

*At last,
U. S. researchers
have an easy Web tool
for searching foreign
research literature.*

ETDEWEB

ETDE World Energy Base

<http://www.etde.org/ETDEWEB>

Access and Users

ETDEWEB is free, with registration, for any U.S. resident. IP access can be arranged for large corporations or universities through the Department of Energy's Office of Scientific and Technical Information (OSTI). Users include researchers, policymakers, academicians, information specialists, and private citizens. Take advantage of existing research results today domestically and internationally!

Key Features

- access to more than 3.2 million citations to journal articles, conference papers, gray literature, books, and more
- includes ETDE information exchanged since 1987 and historical information back to 1974 from OSTI's Energy Citations database
- direct access to over 104,000 full text items via the OSTI site and access to many more via links around the world
- easy and advanced search modes

ETDEWEB Contains

... information on

- energy R&D, energy policy, energy conservation
- environmental impacts of energy production and use, including climate change
- nuclear, coal, hydrocarbon and renewable energy technologies
- other energy-related topics

Use the ETDEWEB

... to answer science and technology questions

... to identify

- latest developments
- researchers
- energy policy documents
- economic potential
- current focus areas
- research published by country
- and more ...

Sponsored by ETDE

... which is a multilateral information exchange program, established in 1987, under the auspices of the International Energy Agency (IEA). More than 15 countries (OSTI is the U. S. member) share their energy research and technology information through the Energy Database. Included is worldwide information from two other multilateral agreements, the IAEA's International Nuclear Information System, and the IEA Clean Coal Centre. For more information about ETDE see <http://www.etde.org>.

... which, since its inception, has been managed and operated on behalf of the member countries by:

DOE/OSTI
ETDE Operating Agent
