(1-800-424-4372 - within EPA Region 10)

EPA Proposes To Reissue NPDES Permits

EPA proposes to reissue the NPDES permits to the facilities referenced above. The draft permits place conditions on the discharge of pollutants from each wastewater treatment plant to waters of the United States. In order to ensure protection of water quality and human health, the permits place limits on the types and amounts of pollutants that can be discharged from each facility.

This Fact Sheet includes:

- information on public comment, public hearing, and appeal procedures
- a listing of proposed effluent limitations, and other conditions for each facility
- a map and description of the discharge locations
- technical material supporting the conditions in each permit

The State of Idaho Proposes Certification for Facilities that Discharge to State Waters

EPA is requesting that the Idaho Department of Environmental Quality certify the NPDES permits for those facilities that discharge to state waters, under section 401 of the Clean Water Act. All of the facilities referenced above, except for the Riverside Sewer District, discharge to State waters. The Riverside Sewer District is located on the Nez Perce Reservation and EPA will
