The documents provided in this Annex are intended to facilitate adoption of the Food Code and the application of its provisions as they relate to applicants' and food employees' health and to food establishment inspections.

Forms 1-3, Guides 1 and 2, and the List are designed to assist those responsible for preventing foodborne disease. The Food Code specifies that the **permit holder is responsible** for requiring applicants and food employees to report certain symptoms, diagnoses, past illnesses, high-risk conditions, and foreign travel as they relate to diseases transmitted through food by infected workers. The **food employee is personally responsible** for reporting this information to the person in charge.

Forms 4 and 5 can be used for the Code adoption process and Forms 6 and 7 are provided for use in recording HACCP information and inspectional observations. Guide 3 is a compressed outline of the Code to use as a tool in locating and citing Code provisions.

HACCP Inspection Data

The HACCP Inspection Data form is designed to accommodate the recording of observations during an inspection. The design of the form focuses on information related to the flow of potentially hazardous foods being prepared, displayed, sold, and served within the establishment. The form is intended as a worksheet for use in noting food temperatures/times at each step and other pertinent data as they compare to the established critical limits. This juxtaposition of the observations and the critical limits highlights the violative steps. The information then is transferred to the Establishment Inspection Report form.

Refer to Annex 4, Food Establishment Inspection, Sections 5 and 10, for further discussion regarding the use of the form.

Food Establishment Inspection Report

The food establishment inspection report is the official agency document regarding compliance of the establishment with agency requirements. The goal of the report is to clearly, concisely, and fairly present the compliance status of the establishment and to convey compliance information to the permit holder or person in charge at the conclusion of the inspection. The Food Establishment Inspection Report form is provided as a model for use during routine, follow-up, and investigative inspections.

Refer to Annex 4, Food Establishment Inspection, Sections 6, 11, and 12, for further discussion.

FOOD ESTABLISHMENT INSPECTION REPORT

Violations cited in this report shall be corrected within the time frames specified below, but within a period not to exceed 10 calendar days for critical items (§ 8-405.11) or 90 days for noncritical items (§ 8-406.11).

LIST

Worldwide Status of Salmonella Typhi, Shigella, Escherichia coli O157:H7, and Hepatitis A Virus by Geographical Area.

Preventing Transmission of Diseases through Food by Infected Food Employees with Emphasis on Salmonella Typhi, Shigella spp., Escherichia coli 0157:H7, and Hepatitis A Virus.

The following list of countries shows where typhoid fever, hepatitis A, and various diarrheal diseases commonly occur or are epidemic as reported to the Centers for Disease Control and Prevention (CDC) by the World Health Organization (WHO). CDC publishes this information annually in what is referred to as the "Yellow Book," Health Information for International Travel. Statistics cited were adapted from CDC's 1996-97 edition in the section entitled "Geographical Distribution of Potential Health Hazards to Travelers." The list is not comprehensive. Reporting to WHO is voluntary and is based on mortality, not morbidity. Where the Yellow Book refers to nonspecific "diarrheal disease," E. coli O157:H7 has been denoted as a possible cause.

This list is intended to be used as an aid to increase awareness of the person in charge that travel to some points outside the U.S. may increase the risk for acquiring foodborne illness. The person in charge can use the list to educate food employees about the need to be vigilant in the protection of their health during travel and the importance of informing the person in charge if symptoms occur or if there is a diagnosis of an illness (due to one of the four pathogens listed above) during or following travel.

★ Time from preparation, or opening commercial container, to freezing.

Formula for Consume- or Dispose-by Date C = T - F

C = consume- or dispose-by date

T = days allowed based on storage temperature

F = days before freezing

Example: The morning of October 1, a chicken was cooked, then cooled, refrigerated

for 2 days at 41°F and then frozen. If the chicken is thawed October 10, the food must be consumed or discarded no later than midnight of October 15.

FDA Food Code Mobile Food Establishment Matrix

This table is a plan review and inspectional guide for mobile food establishments based on the mobile unit's menu and operation. Mobile units range in type from push carts to food preparation catering vehicles.

To use the table, read down the columns based on the menu and operation in use. For example, if only prepackaged potentially hazardous food is served, then requirements listed in the **Potentially Hazardous Menu** - **Prepackaged** column apply. Likewise, if only food that is not potentially hazardous is prepared on board, then requirements listed in the **Not Potentially Hazardous Menu** - **Food Preparation** column apply. Note that if a mobile food establishment has available for sale to the consumer both prepackaged potentially hazardous food and potentially hazardous food prepared on board, then the more stringent requirements of the **Potentially Hazardous Menu** - **Food Preparation** column apply.

It is important to remember that mobile units may also be subject to all Food Code provisions that apply to food establishments. Consult the local regulatory authority for specific local requirements.

The local regulatory authority's decision to require auxiliary support services such as a commissary or servicing area should be based on the menu, type of operation and availability of on-board or on-site equipment.

NOTE: The Food Code definition of "Food Establishment" does not include an establishment that offers only prepackaged foods that are not potentially hazardous.
