

Table 1-3. Birth Rates By Live-Birth Order and Race: United States, Specified Years 1940-55 and Each Year 1960-95

(Rates are live births per 1,000 women 15-44 years in specified group. Live birth order refers to number of children born alive to mother. Figures for live-birth order not stated are distributed. Population enumerated as of April 1 for census years and estimated as of July 1 for all other years. Beginning in 1970, excludes births to non-residents of the United States; see Technical Appendix. The rates in this table for 1991-95 are based on postcensal population estimates consistent with the 1990 census. Rates for these years have recently been revised using more accurate population estimates based on the results of the 2000 census, and are available at: <http://www.cdc.gov/nchs/data/nvsr/nvsr51/nvsr51_12.pdf> . The 1990 based estimates are used in this report for consistency with reports in the series that have already been published and will not be reissued)

Table 1-3. Birth Rates By Live-Birth Order and Race: United States, Specified Years 1940-55 and Each Year 1960-95

(Rates are live births per 1,000 women 15-44 years in specified group. Live birth order refers to number of children born alive to mother. Figures for live-birth order not stated are distributed. Population enumerated as of April 1 for census years and estimated as of July 1 for all other years. Beginning in 1970, excludes births to non-residents of the United States; see Technical Appendix. The rates in this table for 1991-95 are based on postcensal population estimates consistent with the 1990 census. Rates for these years have recently been revised using more accurate population estimates based on the results of the 2000 census, and are available at: <http://www.cdc.gov/nchs/data/nvsr/nvsr51/nvsr51_12.pdf> . The 1990 based estimates are used in this report for consistency with reports in the series that have already been published and will not be reissued)
