

DOE R&D Accomplishments

www.osti.gov/accomplishments

The Department of Energy (DOE) Research and Development (R&D) Accomplishments Web site is a publicly available central forum for information about the outcomes of past DOE R&D. The outcomes featured have had significant economic impact, have improved people's lives, or have been widely recognized as a remarkable advance in science. An R&D accomplishment is the outcome of **past** research whose benefits are being realized now.

The Web site is comprised of the R&D Accomplishments Database, Featured Topics pages, and Snapshots. This exciting collection showcases the proud heritage of the Department's R&D.

R&D Accomplishments Database

The R&D Accomplishments Database consists of searchable full text and bibliographic citations of documents reporting accomplishments from DOE and DOE contractor facilities. The Database was developed and is maintained and supported by the DOE Office of Scientific and Technical Information (OSTI) and is Web-based.

Database Features

- Full-text search by word or phrase
- Browse by title listing of available reports
- Searchable PDF which highlights search terms in document
- Download full-text PDF files or as single-page images
- Best viewed with Netscape 4.0 and above, or Microsoft Explorer 4.0 and above

Featured Topics Pages

Featured Topics pages may spotlight an individual scientist or an area of research.

Pages highlighting individuals provide insights into the scientist's body of research, a biographical sketch, recognitions, and links to related full-text reports and Web pages.

Pages highlighting areas of research provide summary information about the research and links to related full-text reports and Web pages.

Snapshots

Complementing the Database and Featured Topics pages is a page called Snapshots, which provides quick pictures, introductions, overviews, or synopses of DOE accomplishments.

The Snapshots page contains links to items or articles which contain information about or identify at least one R&D accomplishment.

In some instances when more information may be available via R&D Accomplishments Database reports, links to those reports are provided.
