

# Controlled Foreign Corporations, 2000

by Lee Mahony and Jason Wenrich

For Tax Year 2000, the 7,500 largest foreign corporations controlled by large U.S. multinational corporations held \$4.4 trillion in assets and reported receipts of \$2.2 trillion. These amounts increased from Tax Year 1998 by 35.6 percent and 23.3 percent, respectively [1]. The 7,500 largest foreign corporations paid \$43.1 billion in income taxes on \$207.6 billion in earnings and profits (less deficit) before income taxes. These amounts are 24.2 percent and 44.3 percent increases from Tax Year 1998, respectively.

Almost 78 percent, or 5,849, of the 7,500 largest controlled foreign corporations (CFC's) were concentrated in three major industrial sectors: goods production, services, and finance, insurance, real estate, and rental and leasing. These three industrial sectors accounted for 84.5 percent of assets (\$3,688.7 billion), 70.6 percent of total receipts (\$1,522.9 billion), 69.0 percent of income taxes (\$29.8 billion), and 79.0 percent of earnings and profits (less deficit) before income taxes (\$164.0 billion).

For Tax Year 2000, the 7,500 largest CFC's were incorporated in 107 different countries [2]. Almost 53 percent, or 3,951 CFC's, were incorporated in Europe. More than 92 percent of these European CFC's were based in European Union countries. Latin America and Asia accounted for 16.5 percent and 11.1 percent of the 7,500 largest CFC's, respectively.

## Controlled Foreign Corporations

Direct foreign investment by U.S. persons may take several forms, including establishing foreign branches, partnerships with foreign entities, and separate corporations. For U.S. income tax purposes, a foreign corporation is "controlled" if U.S. shareholders own more than 50 percent of its outstanding voting stock, or more than 50 percent of the value of all its outstanding stock (directly, indirectly, or constructively) on any day during the foreign corporation's tax year. A "noncontrolled" foreign corporation is any foreign corporation that fails to meet either of the above requirements for control.

*Lee Mahony and Jason Wenrich are economists with the Special Studies Returns Analysis Section. This article was prepared under the direction of Chris Carson, Chief.*

For purposes of determining control, a U.S. shareholder is defined as a U.S. person who owns 10 percent or more of the foreign corporation's total combined voting stock [3]. However, for SOI purposes, a foreign corporation is controlled only if one U.S. corporation satisfies either of the above 50-percent ownership requirements for an uninterrupted period of at least 30 days during the foreign corporation's tax year. For Tax Year 2000, there were 1,087 U.S. corporations that controlled the 7,500 largest CFC's.

In general, the foreign source income of a foreign corporation is not taxable to the U.S. shareholders until repatriated in the form of a dividend. Recognizing that income could be accumulated in a CFC, thus deferring U.S. tax on this income indefinitely, Congress enacted the Subpart F provisions of the Internal Revenue Code in 1962. These provisions require certain items of income to be treated as dividends deemed paid to the U.S. shareholders and, therefore, subject to U.S. taxation. Currently, a U.S. shareholder of a CFC may be required to include in gross income the shareholder's ratable share of the CFC's: (1) Subpart F income (see *Subpart F Income* in the *Explanation of Selected Terms*); (2) earnings invested in U.S. property; (3) previously excluded Subpart F income withdrawn from "qualified investments" in less developed countries and in "foreign base company" shipping operations; (4) previously excluded export trade income withdrawn from investment in export trade assets; and (5) factoring income (income derived from the acquisition of a trade or service receivable).

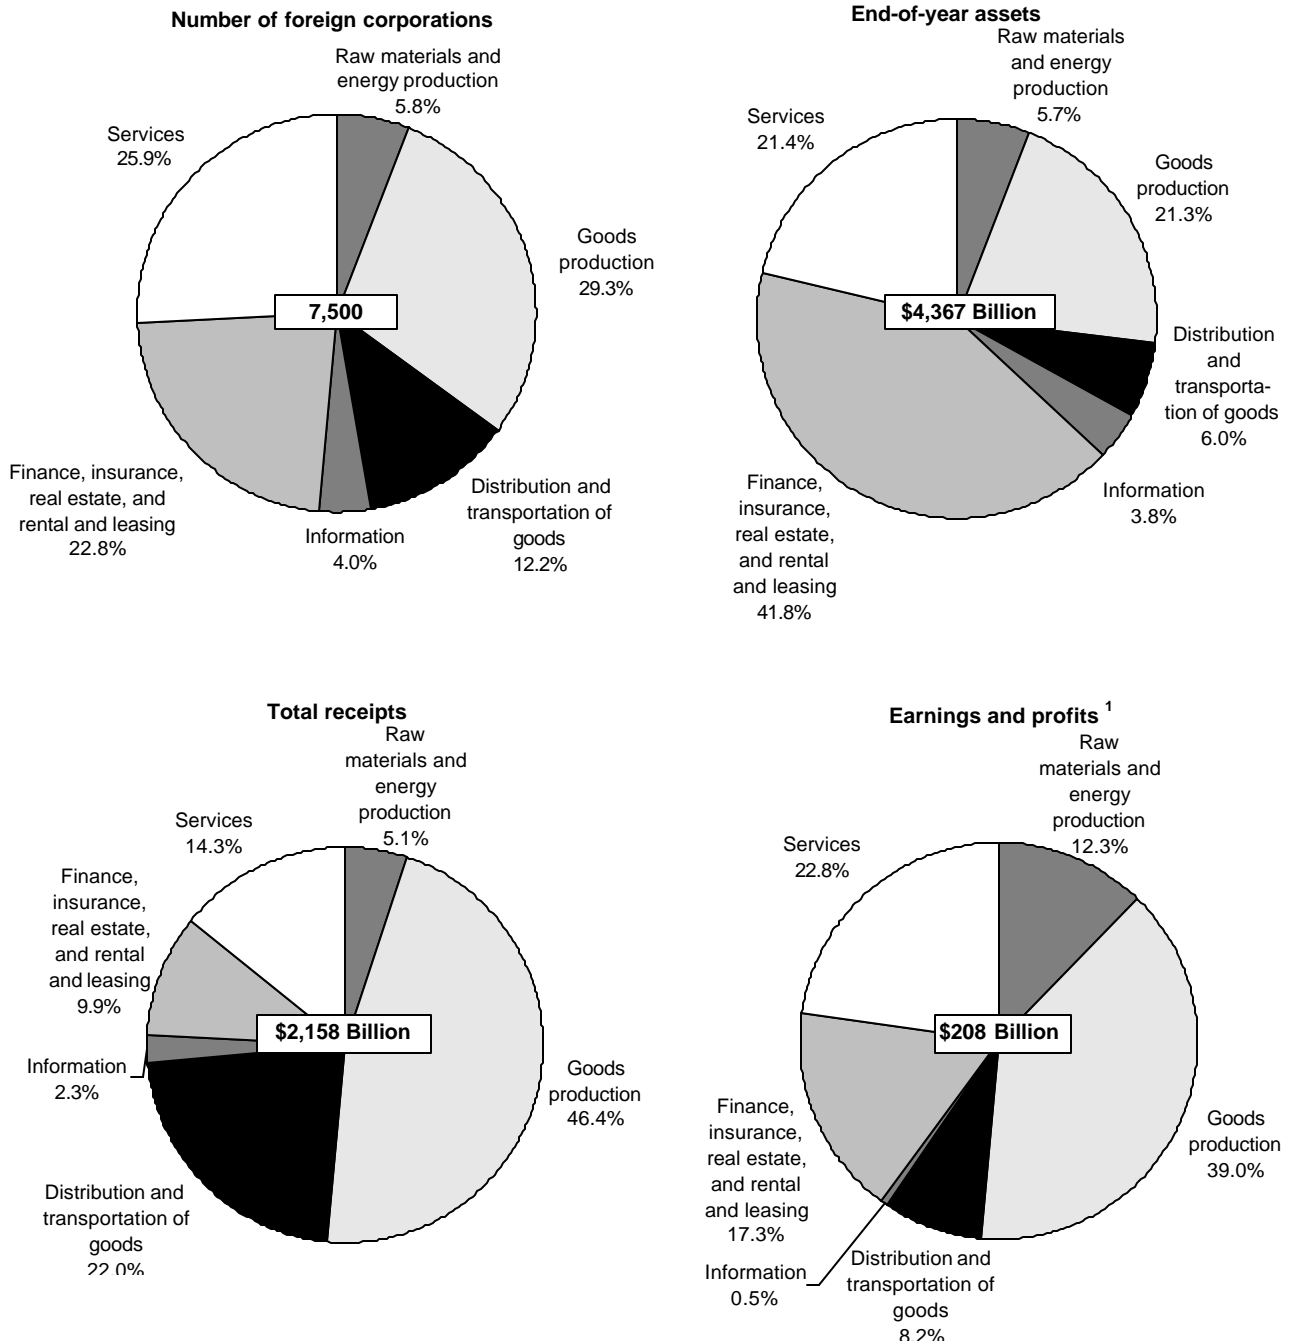

## CFC's by Industrial Sector

For Tax Year 2000, CFC's engaged in finance, insurance, real estate, and rental and leasing accounted for 41.8 percent of end-of-year assets, 9.9 percent of total receipts, and 17.3 percent of current earnings and profits (less deficit) before income taxes reported by the 7,500 largest CFC's (Figure A and Table 1). Nearly 63 percent of the total receipts and 48.3 percent of earnings and profits (less deficit) before income taxes for this industrial grouping were accounted for by two subsectors: security, commodity contracts, and other financial investments and related products; and insurance carriers and related activities. Goods producers accounted for 21.3

## Controlled Foreign Corporations, 2000

percent of end-of-year assets, 46.4 percent of total receipts, and 39.0 percent of earnings and profits (less deficit) before income taxes of the largest 7,500 CFC's. Chemical, computer and electronic product, and transportation equipment manufacturing collectively reported 60.8 percent of end-of-year assets, 63.0 percent of total receipts, and 62.5 percent of earnings and profits (less deficits) before income taxes for all goods producers.

The two major industrial sectors experiencing the largest growth between Tax Years 1998 and 2000 were services and information (Figure B). For Tax Year 2000, CFC's engaged in services reported \$933.0 billion in end-of-year assets, \$308.0 billion in total receipts, and \$47.2 billion in earnings and profits (less deficit) before income taxes. These amounts increased from Tax Year 1998 by 47.7 percent, 70.5 percent, and 54.1 percent, respectively. Over 92 percent of end-of-year assets, total receipts, and current earnings and profits (less deficit) before income taxes in services were reported by CFC's engaged in professional and business services, a group that includes the management of companies and enterprises sector. CFC's in the information sector reported \$165.9 billion in end-of-year assets and \$49.8 billion in total receipts for Tax Year 2000. These amounts increased from Tax Year 1998 by 130.9 percent and 53.3 percent, respectively.

While all major industrial sectors experienced considerable growth in end-of-year assets and total receipts between Tax Years 1998 and 2000, there was moderate change in the percentage of the largest 7,500 CFC's included in each major industrial sector. The percentage of the largest 7,500 CFC's engaged in goods production declined from 33.0 percent to 29.3 percent between Tax Years 1998 and 2000. CFC's included in the information sector grew from 2.9 percent of the largest 7,500 CFC's in Tax Year 1998 to 4.0 percent in Tax Year 2000. The services sector accounted for 23.6 percent of the largest 7,500 CFC's in Tax Year 1998 and 25.9 percent in Tax Year 2000.

### Geographic Distribution of CFC's

For Tax Year 2000, Europe accounted for 61.2 percent of end-of-year assets, 54.3 percent of total receipts, and 55.4 percent of earnings and profits (less deficit) before income taxes for the 7,500 largest CFC's (Figure C and Tables 2 and 3). These amounts represent slight declines from Tax Year 1998 in the European-based CFC's share of the largest 7,500 CFC's total end-of-year assets, total receipts, and total earnings and profits (less deficit) before income taxes. The two geographic groupings with the smallest representation in the 7,500 largest CFC's were Africa and U.S. Possessions (including

## Controlled Foreign Corporations, 2000

Puerto Rico). These two regions collectively accounted for less than 1.0 percent of end-of-year assets and total receipts and slightly more than 1.0 percent of earnings and profits (less deficit) before income taxes.

Two regions experienced significant growth between Tax Years 1998 and 2000. For Tax Year 2000, CFC's based in other Western Hemisphere countries reported \$221.2 billion in end-of-year assets, \$77.7 billion in total receipts, and \$12.5 billion in earnings and profits (less deficit) before income taxes. These amounts increased from Tax Year 1998 by 83.4 percent, 119.8 percent, and 186.8 percent, respectively. Asian CFC's reported \$392.1 billion in end-of-year assets, \$324.6 billion in total receipts, and \$26.8 billion in earnings and profits (less deficit) before income taxes. These totals represent increases from Tax Year 1998 of 34.7 percent, 46.0 percent, and 89.7 percent, respectively.

Figure D, which shows the number of CFC's and total receipts for selected countries for the largest 7,500 CFC's for Tax Years 1996, 1998, and 2000, indicates that several individual countries experienced large growth in total receipts between Tax Years 1996 and 2000. Total receipts of Chinese CFC's grew 167.1 percent despite only a 9.1-percent rise in the number of Chinese corporations included in the largest 7,500 CFCs. Total receipts of Venezuelan CFC's grew 117.9 percent between Tax Years 1996 and 2000. Mexican and Swiss CFC's also experienced large growth, reporting a 105.5-percent and 100.7-percent increase in total receipts, respectively, between Tax Years 1996 and 2000.

### Profitability

For purposes of this article, two measures are used to assess pretax profitability for the 7,500 largest CFC's: rate of return on assets and profit margin. Rate of return on assets is defined as current earnings and profits (less deficit) before income taxes divided by end-of-year assets. Profit margin is defined as current earnings and profits (less deficit) before income taxes divided by total receipts.

Both measures of profitability increased from Tax Year 1992 to Tax Year 1996, decreased from Tax Year 1996 to Tax Year 1998, and increased again from Tax Year 1998 to Tax Year 2000. Between Tax Year 1992 and Tax Year 1996, the aggre-

gate rate of return on assets increased from 4.4 percent to 5.1 percent. The rate of return on assets fell to 4.5 percent in Tax Year 1998 before rising to 4.8 percent in Tax Year 2000. Profit margins increased from 5.7 percent in Tax Year 1992 to 8.4 percent in Tax Year 1996 before decreasing to 8.2 percent in Tax Year 1998. Profit margins then increased to a decade high of 9.6 percent in Tax Year 2000.

For Tax Year 2000, profitability measures varied among the six different major industrial sectors. Of the largest 7,500 CFC's, those engaged in raw materials and energy production reported a 10.3-percent rate of return on assets and a 23.4-percent profit margin. These CFC's reported a 5.6-percent rate of return on assets and a 13.9-percent profit margin for Tax Year 1998. CFC's involved in the service industry reported a 5.1-percent rate of return on assets and a 15.3-percent profit margin for Tax Year 2000. For Tax Year 1998, these CFC's reported a 4.9-percent rate of return on assets and a 17.0-percent profit margin.

### Distributions of Earnings and Profits

The 7,500 largest CFC's distributed \$94.9 billion to U.S. and foreign shareholders out of earnings and profits in Tax Year 2000. Slightly more than 65 percent of distributions out of earnings and profits were from not previously taxed earnings and profits (\$62.0 billion), while the remainder was distributed from previously taxed earnings and profits (\$32.8 billion).

The majority of distributions out of earnings and profits are attributable to CFC's doing business in the goods production and services sectors. These two industrial sectors distributed \$56.6 billion out of earnings and profits or 59.7 percent of total distributions out of earnings and profits for all industries. Of this total, \$38.0 billion were from not previously taxed earnings and profits, with the remaining \$18.6 billion coming out of previously taxed earnings and profits. Several industrial sectors had significant increases of distributions out of earnings and profits from Tax Year 1998 to Tax Year 2000. CFC's engaged in the raw materials and energy production, information, and finance, insurance, real estate, and rental and leasing sectors reported increases of distributions out of earnings and profits of 59.3 percent, 70.2 percent, and 46.3 percent, respectively.

\*\* Not shown to avoid disclosure of information on specific corporations.

## Controlled Foreign Corporations, 2000

European-based CFC's accounted for 57.2 percent (\$54.3 billion) of all distributions out of earnings and profits. Slightly more than 62 percent of these distributions were from not previously taxed earnings and profits (\$33.7 billion), with the remainder distributed from previously taxed earnings and profits (\$20.5 billion). Foreign entities incorporated in Asian countries distributed \$12.6 billion out of earnings and profits in Tax Year 2000. This represents an 81.6-percent increase over Tax Year 1998. Latin American-based CFC's distributed \$10.5 billion out of earnings and profits in Tax Year 2000, a 24.9-percent increase over Tax Year 1998.

From Tax Year 1998 to Tax Year 2000, four of the six major industrial sectors saw a decline in the taxable payout ratio, defined as taxable dividends paid to a U.S. person by a CFC with positive current earnings and profits net of current year Subpart F income divided by positive current earnings and profits net of current year Subpart F income (Figure E) (see definition of "U.S. person," "Current earnings and profits," and "Subpart F Income" in the *Explanation of Selected Terms*). Among the largest 7,500 CFC's, the taxable dividend payout ratio declined from 19.8 percent to 8.7 percent (a 56.1-percent decline) and from 25.2 percent to 15.2 percent (36.9 percent) for the distribution and transportation of

goods and services sectors, respectively [4]. From Tax Year 1998 to Tax Year 2000, foreign corporations engaged in the raw materials and energy production and information sectors reported increases in the taxable payout ratio from 21.9 percent to 23.6 percent (a 7.8-percent increase) and from 4.5 percent to 10.1 percent (124.4 percent), respectively [5].

### Data Sources and Limitations

The statistics presented in this article are based on information collected from corporation tax returns with accounting periods ending July 2000 through June 2001 and their attached Form(s) 5471, *Information Return of U.S. Persons with Respect to Certain Foreign Corporations*. A U.S. corporation is required by Internal Revenue Service regulations to submit a Form 5471 for any Controlled Foreign Corporation (CFC) with an accounting period ending with or within the U.S. parent's accounting period. Thus, the CFC's accounting period may have ended as early as July 1999 and as late as June 2001. However, most CFC activity occurred in Calendar Year 2000.

These statistics report data for the largest (in terms of total assets (see definition of "Total assets" in the *Explanation of Selected Terms*)) active 7,500 foreign corporations controlled by U.S. corporations

Figure E

## Controlled Foreign Corporations, 2000

with total assets of \$500 million or more (see definition of “Active versus inactive Controlled Foreign Corporations” in the *Explanation of Selected Terms*). The 7,500 largest CFC’s accounted for 90.1 percent of total end-of-year assets, 80.5 percent of total receipts, and 88.1 percent of current earnings and profits (less deficit) before income taxes reported by all active CFC’s of these U.S. corporations with assets of \$500 million or more [6]. The amount of total assets for these 7,500 largest CFC’s ranged from approximately \$75 million to \$229 billion [7].

Since the 1,087 parent corporations with assets of \$500 million or more and CFC’s included in the largest 7,500 controlled foreign corporations were selected at a 100-percent rate for the Statistics of Income sample of all corporation income tax returns, the data are not subject to sampling variability, although they may be subject to nonsampling error.

Several limitations apply when making comparisons to prior-year statistics for the 7,500 largest CFC’s. First, the composition of the 7,500 largest CFC’s is not consistent across tax years. For example, approximately two thirds of the largest 7,500 CFC’s for Tax Year 2000 were also included in the 7,500 largest CFC’s for Tax Year 1998. Many of the 7,500 largest CFC’s for Tax Year 1998 that were not included among the largest 7,500 CFC’s for Tax Year 2000 were still controlled by U.S. corporations, but the size of their total assets for Tax Year 2000 excluded them from this group. In addition, some of the 7,500 largest CFC’s for Tax Year 1998 were not included for Tax Year 2000 because they were no longer “controlled” or because the size of the U.S. parent’s total assets had fallen under \$500 million.

Second, statistics previously published by Statistics of Income for tax years before 1986 were for all CFC’s controlled by U.S. corporations with total assets of \$250 million or more, not just the largest 7,500 CFC’s controlled by U.S. corporations with total assets of \$500 million or more. Therefore, the statistics for these years include smaller and inactive CFC’s. For this reason, comparisons between statistics on the largest CFC’s and statistics for years before 1986 should be made with caution.

Finally, caution should be used when comparing data by industrial groupings. For Tax Years 1998 and 2000, CFC’s were classified under the North American Industry Classification System (NAICS), which differs from the Standard Industrial Classifica-

tion (SIC) system used before Tax Year 1998. While most industries were not affected by the implementation of NAICS, the grouping of some economic activity was changed. The most significant change was the movement of the management of companies and enterprises sector from finance, insurance, real estate, and rental leasing under the SIC system to services under NAICS.

It should also be noted that the industrial mix of the 7,500 largest CFC’s is not representative of the industrial mix of all active foreign corporations controlled by U.S. corporations reporting \$500 million or more in assets. For example, 12.2 percent of the largest 7,500 CFC’s for Tax Year 2000 were primarily engaged in distribution and transportation of goods, while almost 21.0 percent of all active CFC’s of U.S. corporations reporting \$500 million or more in total assets were involved in the same sector [8]. Conversely, only 13.6 percent of all active CFC’s of U.S. corporations reporting \$500 million or more in total assets were classified in business in the finance, insurance, real estate, and rental and leasing sector, while 22.8 percent of the largest 7,500 CFC’s for Tax Year 2000 were engaged in this industrial sector [9]. Furthermore, CFC’s were classified by industry based on their principal business activity as reported on Form 5471. However, assets, receipts, and profits may have also been related to secondary business activities. It is not possible to measure the extent of these secondary business activities because these activities were not detailed on Form 5471.

### Explanation of Selected Terms

*Active versus inactive Controlled Foreign Corporations.*--In general, a foreign corporation was considered “active” if earnings and profits, incomes taxes, receipts, expenses, or certain transactions between the foreign corporation and its subsidiaries or majority shareholder were reported on Form 5471, *Information Return of U.S. Persons with Respect to Certain Foreign Corporations*. The filing of Form 5471 was required even if a CFC was dormant or inactive for Tax Year 2000. All CFC’s included in the largest 7,500 CFC’s grouping were active for Tax Year 2000.

*Controlled Foreign Corporation.*--Section 957 of the Internal Revenue Code defines a foreign corporation as “controlled” if more than 50 percent of the total combined voting power of all classes of

## Controlled Foreign Corporations, 2000

stock entitled to vote, or the value of all its outstanding stock, is owned (directly, indirectly, or constructively) by U.S. shareholders on any day during the foreign corporation's tax year. A U.S. shareholder for purposes of determining control is defined as a "U.S. person" (see definition below) owning 10 percent or more of the foreign corporation's voting stock. For purposes of these statistics, a foreign corporation was "controlled" only if a single U.S. corporation satisfied the ownership requirements for an uninterrupted period of at least 30 days. A CFC could be controlled indirectly through a partnership if the U.S. corporation was a controlling partner. To the extent possible, these CFC's were also included in the statistics.

*Country of incorporation.*--The country of incorporation is the country under whose laws the CFC is legally created. The country of incorporation of a CFC was not necessarily the principal place of business. Two hundred eighty (3.7 percent) of the largest 7,500 CFC's reported a principal place of business other than their countries of incorporation for Tax Year 2000. Tables 2 and 3 provide data by country of incorporation; data by principal place of business are not included in these statistics.

*Current earnings and profits.*--"Current earnings and profits" represent the difference between total earnings and profits of the foreign corporation at the end of the current year (before reduction by dividends paid during the year) and the accumulated earnings and profits of the corporation at the beginning of the year. Although current earnings and profits typically are an after-tax measure of profits, they are shown in these statistics both before and after taxes. Earnings and profits are a tax concept referring to the economic capacity of a corporation to make a distribution to shareholders that is not a return on capital. The concept is similar to the notion of retained earnings. The term "earnings and profits" is not specifically defined in the Internal Revenue Code. In those instances where current earnings and profits were not reported for the foreign corporation, net income per books was used in the place of missing earnings and profits.

*Distributions out of earnings and profits.*--A distribution comes first from current earnings and profits and then from accumulated earnings and profits.

*European Monetary Union.*--The members of the European Monetary Union for all of Tax Year 2000 were: Austria, Belgium, Finland, France, Ger-

many, Ireland, Italy, Luxembourg, Netherlands, Portugal, and Spain. Greece joined the European Monetary Union in January 2001.

*Income taxes.*--CFC's reported income, war profits, and excess profits taxes paid or accrued for their annual accounting period to any foreign country or a U.S. Possession as income tax.

*OPEC countries.*--The members of the Organization of Petroleum Exporting Countries (OPEC) for Tax Year 2000 were: Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, and Venezuela.

*Previously taxed earnings and profits.*--This includes any earnings and profit amounts that were subject to U.S. tax in the current year or in a prior year but not distributed. Previously taxed earnings and profits include amounts related to Subpart F income (see definition below), earnings related to investments in certain U.S. property, previously excluded Subpart F income withdrawn from qualified investments, previously excluded export trade income withdrawn from investment in export trade assets, factoring income, and earnings invested in excess passive assets.

*Subpart F income.*--Internal Revenue Code sections 951 and 952 stipulate specific cases in which earnings and profits are deemed to have been paid by a CFC to the U.S. shareholder. Such income is subject to U.S. tax whether or not it is repatriated to U.S. shareholders in the form of an actual dividend. Internal Revenue Code section 951 provides that U.S. shareholders include in their gross incomes certain undistributed profits of foreign corporations controlled by U.S. shareholders. Subpart F income from a CFC includes certain insurance income of U.S. risks, "foreign base company" income, international boycott participation income, bribes and other illegal payments to foreign government officials, and income from any country which the United States does not recognize or with which it has severed relations, or which repeatedly provides support for acts of international terrorism.

*Total assets.*--For purposes of determining the largest 7,500 CFC's for these statistics, total assets are defined as the larger of the foreign corporation's beginning-of-year and end-of-year assets.

*Total receipts.*--Total receipts equal business receipts (gross receipts from sales and operations), plus income from investment. In the statistics re-

## Controlled Foreign Corporations, 2000

ported prior to 1990, business receipts were used to describe the larger of gross receipts from sales and operations and “total income.” The latter is a tax return concept used to describe the sum of business receipts less cost of sales and operations (i.e., gross profit), plus income (less loss) from investments.

*U.S. person.*--A U.S. person can be a U.S. citizen or resident, a domestic partnership, a domestic corporation, or an estate or trust (other than a foreign estate or trust whose income from sources outside the United States is not includable in the beneficiaries' gross incomes).

### Notes and References

[1] Statistics of Income studies of Controlled Foreign Corporations are conducted for even-numbered tax years. For 1998 data, see Comisky, John, “Controlled Foreign Corporations, 1998,” *Statistics of Income Bulletin*, Winter 2002-2003, Volume 22, Number 3.

[2] Based on unpublished data.

[3] The current definition of a Controlled Foreign Corporation is given in Internal Revenue Code section 957. Ownership attribution rules are discussed in section 958.

[4] Based on unpublished data.

[5] Based on unpublished data.

[6] Based on unpublished data. For Tax Year 2000, there were 2,012 U.S. corporate returns with \$500 million or more in total assets with 52,409 active controlled foreign corporations. For Tax Year 2000, the 52,409 active CFC's reported total end-of-year assets of \$4,848.1 billion, total receipts of \$2,680.5 billion, and total current earnings and profits (less deficit) before income taxes of \$235.6 billion.

<sup>1</sup> Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one industrial sector. The industrial activity of the parent corporation filing the return often differs from that of the Controlled Foreign Corporations.

<sup>2</sup> Value is less than \$500.

NOTE: Detail may not add to totals because of rounding.

# Controlled Foreign Corporations, 2000

**Table 2.--U.S. Corporations with Total Assets of \$500 Million or More and Their 7,500 Largest Controlled Foreign Corporations: Number, Assets, Receipts, Earnings, Taxes, Distributions, and Subpart F Income, by Selected Country of Incorporation of Controlled Foreign Corporation**

<sup>1</sup> Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one country of incorporation.

<sup>2</sup> Value is less than \$500.

NOTE: Detail may not add to totals because of rounding and because data are shown for selected countries only.

\*\* Not shown to avoid disclosure of information on specific corporations. However, the data are included in the appropriate totals.

<sup>1</sup> Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one industrial sector. The industrial activity of the parent corporation filing the return often differs from that of the Controlled Foreign Corporations.

<sup>2</sup> Includes "Nature of business not allocable," not shown separately.

NOTE: Detail may not add to totals because of rounding and because data are shown for selected countries only.
