during the month. Marketing year average prices do not include allowances for outstanding loans, government purchases, deficiency payments or disaster payments.

All state prices are based on individual state marketing years, while U.S. marketing year averages are based on standard marketing years for each crop. For a listing of the crop marketing years and the participating states in the monthly program, see *Crop Values*. Value of production is computed by multiplying state prices by each state's production. The U.S. value of production is the sum of state values for all states. Value of production figures shown in Tables 827-830, 834, and 835 should not be confused with cash receipts from farm marketings which relate to sales during a calendar year, irrespective of the year of production.

Livestock—Annual inventory numbers of livestock and estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture are based on information from farmers and ranchers obtained by probability survey sampling methods.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Department of Agriculture data, see Appendix III.

No. 796. Farms—Number and Acreage by Size of Farm: 1987 to 1997

No. 808. Farm Income—Cash Receipts From Farm Marketings: 1995 to 1999

[In millions of dollars (187,962 represents \$187,962,000,000). Represents gross receipts from commercial market sales as well as net Commodity Credit Corporation loans. The source estimates and publishes individual cash receipt values only for major commodities and major producing states. The U.S. receipts for individual commodities, computed as the sum of the reported states, may understate the value of sales for some commodities. The degree of underestimation in some of the minor commodities can be substantial]

No. 814. Value of Selected Commodities Produced Under Contracts: 1999

[**\$69,641** represents **\$69,641,000,000**. Marketing contracts refer to verbal or written agreements between a buyer and a grower that set a price and determine an outlet for a specified quantity of a commodity before harvest or before the farmer markets the commodity. Production contracts involve paying the farmer a fee for providing management, labor, facilities, and equipment, while assigning ownership of the product to the contractor. Survey based estimates (see source) exclude Alaska and Hawaii and do not represent official U.S. Dept. of Agriculture estimates of farm sector activity]

Commodity	Value of production under contract (mil. dol.)	Percent of total production ¹	Commodity	Value of production under contract (mil. dol.)	Percent of total production ¹
Total	69,641	240	Sugar beets	1,048	88
Marketing contracts ³	35,019	220	Vegetables	2,007	420
Cattle	4,1695	45	Production contracts ³	34,622	220
Corn	1,926	13	Poultry and eggs ⁵	19,354	92
Cotton	1,746	37	Cattle	46,730	420
Fruits	6,624	64	Hogs	5,179	53
Hogs	4,1136	412	Vegetables	1,534	415
Soybeans	891	8			

¹ Represents percent of production under contract as percent of total commodity production, except as noted. ² Percent of total value of agricultural production. ³ Includes other commodities not shown separately. ⁴ Data have relative standard error between 25 and 49 percent. ⁵ Data not available to estimate value of production for broilers.

No. 820. Imports' Share of Food Consumption by Commodity: 1990 to 1999

[In percent.] Import share is the total quantity imported divided by the quantity available for domestic human food consumption. Calculated from supply and utilization balance sheets. A portion of the imports of some commodities is exported; therefore, the ratios presented here may overstate the importance of imports in domestic consumption for some commodity groups. Similarly, a portion of the imports of some commodities is diverted to such nonfood uses as feed, seed, alcohol and fuel production, and industrial uses. This too can overstate the importance of imports.]

Commodity	1990	1995	1998	1999	Commodity	1990	1995	1998	1999
Red meat	8.1	6.5	7.7	8.2	Grapes	37.6	38.8	43.7	45.0
Beef	9.8	8.3	10.1	10.7	Fruit juice	37.4	28.1	32.4	31.8
Pork	5.6	3.8	3.9	4.4	Orange	27.9	19.2	24.1	22.9
Fish and shellfish	56.3	55.3	64.9	68.1	Apple	63.9	53.7	60.2	60.8
Dairy products ¹	1.9	1.9	2.4	2.9	Fresh vegetables	7.5	9.3	12.0	10.9
Cheese ²	4.8	4.7	4.5	5.3	Cucumbers	33.7	38.3	40.2	39.7
Salad and cooking oils ³	7.2	12.0	12.2	12.4	Peppers	19.7	19.1	24.8	24.7
Fresh fruits	30.6	33.7	36.0	39.6	Tomatoes	20.5	30.5	38.6	33.7
Citrus	3.4	7.1	8.4	13.4	Wheat ⁴	4.6	7.7	11.3	10.2
Apples	4.7	7.7	6.5	7.3	Rice ⁵	8.1	12.1	12.6	13.9
Bananas	99.8	99.8	99.7	99.7	Cane and beet sugar ⁶	24.5	12.4	17.6	13.9

¹ Milk equivalent of all dairy products calculated on a milkfat basis. ² Natural equivalent of cheese and cheese products. Includes all types of cheese except full-skim American and cottage, pot, and baker's cheeses. ³ Olive and canola oil imports. ⁴ Flour and other wheat products included. Grain equivalent. ⁵ Rough equivalent. Includes milled rice converted to rough basis at annual extraction rate. ⁶ Import share is the quantity of imports for domestic consumption (net of re-exports) divided by domestic food consumption.

No. 825. Percent of Corn, Soybean, and Cotton Acreage Planted With Genetically Modified Seed: 2000 and 2001

[In percent. Based on the June Agricultural Survey. Randomly selected farmers across the United States were asked if they planted corn, soybeans, or upland cotton seed that, through biotechnology, is resistant to herbicides, insects, or both. The states published individually below represent 82 percent of all corn planted acres, 90 percent of all soybean planted acres, and 83 percent of all upland cotton planted acres. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). The acreage estimates are subject to sampling variability because all operations planting biotech varieties are not included in the sample]

No. 842. Milk Production and Manufactured Dairy Products: 1980 to 2000

[334 represents 334,000]

Item	Unit	1980	1985	1990	1995	1996	1997	1998	1999	2000
Number of farms with milk cows	1,000	334	269	193	140	131	124	117	111	105
Cows and heifers that have calved, kept for milk	Mil. head . . .	10.8	11.0	10.0	9.5	9.4	9.3	9.2	9.2	9.2
Milk produced on farms	Bil. lb . . .	128	143	148	155	154	156	157	163	168
Production per cow	1,000 lb . . .	11.9	13.0	14.8	16.4	16.4	16.9	17.2	17.8	18.2
Whole milk sold from farms ¹	Bil. lb . . .	126	141	146	154	153	155	156	161	166
Value of milk produced	Bil. dol. . .	16.9	18.4	20.4	20.1	23.0	21.1	24.3	23.4	20.8
Gross farm income, dairy products	Bil. dol. . .	16.7	18.1	20.2	19.9	22.8	21.0	24.2	23.2	20.6
Cash receipts from marketing of milk and cream ¹	Bil. dol. . .	16.6	18.1	20.1	19.9	22.8	20.9	24.1	23.2	20.6
Number of dairy manufacturing plants	Number . . .	2,257	2,061	1,723	1,495	1,422	1,384	1,323	1,192	1,124
Manufactured dairy products:										
Butter (incl. whey butter)	Mil. lb . . .	1,145	1,248	1,302	1,264	1,174	1,151	1,168	1,277	1,274
Cheese, total ²	Mil. lb . . .	3,984	5,081	6,059	7,917	7,218	7,330	7,492	8,894	8,255
American (excl. full-skim American)	Mil. lb . . .	2,376	2,855	2,894	3,131	3,281	3,286	3,315	3,533	3,634
Cream and Neufchatel	Mil. lb . . .	229	294	431	544	575	615	621	639	687
All Italian varieties	Mil. lb . . .	983	1,491	2,207	2,674	2,812	2,881	3,005	3,145	3,311
Cottage cheese: Creamed ³	Mil. lb . . .	825	716	832	711	690	706	728	720	736
Condensed bulk milk	Mil. lb . . .	952	1,232	1,426	1,372	1,270	1,275	1,263	1,365	1,202
Nonfat dry milk ⁴	Mil. lb . . .	1,168	1,398	902	1,243	1,068	1,223	1,140	1,364	1,457
Dry whey ⁵	Mil. lb . . .	690	987	1,143	1,147	1,117	1,137	1,178	1,147	1,188
Yogurt, plain and fruit flavored	Mil. lb . . .	(NA)	(NA)	(NA)	1,646	1,588	1,574	1,639	1,717	1,835
Ice cream, regular	Mil. gal . . .	830	901	824	862	879	914	935	972	970
Ice cream, lowfat ⁶	Mil. gal . . .	293	301	352	357	366	386	407	381	382

NA Not available. ¹ Comprises sales to plants and dealers, and retail sales by farmers direct to consumers. ² Includes varieties not shown separately. ³ Includes partially creamed (low fat). ⁴ Includes dry skim milk for animal feed. ⁵ Includes animal but excludes modified whey production. ⁶ Includes freezer-made milkshake in most states.
