

# Eating Well as We Age

## Eating Well

Many older people have trouble eating well. This booklet tells why. Then it gives ideas on what you

can do about it. Using the food label is one way to eat well. There are others.

The Food and Drug Administration, or FDA, is a United States government agency that makes sure foods are safe, wholesome and honestly labeled.

**Problem:**  
**Can't chew**

Do you have trouble chewing? If so, you may have trouble eating foods like meat and fresh fruits and vegetables.

**What to do:**

👉 Try other foods.

Instead of:	Try:
<b>fresh fruit</b>	→ fruit juices and soft canned fruits, like applesauce, peaches and pears
<b>raw vegetables</b>	→ vegetable juices and creamed and mashed cooked vegetables
<b>meat</b>	→ ground meat, eggs, milk, cheese, yogurt, and foods made with milk, like pudding and cream soups
<b>sliced bread</b>	→ cooked cereals, rice, bread pudding, and soft cookies

**Problem:**  
**Upset stomach**

Stomach problems, like too much gas, may make you stay away from foods you think cause the problem. This means you could be missing out on important nutrients, like vitamins, calcium, fiber and protein.

**What to do:**

👉 Try other foods.

Instead of:	Try:
<b>milk</b>	→ milk foods that may not bother you, like cream soups, pudding, yogurt and cheese
<b>vegetables like cabbage and broccoli</b>	→ vegetable juices and other vegetables, like green beans, carrots and potatoes
<b>fresh fruit</b>	→ fruit juices and soft canned fruits

👉 See a doctor about your stomach problems.

## Problem: Can't shop

You may have problems shopping for food. Maybe you can't drive anymore. You may have trouble walking or standing for a long time.

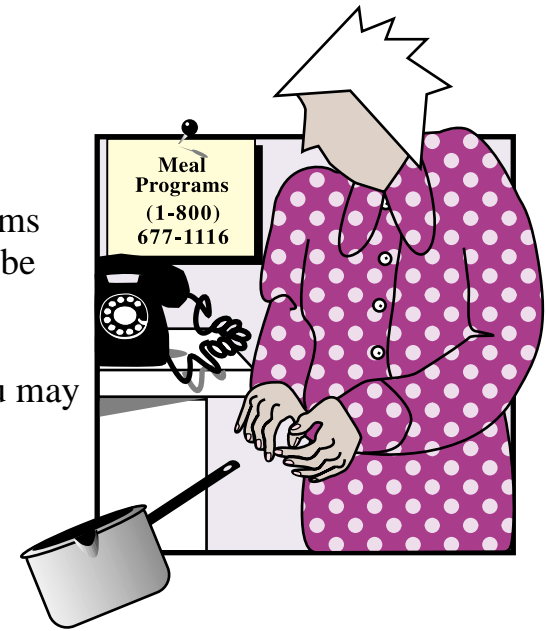

### What to do:

- 👉 Ask the local food store to bring groceries to your home. Some stores deliver free. Sometimes there is a charge.
- 👉 Ask your church or synagogue for volunteer help. Or sign up for help with a local volunteer center.
- 👉 Ask a family member or neighbor to shop for you. Or pay someone to do it. Some companies let you hire home health workers for a few hours a week. These workers may shop for you, among other things. Look for these companies in the Yellow Pages of the phone book under "Home Health Services."

## Problem: Can't cook

You may have problems with cooking. It may be hard for you to hold cooking utensils, and pots and pans. Or you may have trouble standing for a long time.

### What to do:

- 👉 Use a microwave oven to cook TV dinners, other frozen foods, and foods made up ahead of time by the store.
- 👉 Take part in group meal programs offered through senior citizen programs. Or, have meals brought to your home.
- 👉 Move to a place where someone else will cook, like a family member's home or a home for senior citizens.

**To find out about senior citizen group meals and home-delivered meals, call (1-800) 677-1116. These meals cost little or no money.**

## **Problem:** **No appetite**

Older people who live alone sometimes feel lonely at mealtimes. Loneliness can make you lose your appetite. Or you may not feel like making meals for just yourself.

Maybe your food has no flavor or tastes bad. This could be caused by medicines you are taking.

### **What to do:**

- 👉 Eat with family and friends.
- 👉 Take part in group meal programs, offered through senior citizen programs.

## **Problem:** **Short on money**

Not having enough money to buy enough food can keep you from eating well.

### **What to do:**

- 👉 Buy low-cost foods, like dried beans and peas, rice and pasta. Or buy foods that contain these items, like split pea soup and canned beans and rice.
- 👉 Use coupons for money off on foods you like.
- 👉 Buy foods on sale. Also buy store-brand foods. They often cost less.
- 👉 Find out if your local church or synagogue offers free or low-cost meals.
- 👉 Take part in group meal programs offered through local senior citizen programs. Or, have meals brought to your home.
- 👉 Get food stamps. Call the food stamp office listed under your county government in the blue pages of the telephone book.

## Read the Label

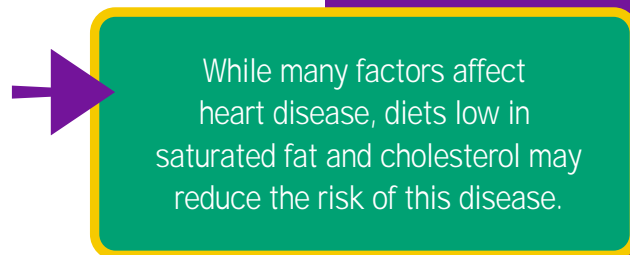

Look for words that **say something healthy about the food.**

Examples are:

Look for words that **tell about the food's relation to a disease.**

A low-fat food may say:

The words may be on the front or side of the food package.

FDA makes sure these words are true.

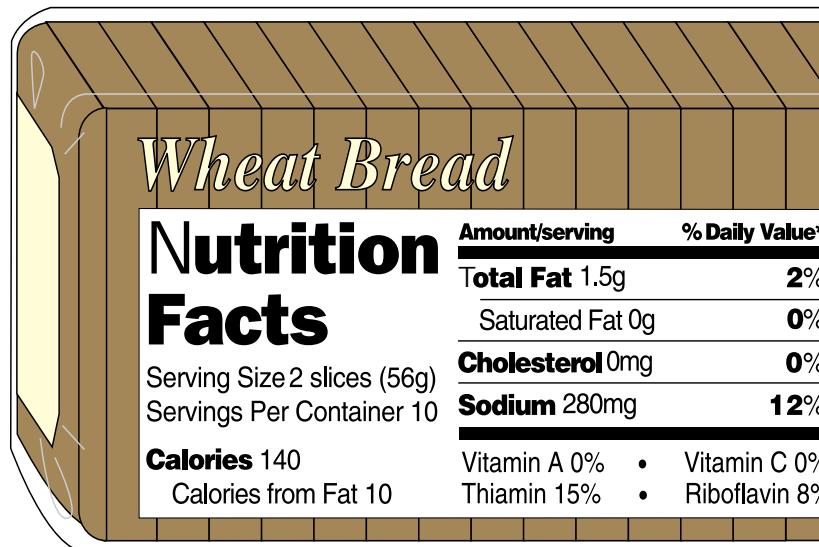

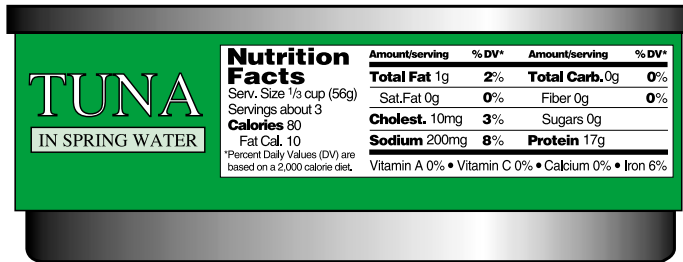

**Use label claims like these to choose foods that help make a good diet.**

## Look for “Nutrition Facts”

Most food labels tell what kinds and amounts of vitamins, minerals, protein, fat, and other nutrients are in a food.

This information is called “Nutrition Facts.” You can find it on the side or back of most food labels.

## Use “Nutrition Facts”

1 Look at the serving size.

2 Find the % Daily Value. The numbers underneath tell how much of each nutrient listed is in one serving.

3 About 100% of each nutrient each day is usually healthful. If you’re on a special diet, like a low-sodium or low-fat diet, use the % numbers to pick low-sodium and low-fat foods.

Nutrition Facts	
Serving Size 1/2 cup (114g) Servings Per Container 4	
<b>Amount Per Serving</b>	
<b>Calories</b> 90	Calories from Fat 30
<b>% Daily Value*</b>	
<b>Total Fat</b> 3g	<b>5%</b>
Saturated Fat 0g	<b>0%</b>
<b>Cholesterol</b> 0mg	<b>0%</b>
<b>Sodium</b> 300mg	<b>13%</b>
<b>Total Carbohydrate</b> 13g	<b>4%</b>
Dietary Fiber 3g	<b>12%</b>
Sugars 3g	
<b>Protein</b> 3g	
Vitamin A 80%	Vitamin C 60%
Calcium 4%	Iron 4%
*Percent Daily Values are based on a 2,000 calorie diet.	

The 3g (grams) of total fat in one serving of this food provides 5% of fat for the day, leaving 95% more fat allowed that day in a normal diet. The 300mg (milligrams) of sodium provide 13% for the day,

leaving 87% more sodium allowed that day in a normal diet. The “mg” number is much larger than the “g” number because it takes many, many milligrams to equal 1 gram.

## Do You Have More Questions About Eating Well As You Age?

Ask your doctor or other  
health-care worker.

And ask FDA. There may be  
an FDA office near you.  
Look for the number in the  
blue pages of the phone book.

You can also contact FDA  
through its toll-free number,  
1-888-INFO-FDA  
(1-888-463-6332).

Or on the World Wide Web at  
[www.fda.gov](http://www.fda.gov).
