<sup>a</sup> Data for the District of Columbia are included with data for Maryland.

<sup>b</sup> Data for New Hampshire and Vermont are included with data for Maine.

NA = Not available.

**Note:** Beginning in 1987, industrial costs per consumer are not calculated since values associated with gas delivered for the account of others are not available. Each year since 1982, these values have represented an increasingly large portion of the total

industrial value. By 1987, a meaningful average cost per consumer could no longer be calculated without them.
