U.S. DEPARTMENT OF AGRICULTURE FOREST SERVICE

SPECIFICATION

PAD, SLEEPING

This amendment forms part of Forest Service specification 5100-522A, dated March 1991.

PAGE 2

- 2.2: Add: "D 412 Test Methods for Rubber Properties in Tension
 D 624 Test Method for Rubber Property--Tear Resistance".
- 3.1: Delete in its entirety and substitute:
 - "3.1 <u>First article</u>. Unless otherwise specified (see 6.2), the contractor shall furnish three full size samples in both 3/8 inch and 1/8 inch thicknesses for first article testing in accordance with 4.3."

Add the following new paragraph:

- "3.1.1 <u>Preparing first article test samples</u>. One sleeping pad of each required thickness shall be cut into 12 test samples measuring 11 inches wide by 12 inches long. The 24 test samples (12 of each thickness) shall be packed flat in a box of sufficient strength to ensure the samples are not compressed during shipment to the testing facility."
- 3.2.2: Delete in its entirety and substitute:

"Pad dimensions. The pad shall be $3/8 \pm 1/32$ inch thick, 22 inches $\pm 1/4$ inch wide, and 73 inches $\pm 1/2$ inch long."

PAGE 3

Table I: Under tensile strength requirements delete "45" and add "35".

5100-522A AMENDMENT 1

PAGE 5

Delete Table II in its entirety and substitute:

TABLE II. End item test

Characteristics	Specification Requirement	Reference Test Method	_
Material identification Tensile strength, psi, min	3.2.3	<u>1</u> / ASTM D 412, Die "A"2,	,
Elongation, % min	3.2.3	ASTM D 412, Die "A" <u>2</u> ,	•
Tear resistance, lbs/inch, min Density, lbs/cu ft, max	n 3.2.3 3.2.3	ASTM D 624, Die "C" ASTM D 3575	
Shrinkage, % max Compression deflection	3.2.3	4.4.3.1	
@ 10 psi, % max	3.2.3	ASTM D 3575	
@ 30 psi, % max Compression set	3.2.3	ASTM D 3575	
22 hrs @ 73 <u>+</u> 4 ^o F, % max	3.2.3	ASTM D 3575	
22 hrs @ 0 ^O F, % max Water absorption, % max	3.2.3 3.2.3	ASTM D 3575 ASTM D 1056	
Cell size, inch max	3.2.3	ASTM D 3576	

^{1/} The certification shall include material identification data.

PAGE 7

Delete 4.4.3.2 in its entirety.

 $[\]underline{2}/$ Tensile and elongation testing shall be performed using 1/8 inch thick pad material; all other testing shall be with the 3/8 inch thick material."
