CONSENT/ASSENT AND PARENTAL PERMISSION FOR SPECIMEN STORAGE AND CONTINUING STUDIES

Last

Q Why will a sample of blood and urine be kept for future health studies?	${\it Q}$ Will I receive results from any future testing of my specimens?
A We would like to store some of the urine, blood, and saliva from persons who are examined in NHANES for future health studies. These samples will be frozen and kept in a specimen bank for as long as they last.	A Most studies will simply add to our knowledge of health and disease. Therefore, we do not plan to contact you or your family with individual results from these studies. Periodically we will send a newsletter telling all NHANES participants about the studies being conducted. To get more
Q What studies will be done with the samples?	general information about a particular study, you can call our toll-free number, 1-800 452-6115.
A At this time, no specific studies are planned besides the tests included in the NHANES exam. As scientists learn more about health and diseases, other studies will be conducted that may include stored samples. People conducting these studies will not contact NHANES participants for any additional information.	 Q What genetic studies will be done and what part will my DNA sample play? (DNA samples will be collected only on those ages 20 or over.)
We will keep strictly private all health data and samples that we collect in NHANES. Our staff is not allowed to discuss that any person is part of this survey under penalty of Federal laws: Section 308(d) of the Public Health Service Act (42 USC 242m) and the Privacy Act of 1974 (5 USC 552A).	A Genetic studies look at the DNA found in cells. We will store part of the blood and saliva sample that we collect in the exam center for future genetic studies. We will keep this material for an unlimited time. Studies of human genes are helping us learn about many diseases and health conditions. The information from people who are part of NHANES could help that effort.
Q Who can use the stored samples for further study?	If you wish to have your samples used for future genetic studies, you will have a chance to say so when you sign this
A Researchers from Federal agencies, universities, and other scientific centers can submit proposals to use the stored specimens. These proposals will be reviewed for scientific merit and by a board that determines if the study proposed is ethical. The NHANES program will always know which	consent form. Q How can I remove blood, urine, or saliva samples from the specimen bank?
samples belong to you or your child, but we will not give other researchers any information that could identify you or your child.	A In the future, if you want samples removed from the specimen bank, call us toll-free at 1-800 452-6115.
The results of continuing study of your stored specimens many diseases.	may help find new ways to prevent, treat, and cure
For persons ages 7 and over, check this box I agree that my blood, urine, and saliva (if applicable) may be kept for future health studies	
For parent/guardian of a child under the age of 18, check this box I agree that my child's blood and urine may be kept for future health studies	
Genetic testing studies may be done with DNA samples collected only on those ages 20 or over. If you wish to have your samples used for future genetic studies, check the box below:	
Only for persons ages 20 and over, check this box I agree that my blood and saliva may be kept for future st medical conditions.	udies using my genes to help understand genetic links to
