<sup>1</sup> Because the PPI inputs to the ECI have been denoted as "unrevised" by the Bureau of Labor Statistics, these ECI values should be considered preliminary, as well. Final ECI values will be disseminated once the final first quarter 1996 PPI's become available.

<sup>2</sup> Arithmetic averages of the three ECI values.

<sup>3</sup> Calculated as follows:

$$R/A = \{(High\ Index - Low\ Index) / |Average\ index - 100|\} \times 100\%.$$

<sup>1</sup> Index values have been rounded to the nearest tenth.

<sup>2</sup> Arithmetic average of 1994 quarterly indexes.

<sup>3</sup> All first quarter 1996 indexes are *preliminary*.

<sup>4</sup> For fabric filters, each quarterly value shown is the average of the Producer Price Indexes (PPI's) for the three months in question, *divided by* the average of the PPI's for January, February, and March 1994 (i.e., first quarter 1994).

<sup>5</sup> For mechanical collectors, each quarterly value shown is the average of the Producer Price Indexes (PPI's) for the three months in question, *divided by* the average of the PPI's for January, February, and March 1994 (i.e., first quarter 1994).
