*These Type 2 helicopters were identified through NFMAS budgeting to be primary initial attack resources for their home units. Availability of these resources for off unit assignment will be coordinated with their home units. They are contracted under a Washington Office National Contract, but are not considered National Resources.

84.4.2 - GREAT BASIN TYPE 3 EXCLUSIVE-USE HELICOPTERS . See Table 84-2 below. Also see Chapter 24 on obtaining additional Type 3 helicopters.

84.5 - CALL-WHEN-NEEDED HELICOPTERS. Refer to 24.7.2 of the Great Basin Mobilization Guide.

85 - AIRPORT GUIDE. Classification of airfield/airstrips in Region 1, Region 4, and Region 6 are contained in the USDA Forest Service Airfield/Airstrip Directory. This directory is available on the Aviation Safety Home Page.

85.1 - BACK COUNTRY AIRFIELDS. Back Country Airfields are identified as Category 4 in the Airfield/Airstrip Directory. Criteria for their use and pilot qualifications for Category 4 airfields are also contained in the Directory.

Air Operations into any Airfield/Airstrip should be coordinated with local dispatch and regional aviation personnel.

85.2 - GREAT BASIN AIRPORT INFORMATION.

Information about unlisted airports and airfields is available from several sources. State airport directories and the appropriate State Division of Aeronautics also represent good sources of information.

Air Operations personnel, dispatchers, or local commercial and private aircraft operators should be consulted for information regarding current conditions of airfields being or intended to be utilized. This is especially helpful when planning flights to Back Country airfields.

Any individual field listing in this directory may be followed by either or both of the supplemental headings "Limitations" and "Communications". Under the "Limitations" listing, such things as Back Country airfield classification and any restrictions or limitations to night operations can be found. The "Communications" legend will apply only to those fields that do not have telephone access. In these cases, information regarding radio communications will be listed where that capability exists.

Airports listed are those with conditions or limitations more restrictive than those listed in the Airport/Facility Directories. When possible, the Airport/Facility Directory or other sources should be consulted for the most current information.

86 - SPECIAL-USE AIRSPACE (SUA). See the Interagency Airspace Coordination Guide for procedures. Points of contacts, with specific procedures for each base/scheduling agency, are as follows. Dispatchers unfamiliar with the military units with whom they are dealing should refer to the "Geographical Location" column, then locate the applicable Special-Use Airspace for the area of operations.

87 - SUNRISE/SUNSET TABLES. These tables should be maintained at the local dispatch center and can be furnished upon request. The tables are available on the Internet at <http://www.usno.navy.mil> (United States Naval Observatory). Select rise/set menu under the Astronomical Applications Department, then select the month, the day, the state, and the city. Click on the Get Data button to generate sunrise/sunset tables. It is also recommended that you download the data and reformat the files so they will print on a single sheet.
