Chapter 1 - Introduction

Two Bureau of Labor Statistics (BLS) programs, the Current Employment Statistics (CES) and the Multiple Worksite Report (MWR), collect employment and payroll data from employers¹ throughout the United States.

The CES is a **monthly** survey of 300,000 non-farm business establishments² that estimates employment, hours, and earnings at the national, state, and metropolitan area levels. It provides one of the first indicators on the health of the economy.

The MWR is a **quarterly** survey of large employers used to collect statistical information to supplement statewide data provided by employers through State Unemployment Insurance (UI) Quarterly Contribution Reports (QCRs).

One of BLS' primary goals is to reduce the employers' reporting burden, while providing timely, accurate economic information to those who need it. To meet this goal, BLS has established an Electronic Data Interchange (EDI) Center in Chicago, Illinois.

1.1 Electronic Data Reporting

Traditionally, the collection of the CES and MWR data has been by mail. The EDI Center, however, can facilitate collection of these data by offering centralized electronic data reporting. This reduces the burden for employers since they can generate electronic files directly from their payroll system, eliminating the need for manual transcription, and can send files covering all their locations to *one* place, the EDI Center, rather than sending files separately to each State. Thus, employers can reduce their points of contact from as many as fifty individual State agencies, the District of Columbia, Puerto Rico, and the Virgin Islands, to just one, the EDI Center. Employers are reminded that while the initial setup of these files by your firm will require a certain amount of up-front work, the benefits of electronic data reporting will substantially reduce your long-term workload.

While we prefer electronic data reporting, we can accept data files on magnetic media such as cartridge, tape, or diskette. Once the data have been received and processed, the EDI Center transmits these data to the State agencies.

Electronic data reporting also provides benefits to BLS and the States. First, since data are received in electronic form, key-entry is eliminated thus reducing collection

¹ Since tax reporting and the preparation of payrolls is often contracted out to service bureaus by employers, references in this booklet to employers (or firms) include service bureaus as well.

² Use of the terms "establishments", "worksites", and "reporting units" are synonymous throughout this document.

costs. Second, electronic data reporting often leads to more accurate data since manual transcription, that can potentially introduce data errors, has been eliminated. Finally, employers are usually able to provide electronic data more quickly, which allows for more timely information to be provided to users of economic data.

In short, electronic data reporting to the EDI Center provides employers with an efficient, low-cost method of submitting employment and payroll data while maintaining the high standards of quality and confidentiality expected from BLS.

1.2 Electronic Data Interchange (EDI)

In its most basic form, EDI is simply the transfer of information electronically from computer to computer. There are two major aspects of this transfer. The first is the *method*, and the second is the *format*. The information in this booklet will provide you with guidelines for creating and transmitting data in a "flat file format" to the EDI Center using the "direct" transmission method

The *method* of file transfer is called "direct" EDI, and involves the use of modems, phone lines, and appropriate communications software. Using this method, the file transfer occurs *directly* between the firm and BLS's computers. The firm dials a toll-free number, logs onto a bulletin board, and executes a file transfer. The EDI Center can accept most common high-speed communications protocols. In addition, the EDI Center can receive data 24 hours a day, offers toll-free file transmission, and Help Desk services. Firms may also transmit their data to BLS using standard File Transfer Protocol. To secure the data, BLS requests that the file be encrypted. See Chapter 6, Data Transmission Procedures, for additional details.

The *format* offered by the EDI Center uses a fixed record layout in a standard ASCII file, which is referred to as a "flat file format." This file can be created with most spreadsheet, database and word processing software packages. In the EDI industry, this type of format would be considered "proprietary" EDI, meaning simply that a format specific to one of the partners was adopted as the standard format.

1.3 The Electronic Data Reporting Booklet

This booklet is designed to facilitate and assist employers seeking to reduce their reporting burden. We have combined and standardized several aspects of the data reporting process to simplify your work. This edition of the booklet contains updates to data reporting file formats published prior to June 1998. **This edition, dated April 2002, contains the same record layouts as those published in the February 2001 and the June 1998 editions.** Sections 2.2 and 5.6 were added to discuss uses of the data and explain the use of worksite identification codes, respectively. BLS appreciates your commitment to these critical programs and we are constantly looking for ways to improve this process. If you have any suggestions or comments, please contact the EDI Center at the number listed below in Section 1.4.

1.4 Before you Begin

Contact the EDI Center before you begin programming and creating data files. This provides us with the opportunity to discuss situations that may be unique to your firm. When your firm is ready to begin reporting data, please notify the EDI Center in advance. Also, to ensure that the electronic or magnetic media reporting of data is accurate, one or two test transmissions may be required prior to discontinuing your current method of reporting.

You may submit your data on various media. The EDI Center will assist with your creation of a test cartridge, tape, diskette, or CD. If you need any additional information, please contact the EDI Center Manager toll free at 1-800-861-3804 or via the Internet at **EDICTR-CHI@bls.gov**.

1.5 Where to Start: MWR

BLS currently offers EDI for the two programs, mentioned above. It is both logical and cost-effective to begin by converting firms participating in the MWR to EDI first, and then convert firms participating in the CES program to EDI. In this way, we can insure the maximum level of consistency and coordination.

1.6 Professional Employee Organizations (PEOs) and Payroll Provider Firms (PPFs)

Separate record layouts have been specifically developed for employee leasing companies, currently known as professional employer organizations (PEOs) and for businesses that provide payroll operations, currently known as payroll provider firms (PPFs), for businesses that outsource their payroll operations. Although the record layouts are very similar to the MWR layout described within this booklet, the differences necessitate that a PEO or PPF contact the EDI Center in Chicago to receive the proper MWR reporting file layout. The unique nature of the PEO and PPF reporting require additional data elements not identified on the MWR file format described in Appendix B of this booklet.

1.7 Required Overlap Period

Ongoing data quality is of utmost importance to BLS. Therefore we <u>require</u> an overlap period which allows both programs to carefully match your previously reported data with your new EDI reported data. This will further allow us to insure the continuity of our data series.

For the MWR, we require a minimum of 1 quarter overlap period. For the CES, we require a minimum of 3 months overlap. If we have substantial data quality issues, we reserve the right to extend the overlap period.

Chapter 2 - Data Accuracy, Confidentiality and Security

Data accuracy, confidentiality, and security are of the utmost importance to BLS and its CES and MWR programs. This chapter contains important information regarding these issues.

2.1 Data Accuracy

The accuracy of the submitted data is of the utmost importance to BLS. Also, BLS' approach to EDI emphasizes *building in* data quality so that the first transmitted files meet BLS data definition requirements and that every subsequent file is accurate. This approach minimizes revisions to the data file contents.

Please closely review the remaining chapters in this booklet to ensure that your data meet the CES and MWR data specifications. It is **imperative** that you review each data item with the EDI Center staff (see Section 1.4) before programming begins. We believe that this up-front investment will reap large returns in the long run.

If the EDI Center determines that the quality of the data being submitted does not sufficiently meet the program requirements, BLS will notify the firm and discuss alternatives to remedy the situation. If these issues cannot be resolved, the EDI Center may notify the firm that it will no longer be able to process the electronic file.

Reference Period

For accurate and consistent data, the proper reference period is the pay period that includes the **12th of the month**, regardless of the firm's payroll frequency or pay date. Employers should report their employment data for all full-time and part-time employees who worked during or received pay for the payroll (pay) period that includes the 12th of the month. The reporting of other CES data items such as payroll, hours, commissions, and overtime hours should also be reported for the same reference period.

2.2 Uses of the data

Both the CES and MWR programs publish statistics on our nation's employment and earnings.

CES – Collected monthly, the CES program uses a sample of about 300,000 establishments to provide current estimates of monthly nonfarm employment, average weekly hours, and average hourly and weekly earnings. CES data are very timely and are published the first Friday of the month following the reference period. As such, they are one of the earliest indicators released regarding current economic

conditions. Data are published for the nation, States, and most large metropolitan areas.

MWR – The MWR covers about 98 percent of all nonfarm employees and 99 percent of those in the private nonfarm sector. Collected quarterly, the MWR program is a comprehensive and accurate source of monthly employment and quarterly gross wage data, by industry, at the national, State, and county levels.

2.3 Data Confidentiality

To maintain data confidentiality, BLS published data are industry aggregates which are designed to prevent identification of individual firms. Data collected or maintained by, or under the auspices of, BLS under a pledge of confidentiality shall be treated in a manner that will assure that individually identifiable data will be used only for statistical purposes and will be accessible only to authorized persons.

Pre-release economic series data prepared for release to the public will not be disclosed or used in an unauthorized manner before they have been cleared for release, and will be accessible only to authorized persons.

For more information on the BLS policy on data confidentiality, the EDI Center will provide the Commissioner's Order 3-93, "Confidential Nature of BLS Records" upon request.

CES

Data collected by the CES program and the State agencies are kept strictly confidential and are used for statistical purposes only and will hold the information in confidence to the full extent permitted by law.

MWR

All information collected by the MWR program is kept strictly confidential by BLS and is used for statistical purposes only. The various State agencies cooperating in the MWR program use these data for statistical and Unemployment Insurance program purposes and hold the data confidential to the extent allowed under their respective State laws. Detailed descriptions of State-specific confidentiality policies and uses of these data will be provided to your firm on an annual basis and are also available upon request.

2.4 Security

To ensure security during the electronic transmission process, you will be required to enter a user name and password when you logon to the BLS electronic data reporting system. To ensure security within your firm, you should provide your user name and password ONLY to personnel authorized to transmit the file.

name and	LS, only specific password is received data reporting	quired to ac	cess the inf	ormation co	ontained in the	ndata. A

Chapter 3 - Standardized Reporting Procedures

The CES and the MWR programs collect 17 data elements that are common to both programs. BLS has standardized these common data elements and their associated field specifications and descriptions. These data elements were then incorporated into two new standardized flat file formats of equal length.

Each CES and MWR file format begins with the 17 common data elements and are 350 characters long; the first 152 characters in both file formats are exactly the same. The remaining characters in each file format contain the data elements that are unique to each program.

These standardized layouts are designed to reduce your start-up programming costs and should substantially simplify the process for creating these files. Field specifications and detailed data element descriptions for these standardized flat file formats are contained in Appendix A for the CES program and Appendix B for the MWR.

3.1 Types of Data Elements

Each data element is categorized by one of three types based on how critical the data element is for processing and on the likelihood of the element being available to the employer. The three categories are as follows:

Required -- A data element without which BLS cannot process the data received. It is imperative that the "required" elements are provided with each live submittal and that they are accurate. Failure to provide accurate "required" elements may result in the loss of EDI participation until BLS is assured of compliance.³

Conditional -- (For CES program only) A data element that is required depending on whether another related data element is reported. For example, if you report payroll and/or hours data, then **either** the *Start* and *End of Pay Period*, **or** the *Length of Pay Period* Code is required.

Optional -- A data element that is not essential for processing but is important for maintaining accurate and up-to-date employer information. Please include all *optional* data elements if they are available.

³ We understand that not *all* payroll systems may be able to produce this data element. If you are not able to produce this particular element, *we can still use your report*. If you find you cannot produce this data element please contact the EDI Center for advice on how to proceed.

3.2 Establishments and Reporting Levels

Establishments

Firms are organized differently and the definition of an establishment may vary from firm to firm. BLS defines an *establishment* as an economic unit that produces goods or services, usually at a single physical location, and is engaged in one or predominantly one activity.

Reporting Levels

BLS prefers data to be reported at the establishment level. This reporting level allows each location to be included in the proper geographical area.

For each program (CES or MWR), the employer should generate a data record in the standardized flat file format for each establishment (or each payroll frequency for CES) and transmit all available data records for that program in a single transmission to the EDI Center. If reporting for more than one program, repeat the above procedure and transmit all available data records for that program in a separate transmission

3.3 Business Identification Information

To identify each individual establishment of your business, State agencies have assigned a unique reporting unit number (RUN) to each of your establishments. This number, when combined with your State-specific UI account number, creates the "key field" to uniquely identify each establishment.

In addition to UI and RUN, both the CES and the MWR programs collect two other items of business identification: a 9-digit Employer Identification Number (EIN) assigned by the Internal Revenue Service, and the trade name. The trade name is the division or subsidiary name of the establishment. "Mom's Restaurant" is an example of a trade name of ABC Enterprises.

3.4 Unemployment Insurance (UI) Account Number Configuration

To avoid potential reporting discrepancies caused by incorrect UI account number configurations, the EDI Center staff will assist you in establishing the proper configuration, for each State, **prior** to the test submittal.

A UI account number is assigned to each employer by the tax division within the State. This number is not always in the same structure or length as that used by BLS. These UI account numbers are alpha/numeric and should not contain hyphens or other punctuation. UI account number configurations vary from State to State. It is

possible that the UI account number configurations stored in an employer's system may not match the configurations required for transmittal to the EDI Center.

For example, the UI account numbers may contain leading zeros or a hyphen followed by another digit (usually a check digit), while a State research division's modified UI account number does not contain this additional information. Thus, there may be some variation in the configuration of the UI account number between the Quarterly Contribution Report, other documents received from State agencies, and the MWR.

3.5 Reporting Unit Numbers (RUNs)

The Reporting Unit Number (RUN) is a 5-digit number that is used in conjunction with the UI account number to uniquely identify a reported establishment at its' address. For BLS to process these data, employers are asked to store each 5-digit reporting unit number assigned to each establishment and include them with the data submitted. If you are unsure of which RUN is assigned to each business location, the EDI Center staff will gladly assist you in determining the correct RUN. See also Section 5.6 if your accounting/payroll system contains worksite identification codes that uniquely identify each worksite at a physical location.

The RUN is not a required data element for each subsequent data submittal. The EDI Staff will have the existing RUNs catalogued into their database and any new locations where establishments are reported will be assigned a new RUN by the staff.

For new locations, please insert a comment code of 85 (new establishment or worksite) in the primary comment code field for that new record. This comment code assists with the identification newly reported locations. See Section 3.6.

3.6 Comment Codes

Three comment code fields (one primary and two secondary codes) have been provided in the standardized file formats of both programs. Comment codes should be used by the employer to explain any unusual changes in the economic data if they differ substantially from that previously reported.

For example, a comment code of 85 should be used to help identify new or previously unreported establishments and a comment code of 86 should be used to help identify **permanently closed** establishments. Appendix E contains a complete list of comment codes that can be used with both programs. EDI Center staff will gladly assist you in explaining the proper use of these codes.

3.7 Earlier File Formats Accepted

For those employers already using an earlier agreed upon file format --such as the prior 350 character format or a 310 character format for the MWR or the 276 character format for the CES-- the EDI Center will continue to accept these formats.

Chapter 4 - CES Reporting Procedures

This chapter contains specific procedures for CES reporting only. If you are reporting only for the MWR, you may skip this chapter and go directly to Chapter 5, MWR Reporting Procedures.

4.1 Creating the CES Standardized File

To create the CES standardized file, you need to create an ASCII text file, 350 characters long, containing a total of 35 fields (data elements). The first 17 fields are common to both the CES and MWR programs. The remaining 18 fields are unique to the CES program and contain economic data such as employment, payroll, and hours, and certain business identification information. See Appendix A for the CES standardized file format layout.

4.2 CES Reporting Level

As stated earlier (in Section 3.2), BLS prefers data to be reported at the establishment level. Because establishments in many organizations are not necessarily uniquely distinguished using the UI account number and the Reporting Unit Number, the CES program needs additional coding to uniquely identify the establishments. To accommodate different firms' organizational structures, the CES file format contains three codes, which can help, identify three possible levels of organization: the **Division**, **Establishment**, and **Sub-establishment** codes. Although CES requests information at the establishment level, you may report at the division or sub-establishment level if your records permit reporting only at these levels. The three organizational levels are defined below.

<u>Division Code</u> -- The *division code* is used to identify any higher organizational level above the establishment level as defined above. For example, you may have a division comprised of a group of establishments engaged in a similar type of production, or a county or Statewide division, or an entire subsidiary as a division, etc.

Establishment Code -- If your employment, payroll and hours data are maintained at the establishment level, please report for each establishment in a separate data record and include your *establishment code* for each unit. The *establishment code* may be any alpha or numeric string that uniquely identifies the establishment. For example, many firms assign a unique store number to each unit. The *establishment code* is <u>required</u> when reporting at the establishment or sub-establishment level. (See Section 4.3 for more information on payroll frequency.)

<u>Sub-establishment Code</u> -- If your employment, payroll and hours data are maintained at the sub-establishment level (e.g., any smaller unit or section such as sales, marketing, or different payrolls, etc.), please report for each sub-establishment and include your *sub-establishment code* on each data record. Also, if you have employees paid at different payroll frequencies (e.g., some weekly and some biweekly) and maintain separate payroll information for each payroll frequency, report each payroll in a separate data record, entering the appropriate *sub-establishment code* for each payroll.

When reporting at the sub-establishment level, you MUST include the *establishment code* so that the sub-establishments can be aggregated into establishments. The *sub-establishment code* is <u>required</u> if you are reporting at the sub-establishment level.

Example:

The XYZ Corporation is divided into several divisions. The XYZ Corp. is reporting for **Unit 24** which is located in the **Eastern** division. Unit 24 maintains two separate payrolls for its non-supervisory employees -- a **weekly** and a **monthly** payroll. To report for two separate payrolls, the XYZ Corp. must generate a single record for each payroll frequency.

On the first record, the reporting level should be as follows:

Division Code: Eastern
Establishment Code: Unit 24
Sub-establishment Code: Weekly

and on the second record:

Division Code: Eastern
Establishment Code: Unit 24
Sub-establishment Code: Monthly

If Unit 24 is unique across all divisions, then the Division Code would not be required. The three reporting level codes above are the firm's internal codes. They may be alpha or numeric. It is important that they be consistently reported from month to month in order for us to accurately process your data. If your internal code structure changes, please let us know immediately.

4.3 Payroll Frequency

Payroll frequency varies across firms. For example, some firms pay their employees weekly, while others pay monthly. Most large multi-unit establishments have multiple pay frequencies. If you have multiple payroll frequencies, you should report each frequency as a separate data record rather than aggregating them into a single

frequency. The CES standard file format accommodates separate reporting of each payroll frequency.

4.4 CES Data Items by Industry

The CES data items that you will include in the data records will depend on the specific industry of each establishment unit within your firm. The CES data items for each industry are included in the following table. "X" indicates the data items collected in each industry.

Data Items by Industry

	Industry					
Data Items	Construction	Manufacturing	Mining	Services*	Trade	Gov't**
All Employees	X	X	Х	Х	Х	Х
Women Employees	X	X	Х	Х	Х	Х
Construction Workers	X					
Construction Worker Payroll	X					
Construction Worker Hours	×					
Production Workers		Х	Х			
Production Worker Payroll		Х	Х			
Production Worker Hours		Х	Х			
Production Worker Overtime Hours		Х				
Non-Supervisory Employees				Х	Х	
Non-Supervisory Employee Payroll				Х	Х	
Non-Supervisory Employee Hours				Х	Х	
Commissions of Non-Supervisory Employees					х	

^{*} Includes industries such as transportation, public utilities, finance, insurance, and real estate.

^{**} Government except public education.

The definition of *payroll* is the same across all industries, with the only distinction being that CES collects payroll data for different categories of employees, depending on the firm's industry. For example, CES collects payroll for *Production Workers* in the manufacturing and mining industries, whereas in the services industry, it collects payroll for *Non-Supervisory Employees*.

The CES data items are defined in greater detail in Appendices A and C. If you cannot provide these data as defined, please let us know and appropriate adjustments may be made.

4.5 Transmittal Due Dates

The CES survey involves collection, estimation, and publication of time-critical economic information on a monthly basis. On the first Friday of each month, BLS must publish the employment estimates for the previous month. In order to meet this strict deadline, BLS needs to receive the CES information from firms as soon as they are available.

Any transmission, which does not meet the initial deadline, will be used, as CES publishes revised estimates at designated intervals following the initial release. So it is important that all transmissions be sent as soon as the data are available.

Timely transmission will depend on several factors, one of which is the firm's payroll frequency. For example, a firm's transmission comprised of reports from multiple establishment locations with different payroll frequencies could be delayed if an establishment cannot meet the deadline. Employers should provide as much information as possible prior to the deadline, rather than waiting for a late establishment report. The late establishment report can be transmitted as soon as it is available.

The EDI Center will provide the firm with the exact transmission date for each month.

Chapter 5 - MWR Reporting Procedures

This chapter contains specific procedures for MWR reporting only. If you are reporting only for the CES program, you may skip this chapter and go directly to Chapter 6, Data Transmittal Procedures.

Please review Chapter 3, Standardized Reporting Procedures, especially the sections describing use of Unemployment Insurance account numbers and Reporting Unit Numbers. The inclusion of these numbers is crucial when reporting MWR data.

5.1 Creating the MWR Standardized File

To create the MWR standardized file, you need to create an ASCII text file, 350 characters long, containing a total of 26 fields (data elements). The first 17 fields are common to both the CES and MWR programs. The remaining 9 fields are unique to the MWR program and contain economic data such as monthly employment, quarterly wages, and certain business identification information. See Appendix B for the MWR's standardized file format layout.

5.2 Worksite Information

BLS requests that, when transmitting your MWR data to the EDI Center, worksite information that is specific to a worksite be provided. The trade name of the worksite, the legal name of the business, a worksite description, and a establishment identification code assist in identifying the individual worksite within your firm:

Trade name – (required element) - This is the division or subsidiary name of the establishment. "Mom's Restaurant" is an example of a trade name of ABC Enterprises (legal name). Positions 30-64 of the file layout.

Legal name – (required element) - The legal or corporate name of the establishment. For example, "ABC Enterprises" or "Smith Companies, Inc." Positions 154-188 of the file layout.

Worksite description field - A meaningful, unique description of the establishment, such as a store number, unit number, or plant name (e.g., Store 101, Unit # 1812, or Jones River Plant). Positions 189-223 of the file layout.

Worksite identification code – An alpha/numeric code that uniquely identifies the establishment at its' address. This code is usually maintained in the company's

internal accounting/payroll systems. Positions 302-322 of the file layout. See Section 5.6.

5.3 Monthly Employment

The monthly employment reported for each location (worksite) on the MWR should be a count of all full- and part-time workers who worked during or received pay (subject to Unemployment Insurance wages) for the pay period which includes the 12th day of the month. The count should be unduplicated, so that for the reference period in any month, an employee should be counted only once. The summed employment for all worksites reported on the MWR should equal the employment total reported on the State Quarterly Contribution Report.

5.4 Quarterly Wages

Total (quarterly) wages, sometimes called gross wages or simply wages, are the total amount of wages paid or payable (depending on the wording of the State law) to workers covered by State Unemployment Insurance laws for services performed during the quarter. The summed wages paid to workers for all worksites reported on the MWR should equal that amount of wages reported on the State Quarterly Contribution Report. When you have any questions as to include or exclude some form of payment that may be considered as wages, follow the same procedure that you used to determine its wage status when you file the State Quarterly Contribution Report.

5.5 Providing Comments on Data Changes

Space is provided within the record layout to explain any large changes in employment or wages due to store closure, layoffs, bonuses, seasonal changes, etc. If any units are being reported for the first time, following the expansion of operations or the purchase of units from another firm, please provide a description of the business activity(s) that will be conducted at each new establishment. This will assist BLS in assigning industrial classification codes to the new unit(s). In addition, if units were purchased from another firm, please provide the name of the firm, the effective date of the transaction, and the UI number of the seller, if known. If units have been sold to another firm, please provide the name of the firm, the effective date of the transaction, and the UI number of the purchaser, if known.

5.6 Worksite Identification Code

Many businnesses maintain internal accounting/payroll codes that are **unique** to each worksite and its' location. By including this information for each worksite, the EDI

Center can assist you with your set-up for electronic reporting. If a reporter is able to provide this information and include it with each submission (positions 302-322 of the MWR layout), there is no need to also provide the Reporting Unit Number (RUN) which is generally the most difficult data element for a reporter to assign and maintain. Good physical location address information is required for each worksite in addition to the identification code. The EDI Center will assign the appropriate RUN to each record based on the physical location address and identification code and develop a "crosswalk" to match future data submittals using the worksite identification code as the source for assigning the RUN and reporting to States.

5.7 Transmittal Due Dates

Multiple Worksite Reports should be transmitted to the EDI Center in Chicago on or before the last day of the month following the end of the quarter. For example, data for the January-March period must be submitted by April 30th.

Chapter 6 - Data Transmittal Procedures

The CES and MWR programs have established a central EDI Center to receive data from large multiple-establishment firms. As your firm's representative, you will create files of data in CES and/or MWR standardized formats. While electronic data reporting is preferred, the EDI Center can accept data files on magnetic media such as cartridge, tape, or diskette.

When your firm is ready to begin reporting data to the EDI Center, please notify the EDI Center in advance so that we can prepare for its receipt. If you wish to submit your data on magnetic medium, such as cartridge, tape, or diskette, the EDI Center will also assist in the creation of a test transmittal and provide additional instructions, if necessary. Once you are ready to submit your data, or if you need any additional information, please contact the EDI Center (see Section 1.4).

6.1 Electronic Transmission

The EDI Center has established a Bulletin Board System (BBS) called "EUS Online" (Employment and Unemployment Statistics) to enable you to transmit your data, via toll-free telephone lines. This BBS system is for transmitting flat files only.

To access "EUS Online," you will need a computer, a modem, telecommunications software, and a telephone line. Just about any asynchronous telecommunications client software package that supports ANSI terminal emulation can be used (such as ProComm, Smartcom, QuickLink, Qmodem and PCTalk).

BLS provides the procedures and telephone numbers for accessing "EUS Online" and transmitting reports in a separate document. Since "EUS Online" is a secure system, BLS will also provide a *username* and *password*. In addition, BLS provides Help Desk support via a toll-free telephone number.

The EDI Center also offers secure File Transfer Protocol (FTP), as a data reporting method. For requirements on using FTP, please contact the EDI Center.

6.2 Media Transmission

Employers wishing to transmit their data via magnetic medium should also include with their transmittal a Magnetic Medium Transmittal form (SO-289) available from the EDI Center. Data files submitted via magnetic tape should be in ASCII or EBCDIC format using standard IBM labels. Tapes are recommended to be 6250 BPI with a blocksize of 23450 (the blocksize for a 350-character record). The EDI Center can process only 3480 compatible cartridges and 3.5" diskettes.

All data contained on tape, cartridge, or diskette will be purged immediately following its input into the EDI Center's processing system. The EDI Center will not return cartridges, tapes, or diskettes unless specifically requested to do so.

Appendix A - CES File Format

Shaded data elements are common to both CES and MWR.

Note: Round to the nearest dollar or hour; do <u>not</u> include decimals or fractions in fields containing dollars or hours.

CES Data Elements

Position	Data Element	Length	Data Specification
1-2	Program Code	2	Required. A 2-digit program code indicating the type of data being reported. 01 = CES 02 = MWR
3	Record Type	1	Required. A 1-digit number indicating the record format is Y2K compliant. Enter "2".
4-5	Reference State	2	Required. The 2-digit State FIPS code indicating the location of the establishment. (See Appendix D for a list of FIPS codes).
6-15	UI Account Number	10	Required. The Unemployment Insurance (UI) account number assigned to the employer by the State. Right justify, zero fill.
16-20	Reporting Unit Number	5	Optional. The number assigned by the State to distinguish between records with the same UI account number. Right justify, zero fill. If the RUN numbers are not known, zero fill. The EDI Center will assist in assigning the correct RUNs.
21-29	Employer Identification Number (EIN)	9	Required. The 9-digit EIN assigned to the employer by the Internal Revenue Service (IRS). Numeric, right justified. If EIN is unknown, zero fill.
30-64	Trade Name	35	Required. The division or subsidiary name of the establishment. "Mom's Restaurant" is an example of a trade name of ABC Enterprises. Left justify, blank fill.

Position	Data Element	Length	Data Specification
65-99	Street Address	35	Required. The physical street address of the establishment. Abbreviate as necessary in accordance with the U.S. Postal Service's National Zip Code and Postal Service Directory. Left justify, blank fill.
100-129	City	30	Required. The city of the establishment. Left justify, blank fill.
130-131	State	2	Required. The standard 2-letter Postal Service State abbreviation for the establishment. (See Appendix D).
132-136	Zip Code	5	Required. The 5-digit Zip Code used by the Postal Service for the establishment.
137-140	Expanded Zip Code	4	Optional. The 4-digit expanded Zip Code used by the Postal Service for the establishment. If not used, zero fill.
141-142	Delivery Point Barcode	2	Optional. The 2-digit delivery point Barcode used by the Postal Service for the establishment. If not used, zero fill.
143-144	Primary Comment Code	2	Optional. Enter one of the standard 2-digit comment codes from Appendix E if data values differ substantially from previously reported data. If not used, blank fill.
145-146	Secondary Comment Code	2	Optional. Enter one of the standard 2-digit comment codes from Appendix E if data values differ substantially from previously reported data. If not used, blank fill.
147-148	Third Comment Code	2	Optional. Enter one of the standard 2-digit comment codes from Appendix E if data values differ substantially from previously reported data. If not used, blank fill.
149-152	Reference Year	4	Required. Enter the four digits of the calendar year covered by the report.
153-154	Reference Month	2	Required. The 2-digit number indicating the reference month for the report. For example, enter "01" for January.
155-164	Firm Code	10	Required. The 10-digit Firm Code assigned to your firm by the EDI Center.

Position	Data Element	Length	Data Specification
165-174	Division Code	10	Conditional. Your firm accounting code (1-10 alphanumeric characters) that identifies the division. The code is required only if it is needed to uniquely identify each establishment or your records permit reporting only at the division level. (See Section 4.2.) Left justify, blank fill.
175-184	Establishment Code	10	Conditional. Your firm accounting code (1-10 alphanumeric characters) that identifies the establishment. The code is required unless you are reporting only at the division level. (See Section 4.2.) Left justify, blank fill.
185-189	Sub- establishment Code	5	Conditional. Your firm accounting code (1-5 alphanumeric characters) that identifies the subestablishment. The code is required only if reporting at the sub-establishment level. (See Section 4.2.) Left justify, blank fill.
190-197	Start Date of Payroll Period	8	Conditional. The beginning date of the report. Format must be 'yyyymmdd'. For example, a payroll period that begins on January 10, 2002 would be '20020110'. This field is required only if payroll and/or hours data are reported and <i>Length of Payroll Period Code</i> cannot be provided. If not used, blank fill.
198-205	End Date of Payroll Period	8	Conditional. The ending date of the report. Format must be 'yyyymmdd'. For example, a payroll period that ends on January 17, 2002 would be '20020117'. This field is required only if payroll and/or hours data are reported and <i>Length of Payroll Period Code</i> cannot be provided. If not used, blank fill.

Position	Data Element	Length	Data Specification
206	Length of Payroll Period Code	1	Conditional. The 1-digit code that describes the length of the payroll period for the report. Enter '1' for Weekly payroll, '2' for Bi-Weekly payroll, '3' for Semi-Monthly payroll or '4' for Monthly payroll. This field is required only if payroll and/or hours data are reported and the <i>Start</i> and <i>End Dates of Payroll Period</i> are not provided. If not used, blank fill.
207-213	All Employees	7	Required. The number of all paid, full- and part-time employees who worked during or received pay for the pay period which includes the 12th of the month . Right-justify, zero fill.
214-220	Women Employees	7	Required. The number of All Employees who are women ¹ . Right-justify, zero fill. If not reported, blank fill.
221-227	Production Workers, Construction Workers, or Non- Supervisory Employees	7	Required. The number of All Employees who are Production Workers, Construction Workers, or Non-Supervisory Employees ¹ . Right-justify, zero fill. If not reported, blank fill.
228-235	Production Worker, Construction Worker, or Non- Supervisory Employee Payroll	8	Required. The total payroll, including overtime and excluding commissions and lump sum payments, for Production Workers, Construction Workers, or Non-Supervisory Employees, for the pay period which includes the 12th of the month ¹ . (Omit cents) . Right justify, zero fill. If not reported, blank fill.

Position	Data Element	Length	Data Specification
236-242	Production Worker, Construction Worker, or Non- Supervisory Employee Hours	7	Required. The total hours paid, including overtime hours, for Production Workers, Construction Workers, or Non-Supervisory Employees, for the pay period which includes the 12th of the month¹. (Omit fractions). Right justify, zero fill. If not reported, blank fill.
243-249	Production Worker Overtime Hours	7	Required. (Manufacturing only). The total Production Worker overtime hours paid for the pay period, which includes the 12th of the month ¹ . (Omit fractions). Right justify, zero fill. If not reported, blank fill.
250-256	Commissions of Non- Supervisory Employees	7	Required. (Trade only). The total commissions earned by Non-Supervisory Employees for the pay period, which includes the 12th of the month ¹ . (Omit cents). Right justify, zero fill. If not reported, blank fill.
257-264	Start Date of Non- Supervisory Employee Commissions Pay Period	8	Conditional. The beginning date of the reported commissions data. Format must be 'yyyymmdd'. For example, a pay period that begins on January 10, 2002 would be '20020110'. This field is required only if commissions are reported and the <i>Length of Commissions Pay Period Code</i> cannot be provided. If not used, blank fill.
265-272	End Date of Non- Supervisory Employee Commissions Pay Period	8	Conditional. The ending date of the reported commissions data. Format must be 'yyyymmdd'. For example, a pay period that ends on January 17, 2002 would be '20020117'. This field is required only if commissions are reported and the <i>Length of Commissions Pay Period Code</i> cannot be provided. If not used, blank fill.

We are described as a fill of the fill

¹ We understand that not *all* payroll systems may be able to produce this data element. If you are not able to produce this particular element, *we can still use your report*. If you find you cannot produce this data element please contact the EDI Center for advice on how to proceed.

Position	Data Element	Length	Data Specification
273	Length of Non- Supervisory Employee Commissions Pay Period Code	1	Conditional. The 1-digit code that describes the length of the pay period for the reported commissions data. Enter '1' for Weekly payroll, '2' for Bi-Weekly payroll, '3' for Semi-Monthly payroll or '4' for Monthly payroll. This field is required only if commissions are reported and the <i>Start</i> and <i>End Dates of Commissions Pay Period</i> are not provided. If not used, blank fill.
274-301	Blank	28	For future use. Blank fill.
302-322	Worksite Identification Code	21	Optional. Alpha/numeric indicator that uniquely identifies the business at this physical location. This code should not be duplicated within the State for this location. Left justify, blank fill. If unknown, blank fill.
323-350	Blank	28	For future use. Blank fill.

Appendix B - MWR File Format

Shaded data elements are common to both CES and MWR.

Note: Round to the nearest dollar; do <u>not</u> include decimals or fractions in fields containing dollars.

MWR Data Elements

Position	Data Element	Length	Data Specification
1-2	Program Code	2	Required. A 2-digit program code indicating the type of data being reported. 01 = CES 02 = MWR
3	Record Type	1	Required. A 1-digit number indicating the record format is Y2K compliant. Enter "2".
4-5	Reference State	2	Required. The 2-digit State FIPS code indicating the location of the establishment. (See Appendix D for a list of FIPS codes).
6-15	UI Account Number	10	Required. The Unemployment Insurance (UI) account number assigned to the employer by the State. Right justify, zero fill.
16-20	Reporting Unit Number	5	Optional. The number assigned by the State to distinguish between records with the same UI account number. Right justify, zero fill. If the RUN numbers are not known, zero fill. The EDI Center will assist in assigning the correct RUN.
21-29	Employer Identification Number (EIN)	9	Required. The 9-digit EIN assigned to the employer by the Internal Revenue Service (IRS). Numeric, right justified. If EIN is unknown, zero fill.
30-64	Trade Name	35	Required. The division or subsidiary name of the establishment. "Mom's Restaurant" is an example of a trade name of ABC Enterprises. Left justify, blank fill.

MWR Data Elements (Cont.)

Position	Data Element	Length	Data Specification
65-99	Street Address	35	Required. The physical street address of the establishment. Abbreviate as necessary in accordance with the U.S. Postal Service's National Zip Code and Postal Service Directory. Left justify, blank fill.
100-129	City	30	Required. The city of the establishment. Left justify, blank fill.
130-131	State	2	Required. The standard 2-letter Postal Service State abbreviation for the establishment. (See Appendix D).
132-136	Zip Code	5	Required. The 5-digit Zip Code used by the Postal Service for the establishment.
137-140	Expanded Zip Code	4	Optional. The 4-digit expanded Zip Code used by the Postal Service for the establishment. If not used, zero fill.
141-142	Delivery Point Barcode	2	Optional. The 2-digit delivery point Barcode used by the Postal Service for the establishment. If not used, zero fill.
143-144	Primary Comment Code	2	Optional. Enter one of the standard 2-digit comment codes from Appendix E if data values differ substantially from previously reported data. If not used, blank fill.
145-146	Secondary Comment Code	2	Optional. Enter one of the standard 2-digit comment codes from Appendix E if data values differ substantially from previously reported data. If not used, blank fill.
147-148	Third Comment Code	2	Optional. Enter one of the standard 2-digit comment codes from Appendix E if data values differ substantially from previously reported data. If not used, blank fill.
149-152	Reference Year	4	Required. Enter the four digits of the calendar year covered by the report.
153	Reference Quarter	1	Required. The 1-digit number indicating the reference calendar quarter for the report. The calendar quarters are: 1 = January - March 2 = April - June 3 = July - September 4 = October - December

MWR Data Elements (Cont.)

Position	Data Element	Length	Data Specification
154-188	Legal Name	35	Required. The legal or corporate name of the establishment. For example "ABC Enterprises" or "Smith Companies, Inc." Left justify, blank fill.
189-223	Worksite Description	35	Required. Enter a meaningful, unique description of the establishment, such as store number or plant name (e.g., Store 101, Jones River Plant). Left justify, blank fill.
224-229	Month 1 Employment	6	Required. The number of all full- and part-time employees who worked during or received pay (subject to UI wages) for the pay period which includes the 12th of the month . The employment for all worksites should match the employment that is reported on that States' Quarterly Contribution Report. Right-justify, zero fill.
230-235	Month 2 Employment	6	Required. The number of all full- and part-time employees who worked during or received pay (subject to UI wages) for the pay period which includes the 12th of the month . The employment for all worksites should match the employment that is reported on that States' Quarterly Contribution Report. Right-justify, zero fill.
236-241	Month 3 Employment	6	Required. The number of all full- and part-time employees who worked during or received pay (subject to UI wages) for the pay period which includes the 12th of the month . The employment for all worksites should match the employment that is reported on that States' Quarterly Contribution Report. Right-justify, zero fill.
242-251	Quarterly Wages	10	Required. The total amount of wages (both taxable and non-taxable) paid to employees during the entire reference quarter that are subject to Unemployment Insurance taxes. The wages for all worksites should match the wages paid that are reported on that States' Quarterly Contribution Report. Must be numeric (no \$ signs or commas). Must be right-justified and filled with leading zeros. Round to the nearest dollar (Omit cents). If no wages were paid, zero fill.

MWR Data Elements (Cont.)

Position	Data Element	Length	Data Specification
252-301	Comments	50	Optional. Explain any large changes in employment or wages due to store closure, layoffs, bonuses, seasonal changes, etc. If any units of your firm are being reported for the first time following expansion of operations or purchase of units from another firm, please provide a description of the business activity(s) that will be conducted at each establishment. This will assist BLS in assigning industrial classification codes to the new unit(s). In addition, if units were purchased from another firm, please provide the name of the firm, the effective date of the transaction, and the UI number of the seller, if known. If units have been sold to another firm, please provide the name of the firm, the effective date of the transaction, and the UI number of the purchaser, if known. Left justify, blank fill.
302-322	Worksite Identification Code	21	Optional. Alpha/numeric indicator that uniquely identifies the business at this physical location. This code should not be duplicated within the State for this location. Left justify, blank fill. If unknown, blank fill.
323-350	Blank	28	For future use. Blank fill.

Appendix C - CES Data Item Definitions

All Employees

The number of all paid, full- and part-time employees who worked during or received pay for the pay period which includes the **12th of the month**. (See table at end of section for details.)

Women Employees

The number of workers from *All Employees* who are women.

Production Workers

The number of workers from *All Employees* who are production workers. *Production Workers* are applicable to **manufacturing and mining industries only**. (See table at end of section for details.)

Construction Workers

The number of workers from *All Employees* who are construction workers. *Construction Workers* are applicable to the **construction industry only**. (See table at end of section for details.)

Construction Workers must work at the site of construction, or in shops or yards at jobs ordinarily performed by members of the construction trade.

Non-Supervisory Employees

The number of workers from *All Employees* who are non-supervisory. *Non-Supervisory Employees* are applicable to the **services and trade industries only**. (See table at end of section for details.)

Payroll

The total gross amount paid during the entire pay period which includes the 12th of the month for *Production workers*, *Construction Workers* or *Non-Supervisory Employees* (omit cents). This total includes overtime pay and excludes lump sum payments. If commissions are included separately in columns 250-256, then commissions should be excluded from the payroll provided in columns 228-235. If commissions are not provided separately in columns 250-256, then commissions earned and paid each month should be included in columns 228-235. (See table at end of section for details.)

Payroll should be reported before employee deductions for:

• FICA (social security)

- unemployment insurance
- health insurance
- pensions
- pay deferral plans (401K plans)
- Federal, State and local income taxes
- bonds
- union dues

Commissions of Non-Supervisory Employees

The total amount of commissions (not base pay, drawing account or basic guarantees) earned by *Non-Supervisory Employees* for the entire commissions pay period which includes the **12th of the month** (omit cents). *Commissions* earned at frequencies longer than monthly are to be excluded (e.g., do not include quarterly or annual commissions). If commissions are included separately in columns 250-256, then commissions should be excluded from the payroll provided in columns 228-235. If commissions are not provided separately in columns 250-256, then commissions earned and paid each month should be included in columns 228-235.

Hours

The total number of hours paid, **including overtime**, for the pay period which includes the **12th of the month** for *Production Workers*, *Construction Workers* or *Non-Supervisory Employees* (omit fractions).

Do not convert overtime or other premium hours to straight-time equivalent hours. Hours paid is the sum of:

- Hours worked, including overtime
- Hours paid for stand-by or reporting time
- Hours not worked, but for which pay was received directly from the firm. Included are holidays, vacations, sick leave or other paid leave.

Production Worker Overtime Hours

The total number of overtime hours paid to *Production Workers* during the pay period which includes the **12th of the month** (omit fractions). *Production Worker Overtime Hours* are applicable to the **manufacturing industry only**. (See table at end of section for details.)

Production Worker Overtime Hours constitute premium hours paid because the hours were in excess of the regularly scheduled hours. These hours are also included in Hours above.

CES Data Items - Include/Exclude

All Employees	Include	 salaried officials of corporations executives and their st elected officials appointed officials part-time employees 	 persons on paid vacation persons on paid sick leave persons on other paid leave trainees
	Exclude	 proprietors pensioners unpaid family workers persons on leave without pay the entire pay period persons on strike the entire pay period outside contractors and their employees armed forces personnel on active duty the entire pay period non-office real estate sales agents working solely for commissions institution inmates partners of unincorporated firms. employees of the state and local school system
