10- General Information About the Common Working File (CWF) System

(Rev. 1, 10-01-03)

A3-3800, B3-6000

The Common Working File (CWF) is comprised of nine localized databases called Hosts. Hosts maintain total beneficiary claim history and entitlement information for the beneficiaries in their jurisdiction. Each jurisdiction is a network of intermediaries and carriers (Satellites) located in a defined geographic area (sector). Each Satellite within the sector is linked to its Host via telecommunications. The Satellites transmit daily files with claims ready for payment to the Host. The Host returns approvals, rejects, or adjustments and informational trailers daily.

Each beneficiary is assigned to only one Host site. Beneficiaries are assigned to a Host site based on where the beneficiary signs up for their Social Security Administration (SSA) benefits. For example, if a beneficiary signs up for their SSA benefits in Dallas, Texas, the Southwest Host will get the beneficiary. The information the Host site maintains for its beneficiaries is called a CWF Master Record. This record contains complete entitlement, utilization, history, Medicare Secondary Payer (MSP), and Health Maintenance Organization (HMO) data. All Part A and B claims for a beneficiary are processed against this single file prior to claims payment. The record is updated daily with data from adjusted and approved claims.

When a Satellite receives a claim, it processes the claim to the point of payment or denial, using data from its own files and the data on the claim. Prior to payment, the claim is transmitted to the Host site. The Host uses the CWF files to determine the beneficiary's most recent utilization and entitlement status and uses that information to decide whether the claim should be approved for payment. The Host determines whether to accept the claim as submitted, accept the claim with adjustments, or reject the claim for corrective action by the Satellite.

Each Host site is responsible for processing those claims submitted for beneficiaries on its database. These claims are processed through a shared software system supplied to each Host by the CWF Maintenance Contractor (CWFM). Each change made to the CWF software is released to all Host sites in a uniform manner. This software performs consistency and utilization editing on claims for corrective action by the Satellite.

20 - Communication Between Host and Satellite Sites

(Rev. 1, 10-01-03)

A3-3800, B3-6001, B3-6003

The local CWF database for each sector resides at a Host. Each Satellite within the sector is linked to its Host's database. Communication between them is electronic, with

claims ready for payment or denial communicated to the Host, and adjustments, approvals, rejects, and informational trailers returned from the Host via a daily process. The Satellite usually initiates this process. On occasion, the CWF Host will initiate an "unsolicited response" to the Satellite as a result of a new claims action that affects a previously processed claim action.

Each file the Satellite transmits is preceded by a header record and followed by a trailer record. These records indicate the beginning and end of each file. Complete documentation including record formats, can be reviewed and downloaded at the <http://cms.csc.com/cwf>.

Claims are processed by CWF in the same order that they are received, regardless of the dates on which expenses were incurred. This first-in-first-out method of processing requests for payment facilitates prompt handling of claims.

20.1 - Records the Satellites Transmit to Their Host

(Rev. 1, 10-01-03)

A3-3800.1, B3-6004

20.1.1 - Medicare Secondary Payer (MSP) Maintenance Transaction Record/Fiscal Intermediary (FI) and Carrier MSP Auxiliary File Update Responsibility

(Rev. 1, 10-01-03)

A3-3800.1, B3-6004.2, AB-00-74, AB-02-107

See Chapter 6 of the MSP Manual.

20.1.2 - Claim Records

(Rev. 1, 10-01-03)

A3-3800.1, B3-6004.1

The CWF Claim Record is a record of a claim that the Satellite has processed and is ready for payment or denial. It is submitted in daily files to the Host for approval. The Host clears the claim record through regular CWF consistency edits, MSP consistency edits, regular CWF utilization edits and then MSP utilization edits, in that order, and makes its approval, adjustment or rejection determination. The final determination is returned on a Basic Reply Record. (See §20.2.1.) Claim records can be of the following types:

Part B (Carrier) Claim Record

Carrier bills are input on the HUBC record. Refer to CWF Systems Documentation (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), Record Name: CWF Part B Claim, for the complete record layout and field descriptions.

DMEPOS Claim Record: DMEPOS bills are input on the HUDC record. Refer to CWF Systems Documentation (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), Record Name: CWF Part B and DMEPOS Claim, for the complete record layout and field descriptions.

Inpatient/Skilled Nursing Facility Claim Record: Inpatient hospital and SNF bills are input on the HUIP record. (See <http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf> for the record format.)

Outpatient Claim Record: Outpatient bills are input on the HUOP record. (See <http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf> for the record format.)

Home Health Claim Record: Home health bills are input on the HUHH record. (See <http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf> for the record format.)

Hospice Claim Record: Hospice bills on the HUHC record. (See <http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf> for the record format.)

20.1.3 - Hospice Notice of Election

(Rev. 1, 10-01-03)

A3-3800.1

Hospice Notices of Election are input on the HUHC record (Type of Bill 81A, 81B, 81C, 81D, 82A, 82B, 82C, or 82D). See <http://cms.csc.com/cwf> for the record format. Regional Home Health Intermediaries (RHHIs) use the HUHC record described in <http://cms.csc.com/cwf> for subsequent hospice bills.

20.1.4 - Adjustments to Posted Claims

(Rev. 1, 10-01-03)

A3-3800.1, B3-6004.3

Two actions can be taken on a claim that is already posted to CWF history. These actions are the same whether submitted by a carrier or an FI; however, the codes used are different:

- **Void** - Use a void to cancel original data on the beneficiary database and totally remove the dollar amounts. To void a posted claim, send the claim with the

original document control number and a "Full Credit" code (Entry Code 3 for carriers and Action Code 4 for FIs).

- **Change** - Send a full claim with a "Replacement Debit" code (Entry Code 5 for carriers and Action Code 3 for FIs) and the original document control number to make a change to a posted claim. This code is used to change most claims information. The old claim information will be backed out and replaced with the new claim information. The CWF will keep a record of the old claim so that any investigation of the actions taken on the claim will include the fact that there was a replacement action taken.

20.1.5 - Form CMS-382, ESRD Beneficiary Selection

(Rev. 1, 10-01-03)

A3-3644.4

Each Medicare home dialysis beneficiary chooses the method by which Medicare pays for his/her dialysis services. To do this, the beneficiary completes the Beneficiary selection Form CMS-382 and the facility forwards the form to its intermediary. See Chapter 8, §70.1 for information about the ESRD Method Selection process.

20.2 - Records the Host Transmits to its Satellites

(Rev. 1, 10-01-03)

A3-3800.2, B3-6005

20.2.1- Basic Reply Record

(Rev. 1, 10-01-03)

A3-3800.2, B3-6005.1

When the Host receives each claim or adjustment, it searches the Beneficiary File to find the Beneficiary Record. If the Beneficiary Record is found, the record is processed and a reply record is transmitted to the Satellite. See §20.2.2, for an explanation of the procedure if the Beneficiary Record is not found ("Not in File.")The record type returned by CWF is dictated by the claim record type as follows:

- **Part B/Carrier Basic Reply Record** - Reply record for each CWF Part B/carrier bill (HUBC) processed. Refer to CWF Systems Documentation, Record Name: CWF Part B Basic Reply Record (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.
- **DMEPOS Basic Reply Record** - Reply record for each CWF DMEPOS bill (HUDC) processed. Refer to CWF Systems Documentation, Record Name: CWF

DMEPOS Claim Response Record
(<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.

- **Inpatient/SNF Bill Basic Reply Record** - Reply record for each Inpatient/SNF bill (HUIP) processed. Refer to CWF Systems Documentation, Record Name: CWF Inpatient/SNF Bill Basic Reply Record (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.
- **Outpatient/Home Health/Inpatient Part B Bill Basic Reply Record** - Reply record for each Outpatient/Home Health/Inpatient Part B bill (HUOP and HUUH) processed. Refer to CWF Systems Documentation, Record Name: CWF Outpatient/Home Health/Inpatient Part B Bill Basic Reply Record (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.
- **NOE/Hospice Bill Basic Reply Record** - Reply record for each Hospice Notice of Election and all subsequent Hospice bills (HUHC) processed. Refer to CWF Systems Documentation, Record Name: CWF NOE/Hospice Bill Basic Reply Record (<http://cms.csc.com/cwf/downloads/docs/pdfs/copyxtnl.pdf>), for the complete record layout and field descriptions.

Each reply record will contain a disposition code in field 11 that indicates the action taken on the bill by the Host and what action the Satellite should take next.

The following is a list of actions that CWF may take on a claim record. Disposition codes, cross-reference/alpha search/NIF situations, their associated trailers, and bill recycling instructions are also included:

20.2.1.1 - Accepted (as is) for Payment

(Rev. 1, 10-01-03)

The claim record is posted to CWF history as submitted to the Host. The Satellite pays the claim accordingly.

- Disposition code 01.
- **Basic Reply Trailers** - These are informational trailers that contain entitlement, utilization, MSP, or other information, as appropriate, and are returned with the Reply. They give the Satellite the most recent information available about the beneficiary's claim history and other important data. Satellites must use this information to update their own data to improve the accuracy of future claims processing.

- **Return Alerts** - These are sent to the Satellite when CWF believes that there is a potential problem or error in the claim. The presence of an alert indicates that the Satellite should examine the information and make adjustments if necessary.

20.2.1.2 - Adjusted and Then Accepted for Payment

(Rev. 1, 10-01-03)

The deductible and/or payment limitations field(s) on the claim record were in error and CWF recalculated the field(s). The Host posts the record to CWF after these corrections are made. The Satellite must make the same adjustments to its files using information from basic reply Trailers 07 and 11 and pay the claim accordingly. Satellites must not resubmit the claim to CWF.

- Disposition code 02
- Basic Reply Trailers (07 and 11)
- A/B Crossover Alerts

20.2.1.3 - Cancel/Void Claim Accepted

(Rev. 1, 10-01-03)

This action cancels or voids a previously processed claim posted to CWF History. All utilization and deductibles associated with the claim are backed out. The Satellite receives a disposition code informing it that the cancel/void action was accepted.

- Disposition code 03
- Basic Reply Trailers

20.2.1.4 - Rejected

(Rev. 1, 10-01-03)

The claim record contains errors that prevent CWF from posting the claim to history. The claim is returned to the Satellite with codes explaining the errors. The Satellite must correct the CWF Claim Record and resubmit it.

- **Disposition Code ER, UR, CR, or RT, as Appropriate** - There will never be a combination of ER, UR, CR, and RT error codes on the same reply.
- **Consistency Error Codes (ER)** - Consistency edits examine the information on the claim itself. The consistency error codes indicate the errors in consistency found on the claim. These codes are returned on Basic Reply Trailer 08 and can contain up to four consistency error codes. Refer to CWF Systems

Documentation, <http://cms.csc.com/cwf/downloads/docs/pdfs/editcons.pdf>, for a detailed description of these error codes.

- **Utilization Error Codes (UR)** - Utilization edits compare the information on the CWF Claim Record with the information found on the CWF Beneficiary Master Record. The utilization error codes indicate discrepancies between the CWF Claim Record and the CWF Beneficiary Master Record. Since the CWF Beneficiary Master Record is presumed to be correct, these codes inform the Satellite what corrections it must make. The code is returned on basic reply Trailer 08 and contains only one utilization error code. Refer to CWF Systems Documentation, <http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>, for a detailed description of these error codes.
- **A/B Crossover Edits (CR)** - When the Host receives a Part A bill, CWF automatically checks the information in the record against the beneficiary's history files for both Part A and Part B utilization. If there is a conflict (or "crossover") of services, CWF will generate an A/B Crossover error code. These are returned on the reply Trailer 13 and will contain only one A/B crossover error code. Refer to CWF Systems Documentation, <http://cms.csc.com/cwf/downloads/docs/pdfs/desclv3b.pdf>, for a description of these error codes.

Refer to CWF Systems Documentation, <http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>, for detailed descriptions and resolutions of these error codes.

20.2.2 - Not in Host's File (NIF)

(Rev. 1, 10-01-03)

A3-3800.2, B3-6005.2

When the Host receives a claim record from a Satellite, it first searches its beneficiary and cross reference files. If it does not find the beneficiary's record in either place, it searches the Transfer Not in File (TNIF) file. If the record is not found there, the Host puts a response on the reply record in the form of a disposition code 50 or 52, indicating that the Beneficiary Record for which the Satellite submitted a claim record is not located at the Satellite's Host.

The TNIF file contains a record of every beneficiary for whom the Host has received a claim, and whose records are located at another Host. It shows at which Host the beneficiary file resides. If the Beneficiary Record is located at another Host, the original Host checks the out-of-service area response file to see if the claim record response is already waiting there. If there is not a response waiting, the claim is sent to the proper Host for processing. If there is a response, the Host gives that information to the Satellite.

There are many disposition codes that are returned to the Satellite for various NIF situations. Following is a list of codes and actions the Satellite takes in response to each disposition code.

20.2.2.1 - Disposition Code 50 (Not in File)

(Rev. 1, 10-01-03)

Disposition code 50 can come with any of the following seven error codes:

1. With Error Code 5052 - Beneficiary Identification Incorrect - The name and/or claim number shown on the bill is incorrect or claim number is not in file. If the TNIF file does not indicate another Host, the beneficiary's records may not have been assigned to a Host and are still resident at CMS or they were assigned to another Host site and the TNIF File was not updated. When the Host is not sure which is the case, it gives disposition code 50 and Trailer 08 with error code 5052 on the reply to the Satellite. Carriers and FIs verify through inquiry to the Host that the HICN is correct on the bill. If the bill is correct, and the Host HIMR agrees with the reject (no record), carriers and FIs must notify the Host of the error. The Host will contact CMS to determine eligibility.

2. With Error Code 5054 - The Host returns code 50 with Trailer 08 and error code 5054 when an auxiliary indicator is present on the CWF Beneficiary Master Record, but no auxiliary record is found.

- Concurrent with this response to the Satellite, the Host sends a request for transfer to CMS requesting the beneficiary's records from CMS' Master File.
- The carrier or FI must recycle the claim every four working days until an approval, adjustment or reject (AAR) response is received, or 45 working days have passed since receipt of the original code 50.
- The carrier or FI reports through locally established procedures to the Host if 45 days pass with no AR response.

3. With Error Code 5055 - The Host returns code 50 with Trailer 08 and error code 5055 (Beneficiary Blocked at CWF Host and CMS Batch Pending Clerical Update) if CMS must investigate a beneficiary's entitlement because of suspicion of fraud or abuse. The Satellite recycles the claim every 15 working days until otherwise notified.

Definition of Day One for CWF Satellite Recycle - Day one is the day that the Satellite receives the disposition code back from the Host. For example, a Satellite sends the update file to the Host on Monday, April 1, at 10 p.m. The Satellite receives the response file from its Host site at 9 a.m. Tuesday, April 2. Tuesday, April 2, is day one for Satellite recycle.

4. With Error Code 5056 - The Host returns code 50 with Trailer 08 and error code 5056 (Skeleton - No Beneficiary Record on HI Master File) when the HICN involved is for a beneficiary whose date of death is prior to 1975.

- The records for these beneficiaries have been purged from the file.
- Carriers and FIs research the HICN and confirm that the HICN submitted on the claim is correct. If incorrect, it resubmits the claim with the correct HICN.
- If the originally submitted HICN was correct, carriers or FIs refer the case to the RO.

5. With Error Code 5057 - The Host returns disposition code 50 with Trailer 08 and error code 5057 (Skeleton on HI Master File). This indicates that the beneficiary has died.

- There has been no claims activity for six months since date of death, and the beneficiary information is located on the inactive file.
- Carriers and FIs research the HICN and confirm that the HICN submitted on the claim is correct. If incorrect, resubmit the claim with the correct HICN.
- If the originally submitted HICN was correct, the carrier or FI recycles the claim every 15 working days to allow CMS time to retrieve the records.
- After 45 working days have passed with no approval, adjustment, or reject (AAR) response, Satellites contact their RO.

6. With Error Code 5058 - The Host returns disposition code 50 with Trailer 08 and error code 5058 (Blocked). The records have been blocked due to cross-reference activity. There are two numbers for one beneficiary, both of which show claims activity. The information is manually placed under one primary number in one record.

- Satellites recycle the claim every 15 working days to allow time for CMS processing.
- After receiving a second code 58, they contact the RO.

7. With Error Code 5059 - The Host returns this as disposition code 50 and Trailer 08 with error code 5059 (Frozen). Miscellaneous clerical corrections are being made to these beneficiary records.

- Satellites recycle the claim every 15 working days.
- After receiving a second code 59, they contact the RO.

20.2.2.2 - Disposition Code 51 (True Not in File on CMS Batch System)

(Rev. 1, 10-01-03)

The Host gives this response with a 08 Trailer and error code 5052. The CMS has performed an alpha search of its records and cannot locate the beneficiary's records. Alpha search is the process of searching for the records based on the first six positions of the surname. All beneficiaries with the same first six letters in their surnames are listed with their HICNs. The system checks for possible matches, including the possibility that numbers were transposed. This search is performed only if no match is found during the search by HICN.

This code can be given in two forms:

1. With Trailer 01 - Trailer 01 will contain a possible corrected HICN. The carrier or FI investigates the possible HICN and, if it believes the new HICN is for the same beneficiary, it resubmits the claim with the new HICN to the Host. The CWF will respond with the appropriate disposition code and any associated trailers for processing the claim.

2. Without Trailer 01 - This response indicates that after performing the alpha search operation, no match is found against the HICN submitted and CMS records. Since Medicare eligibility cannot be established, the carrier or FI must deny the claim using the following messages:

MSN 5.2 - "The name or Medicare number was incorrect or missing. Please check your Medicare card. If the information on this notice is different from your card, contact your provider."

Adjustment Reason Code 16 - "Claim/service lacks information which is needed for adjudication." Additional information is supplied using remittance advice remarks codes whenever appropriate.

Remittance Advice Remark Code MA27 - "Missing/incomplete/invalid entitlement number or name shown on the claim."

20.2.2.3 - Disposition Code 52 (Beneficiary Record at Another Host)

(Rev. 1, 10-01-03)

- When CMS receives a request for transfer, it searches its Master File to determine if the Beneficiary Record resides at another Host.
- The CMS first searches the record based on the HICN. If a match is found, and the beneficiary has not already been assigned to a Host, CMS sends the records to the requesting Host. After the Host receives the record, it can process the claim from the Satellite on its next cycle.

- If a match is found that indicates the beneficiary has been assigned to another Host, CMS sends the requesting Host a code 52. The requesting Host then sends the claim information to the receiving Host that has the Beneficiary Record.
- The requesting Host will give the processing Satellite a code 52 and Trailer 08 with a 5052 error code.
- The Satellite holds the claim and resends (recycles) it in five working days to see if there is a response waiting.
- If the response is present on the first recycle of the claim, the Satellite finishes processing the claim according to the response.
- If a response is not present, the Satellite receives another disposition code 52 and the claim is sent to the proper Host for processing.
- The Satellite recycles the claim after another five working days, and continues recycling the claim until it receives an approval, adjustment, or reject (AAR) response, or until 45 working days have passed.
- After 45 working days have passed with no AAR response, the Satellite reports the problem to the Host through locally established reporting procedures.

20.2.2.4 - Disposition Code 53 (Record in CMS Alpha Match)

(Rev. 1, 10-01-03)

- If CMS sends a claim to alpha search, it must send a disposition code 53 to the Host. The Host puts a code 53 on its TNIF file.
- The Satellite receives code 53 and Trailer 08 with a 5052 error code on the next recycle of the claim.
- The Satellite must recycle the claim 15 working days after receiving this code.
- If an AAR response is not received after the receipt of the third code 53 for the same claim, the Satellite must deny the claim using the following messages:

MSN message 5.1: "Our records show that you do not have Medicare entitlement under the number shown on this notice. If you do not agree, please contact your local Social Security office."

Remittance remark code MA61: "Did not complete or enter correctly the patient's social security number or health insurance claim number."

20.2.2.5 - Disposition Code 54 (Matched to Cross-referenced HICN)

(Rev. 1, 10-01-03)

- The Host provides the Satellite with disposition code 54 and Trailer 08 with error code 5052 when it discovers a cross-reference number in its own files for the name or number the Satellite submitted. Disposition Code 54 applies only to carrier submitted claims. The possible number and the new full name is returned to the Satellite on Trailers 1 and 10.
- The carrier or FI investigates the information provided and corrects the information on the claim and resends it.
- If the Satellite continues to receive a code 54, it contacts the Host through locally established procedures.

20.2.2.6 - Disposition Code 55 (Personal Characteristic Mismatch)

(Rev. 1, 10-01-03)

- The Host provides the Satellite with this disposition code and Trailer 08 with error code 5052 when it discovers a mismatch of name and personal characteristics such as sex or date of birth.
- The Host returns what it believes to be the proper information on Trailer 10. The header portion of the response also contains the corrected sex and birth date, if applicable.
- The carrier or FI investigates the information provided. The carrier or FI corrects the information on the claim, and resends the claim.
- If the carrier or FI continues to receive a code 55, it contacts the Host through locally established procedures.

20.2.3 - MSP Maintenance Response Record

(Rev. 1, 10-01-03)

B3-6005.3

This informational record is sent in response to the MSP Maintenance Transaction Record sent by the Satellite (See §20.1.1 for MSP Maintenance Transaction Record processing procedures. Note that there have been significant changes in this process.) It acknowledges the Host's receipt of the MSP Maintenance Transaction Record and indicates any errors or informational data. Following are the types of codes and other information associated with this record:

- Disposition codes;
- MSP consistency error codes;
- MSP utilization error codes; and
- Basic Reply Trailers.

For more detailed information about MSP processing in CWF see the MSP Manual, Chapters 4 and 5.

30 - Online Health Insurance Master Record (HIMR) Display

(Rev. 1, 10-01-03)

A3-3800.3, B3-6007

Beneficiary entitlement and utilization data on all nine CWF databases is available online through the HIMR transaction. It allows the Satellite to do further investigation about a claim or inquire about beneficiary entitlement and utilization status. This function is a display of information only. The user at the Satellite site cannot make changes to the screens accessed through HIMR. Refer to CWF Systems Documentation for detailed information about individual HIMR screens. Or see <http://cms.csc.com/cwf/downloads/docs/pdfs/himrnav.pdf> and <http://cms.csc.com/mgmntcwf/docmgmt/pdfs/promptr.pdf> for an explanation and layouts of all the available HIMR screens.

This information is applicable only to Satellites and Host site staff. Providers do not have access to the HIMR screens, but they can request eligibility information via the ELGA and ELGB transaction through their shared system. The response to the ELGA/ELGB is limited to a subset of information from the HIMR screen. See <http://cms.csc.com/cwf/downloads/docs/pdfs/scrHost.pdf> for more information on the HIQA transaction.

40 - Requesting Assistance in Resolving CWF Utilization

(Rev. 1, 10-01-03)

B3-6008

40.1- Requesting Assistance in Resolving CWF Utilization Problems

(Rev. 1, 10-01-03)

B3-6008.1

This section applies only to Satellites; it does not apply to providers.

In the normal course of claims processing activities, Satellites can expect to encounter problems involving the CWF Claim Record and/or basic reply record procedures. The action necessary to resolve the problem depends upon the problem identified. For utilization problems, the Satellite sends all master beneficiary, summary history, and inpatient summary history screen-prints for the beneficiary to the CWF HICR contractor for investigation. The Satellite takes the following steps:

- Put the error code causing the problem in the upper right-hand corner of the Beneficiary Master screen print;
- Mark on all of the screen prints exactly what the problem is and what is believed to be the correction needed;
- The Satellite (contractor) sends these marked screen prints to the CWF HICR contractor. They coordinate with the other contractor to determine who needs to correct the problem; and
- The CWF HICR contractor will investigate the problem and correct it. If a response is not received within 45 days of mailing the request for assistance, the contractor sends a second request marked "SECOND REQUEST."

NOTE: Congressionals are faxed to the CWF HICR contractor. Faxes must be reviewed and corrective action taken within 24-48 hours of receipt.

For problems involving the Host CWF Site, the Satellite utilizes the HICR transaction. This transaction provides the Host CWF site a method of creating transactions that correct the local database.

For more information, see CWF System Documentation,
<http://cms.csc.com/mgmntcwf/docmgmt/pdfs/scrHost.pdf>.

40.2- Social Security Administration (SSA) Involvement

(Rev. 1, 10-01-03)

B3-6008.4

SSA maintains the Master Beneficiary Record (MBR) from which the Health Insurance (HI) Master Record is established. The CWF's eligibility record is accreted from this HI Master Record. The HI Master Record is updated periodically from a variety of sources, including the MBR, and in turn updates the Host maintaining the CWF record. However, errors occur where the MBR fails to correctly update the HI Master Record or where the HI Master Record fails to correctly update the CWF record.

If the problem is caused by difficulties in determining the beneficiary's correct entitlement status, the carrier or FI must request assistance of the SSO. The SSO is responsible for processing the case. Examples of situations covered by this procedure are:

- Problems involving Railroad Retirement Board (RRB) jurisdiction, i.e., the RRB has jurisdiction of the beneficiary's Medicare, and the claim was erroneously referred to the area carrier;
- Evidence that a beneficiary has utilization under more than one health insurance claim number (HICN), but the Satellite is not aware of any cross-reference action taken by CMS; or
- Assistance is needed to obtain or verify a beneficiary's name and/or HICN. (See specific procedures in §20.2.2.6 under disposition code 55.)

In the event the SSO is unable to resolve the entitlement problem, e.g., a disposition code 55 is received after SSA verified the beneficiary's name and/or HICN, the Satellite requests assistance from the RO. It includes complete details of the nature of the problem and a description of its efforts to resolve it.

40.3 - Critical Case Procedure - Establishing Entitlement

(Rev. 1, 10-01-03)

A3-3524, B3-6008.2

The Satellite uses the "critical case" procedure (see §40.4, below) to expedite the processing of claims which have been delayed because of an error in the beneficiary's CWF Master Record. The "critical case" procedure provides speedy correction of the master record. The Satellite uses this procedure when there is an error in the CWF Master Record, which prevents the receipt of an approval disposition code on the basic reply record. This may occur when one of the following conditions exists:

- The Satellite is unable to make payment on a claim even though the beneficiary apparently has entitlement because CWF transmitted a Basic Reply Record with an inaccurate or repeated disposition code of "50," "51," "52," "53," "54," "55," "57," "58," "59," "60," "61," "AB," "CI," "ER," "UR," "CR;" or
- The Satellite received a Basic Reply Record and the recycled CWF Claim Records have not received a disposition code, which permits processing the claim to payment or denial.

40.4 - Referral of Critical Cases to the Regional Office

(Rev. 1, 10-01-03)

A3-3524, B3-6008.3

When the Satellite identifies a claim meeting the criteria listed below, it contacts the RO via established referral methods. The Satellite identifies the beneficiary by name and HICN, specifies the nature of the problem, states that the criteria are met, and gives the dates of all actions. The Satellite provides all available supporting documentation.

Examples of such documentation are:

- Social Security Administration's (SSA) reply to Form CMS-1980 in the case of entitlement questions; and
- A copy of the Health Insurance Master Record Entitlement Status Query (ESQ) received from an SSA District Office.

The criteria are:

- Two follow-ups have been made to the Social Security Office (SSO) and the CWF Master Record has not been corrected;
- At least 60 days have elapsed since the correction procedures were initiated;
- A serious hardship to the beneficiary or a public relations problem has developed;
- Corrections or changes to HMO termination dates are necessary; and
- The SSO response indicates that both the MBR and HI Master Records are correct.

The Satellite marks the information "CRITICAL CASE." The Satellite flags the file for special handling and expedites the claim as soon as the reply is received.

The Satellite must diary the case for 30 calendar days. By that time the RO should have a response and advise the Satellite. If the Satellite receives a positive basic reply record before hearing from the RO, it notifies the RO.

50 - Requesting or Providing Assistance to Resolve CWF Rejects

(Rev. 1, 10-01-03)

A3-3860

When a Satellite has difficulty processing a bill because a prior bill was incorrectly processed and posted to CWF by another Satellite (carrier or FI), the two contractors must work together to resolve the error. Where help is needed from another contractor (carrier or FI), the submitting Satellite requests assistance from the contractor whose bill was processed incorrectly. The contractor that processed the bill is identified in the CWF reject trailer.

50.1 - Requesting Contractor Action

(Rev. 1, 10-01-03)

A3-3860

The requesting contractor furnishes the assisting contractor with sufficient information to identify the issue, and perform the necessary resolution actions. The data shown on the Request for Assistance Form (see Exhibit 1) is needed. This format must be used when designing a form letter so that both the requesting contractor's address and the assisting contractor's address will be visible through a window envelope. A separate page is used for each request to enable the assisting contractor to return each claim as completed instead of holding claims until all claims on a request are completed. The requesting contractor enters its request after "The following action is requested." The requesting contractor provides claim-identifying information as shown. The requesting contractor adds information to help it associate the response with its pending record, if needed.

If a response has not been received within 30 calendar days of the request, the requesting contractor sends a follow-up request. If no response is received within an additional 15 days, follow-up with the RO responsible for the assisting contractor. A status report indicating and defining problems that prevent processing of the request is considered a response in deciding whether to follow-up with the RO.

In addition, the requesting contractor considers whether an interim payment to the provider without CWF approval is appropriate. (See §60 of this chapter for procedures for paying without CWF approval.)

50.2 - Assisting Contractor Action

(Rev. 1, 10-01-03)

A3-3860

Upon receipt of a request for assistance, the assisting contractor adjusts or cancels the posted bill, as appropriate, and informs the requesting contractor by annotating the

request form (under explanation of action taken by assisting contractor) with a description of its action (e.g., adjustment cleared CWF (date), current dates of service are _____.)

The assisting contractor completes corrective actions within 30 calendar days of receiving the request. If it cannot complete action within 30 days, provide a status reply explaining the reasons on a copy of the request form. The assisting contractor sends a copy of the reply to the RO.

The assisting contractor uses the request form on all correspondence to the requesting contractor to facilitate association of its response with the pending action.

50.3- Format for Requesting Assistance From Another Contractor on CWF Edits

(Rev. 1, 10-01-03)

A3-3860

Exhibit 1 contains the required format for requesting assistance. The requesting contractor uses that format in designing its form letter so that both its address and the assisting contractor's address will be visible through a window envelope. The requesting contractor completes all data elements. Note that the form is designed so that a standard number 10 - 4 1/8 by 9 1/2 inch window envelope can be used for your request. The assisting contractor may refold the form and use the same size window envelope in its reply. The requesting contractor enters its address in the bottom address space, and uses the following in the top address space:

60 - Paying Claims Without CWF Approval

(Rev. 1, 10-01-03)

A3-3800.4, A3-3863, B3-6009

The CWF must approve each claim before it is paid. There may be special circumstances, however, when it is necessary to pay claims outside of the CWF system. The CMS will notify the contractor of these instances. They include:

- New coverage policies are enacted by Congress with effective dates that preclude making the necessary changes to CWF timely; and
- Errors are discovered in CWF that cannot be corrected timely. Carriers and FIs are responsible for reporting CWF problems to their host sites.

60.1 - Requesting to Pay Claims Without CWF Approval

(Rev. 1, 10-01-03)

A3-3800.4, A3-3863, B3-6009.1

The contractor may also request approval from the RO in specific situations to pay claims without CWF approval. Examples of such situations are:

- Other contractors cannot complete action to remove an impediment that blocks a contractor from processing of a claim; and/or
- A systems error cannot be corrected timely, and the provider's cash flow will be seriously endangered.
- Administrative Law Judge (ALJ) decisions, court decisions, and CMS instructions in particular cases may necessitate that payment be made outside the normal CWF process.

60.2- Procedures for Paying Claims Without CWF Approval

(Rev. 1, 10-01-03)

A3-3800.4, A3-3863, B3-6009.2, R1886A3

Before a claim can be paid outside of CWF, the contractor must obtain approval from CMS Central Office or the RO. In all instances involving payment outside CWF, the contractor applies the following procedures:

- FIs submit the claim with an "X" in the tape-to-tape flag, and the system will determine payment as if the payment were final. Process inpatient PPS payments through MCE, Grouper and Pricer. Make hospice payments using the appropriate

hospice rate. Pay for ESRD visits using the composite rate. Use the appropriate fee schedules or interim rates. Apply deductible and coinsurance based on the most current data available. Do not apply the 70 percent reduction applicable to accelerated payment;

- Carriers should follow shared system procedures to avoid sending claim to CWF at time of payment, but maintain a record for later submission.
- Pay interest accrued through the date payment is made on clean claims. Do not pay any additional interest.
- Maintain a record of payment and implement controls to be sure that duplicate payment is not made, i.e., when the claim record is updated to CWF, or in response to a duplicate request by the provider.
- Monitor CWF to determine when the impediment to CWF processing is removed. Update CWF when the impediment is removed. Show the actual payment date outside CWF in the scheduled payment data field.
- Consider the claim processed for workload and expenditure reports when it is paid.
- Submit to the RO Consortium Contractor Manager (CCM) by the 20th of each month a monthly report of all claims paid without CWF approval. The list of claims paid outside of CWF is to include the following information:
 - HICN
 - Name
 - Provider number
 - Total charges
 - From and through date
 - Amount paid
 - Paid date
 - CWF error condition preventing payment.

Also, include summary data for each edit code showing claim volume and payment.

Send a copy of the summary data to:

CMS, OIS
7500 Security Blvd.
Baltimore, MD 21244-1850

70 - Change Control Procedures

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010

The CWF software is changed quarterly to accommodate revised CMS requirements, new provisions of law, to correct errors, or to enhance the system. Carriers and FIs may also request changes to CWF through certain change control procedures.

70.1- Satellite Procedure

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.1

When a Satellite has a recommendation for software changes, it follows the change control process below:

- Enter change requests into the CWF Information Management System (INFOMAN). For specific instructions about INFOMAN, refer to CWF Systems Documentation chapter on the Information Management System at <http://cms.csc.com/cwf/downloads/docs/pdfs/overcwf.pdf>
- .After entering change requests into INFOMAN, submit all supporting documentation to the Host for review and forwarding to both CMS and the CWF Maintenance Contractor (CWFM) for consideration and entry into the Change Control System.
- Monitor progress of all changes submitted from your site through INFOMAN.
- Review implementation of all changes from your own site to insure that needs are addressed.

70.2 - Process Flow of a Change Request

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.2

- Complete a CMS CWF Change Request (CR) through INFOMAN. When the CR is created a CR number will automatically be assigned.
- Forward three copies of all supporting documentation to the Host site. Include the CR number on all documentation. The Host will review it and the CR for accuracy, completeness, and relevance. The review may also determine whether a problem reported is a CWF problem or a problem with the Satellite's software.

- When the Host approves the CR, it releases the Change Request to the CWFM and to the CMS central office in accordance with current procedures.
- The CMS and the CWFM review the Change Requests as received throughout the month.
- The CMS distributes all change requests to the appropriate CMS component for review and approval as they are received.
- A monthly Change Control meeting of CMS and CWFM staff is held to schedule approved Change Requests for release.
- Following the meeting, the CWFM enters approval and priority status of all Change Requests into the automated system. As work progresses, the CWFM enters the status of all changes, Quality Assurance (QA) activities and work performed.

70.3 - Handling Emergency Problems and Problems With Recent CWF Releases

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.3

A problem is considered an emergency if a large number of claims are paid incorrectly, cannot be paid, or the Satellite/Host system abnormally ends (abends). When an emergency occurs, the Satellite follows these procedures:

1. The Satellite will convey information about the emergency to the Host immediately. The Satellite must be able to submit documentation of the problem.
2. The Host will report the problem to the CWFM immediately via CWFM customer service. The service is available 24 hours a day, 7 days a week.
3. During business hours, CWFM will respond immediately. After business hours, CWFM will contact the Host within one hour of report of the problem.

70.4 - Distribution of "CWF Change Control" Reports

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.4

- CWFM distributes a monthly "Status of CWF Changes" report and "Schedule of CWF Changes" report to all Host sites, CMS ROs, and CMS CO staff.
- Each Host site distributes the reports to its Satellite sites within three working days of receipt.

70.5 - Channels of Communication

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.5

All Satellite inquiries should be made to the Host staff, according to locally established procedures.

70.6 - Schedule of CWF Software Releases

(Rev. 1, 10-01-03)

A3-3800.5, B3-6010.6

- **Regular Releases** - Approved CWF Change Requests are programmed into the regular releases of updated CWF software. These releases are quarterly.
- **Emergency Releases** - If there is a serious problem with a release of CWF software, CMS CO and the CWF M have the option to prepare and issue emergency releases of CWF software to resolve the problem(s).
- **Special Releases** - The CWF M will issue special releases as directed by CMS, which contain software changes that affect a specific topic or subject.

80 - Processing Disposition and Error Codes

(Rev. 1, 10-01-03)

B3-6006, CWF DispCode

<http://cms.csc.com/cwf/downloads/docs/pdfs/dispcode.pdf>

The results of CWF processing are communicated through a set of codes categorized as either disposition or error codes. There are specific disposition codes for inquiry, transfer/not in file request, and each claim type. Claims have consistency, utilization, A/B crossover, and duplicate error codes. Transactions for End Stage Renal Disease (ESRD), Medicare Secondary Payer (MSP), and Certificate of Medical Necessity (CMN) error codes are also available.

If the Host rejects a claim, the FI or carrier must suspend the claim and review it. After the review is complete and corrections made, they resubmit the claim with an indication that a review was performed and corrections made.

80.1 - Disposition Codes

(Rev. 1, 10-01-03)

80.1.1 - CWF Part A Inquiry Reply Disposition Codes

(Rev. 1, 10-01-03)

- 01 - Approved (never used Part A services)
- 02 - Approved (used some Part A services)
- 03 - Reject
- 20 - Qualified approval, may require further investigation
- 25 - Qualified approval, begins a new benefit period
- 50 - Not in file
- 51 - Not in file on CMS batch system
- 52 - Master Record housed at another CWF site
- 53 - Record in CMS alpha match
- 55 - Does not match master record
- 60 - I/O error on database
- 61 - Cross reference/database problem
- 62 - Beneficiary Master Hospice Auxiliary Indicator is on, but no Hospice Auxiliary record found
- 63 - Beneficiary Master HMO900 Auxiliary Indicator is on, but no HMO900 Auxiliary record found
- ER - Consistency Edit Reject
- AA - Auto Adjust error
- AB - Transaction caused CICS ABEND
- CI - CICS processing problem
- SV - Security Violation

80.1.2 - CWF Part B/Carrier Inquiry Reply Disposition Codes

(Rev. 1, 10-01-03)

01 - Accepted item

- 03 - Reject
- 20 - Qualified approval, may require further investigation
- 50 - Not in file
- 51 - Not in file on CMS batch system
- 52 - Master Record housed at another CWF site
- 53 - Record in CMS alpha match
- 55 - Does not match master record
- 60 - I/O error on database
- 61 - Cross reference/database problem
- 62 - Beneficiary Master Hospice Auxiliary Indicator is on, but no Hospice Auxiliary record found
- 63 - Beneficiary Master HMO900 Auxiliary Indicator is on, but no HMO900 Auxiliary record found
- ER - Consistency Edit Reject
- AA - Auto Adjust error
- AB - Transaction caused CICS ABEND
- CI - CICS processing problem
- SV - Security Violation

80.1.3 - CWF Transfer Request Reply Disposition Codes

(Rev. 1, 10-01-03)

These reply disposition codes are used in response to a Host site's request for a transfer of beneficiary records.

- 01 - Accept; record will be requested from CMS central office
- 02 - Reject; request already in progress
- 50 - Reject; record is already on CWF database
- 60 - I/O error on data base
- ER - Consistency Edit Reject
- AB - Transaction Caused CICS ABEND
- CI - CICS processing problem
- SV - Security Violation

80.1.4 - Consolidated Claims Crossover Process

(Rev. 158, 04-30-04)

A. The Mechanics of the CWF Claims Selection Process and BOI and Claim-based Reply Trailers

1. CWF Receipt and Processing of the Coordination of Benefits Agreement Insurance File (COIF)

Effective July 6, 2004, the COBC will begin to send copies of the Coordination of Benefits Agreement Insurance File (COIF) to the nine CWF host sites on a weekly basis. The COIF will contain specific information that will identify the COBA trading partner, including name, COBA ID, address, and tax identification number (TIN). It will also contain each trading partner's claims selection criteria exclusions (claim or bill types that the trading partner does not want to receive via the crossover process) along with an indicator (Y=Yes; N=No) regarding whether the trading partner wishes its name to be printed on the Medicare Summary Notice (MSN). During the COBA parallel production period, which is estimated to run from July 6, 2004, to October 1, 2004, CWF will exclusively return an "N" MSN indicator to the intermediary or carrier.

The CWF shall load the initial COIF submission from COBC as well as all future weekly updates.

Upon receipt of a claim, the CWF shall take the following actions:

- a) Search for a COBA eligibility record on the BOI auxiliary record for each beneficiary and obtain the associated COBA ID(s) [NOTE: There may be multiple COBA IDs];***

- b) *Refer to the COIF associated with each COBA ID (NOTE: CWF shall pull the COBA ID from the BOI auxiliary record) to obtain the COBA trading partner's name and claims selection criteria;*
- c) *Apply the COBA trading partner's selection criteria; and*
- d) *Transmit a BOI reply trailer 29 to the Medicare intermediary or carrier only if the claim is to be sent, via 837 COB flat file or National Council for Prescription Drug Programs (NCPDP) file, to the COBC to be crossed over. (See Pub.100-4, Chap. 28, §70.6 for more information about the claim file transmission process involving the Medicare intermediary or carrier and the COBC.)*

Effective with the October 2004 systems release, CWF shall read the COIF submission to determine whether a Test/Production Indicator "T" (test mode) or "P" (production mode) is present. CWF will then include the Test/Production Indicator on the BOI reply trailer 29 that is returned to the Medicare intermediary or carrier. (See additional details below.)

2. BOI Reply Trailer 29 Processes

For purposes of eligibility file-based crossover, if CWF selects a claim for crossover, it shall return a BOI reply trailer 29 to the Medicare intermediary or carrier. The returned BOI reply trailer 29 shall include, in addition to COBA ID(s), the COBA trading partner name(s), an "A" crossover indicator that specifies that the claim has been selected to be crossed over, the insurer effective and termination dates, and a 1-digit indicator ["Y"=Yes; "N"=No] that specifies whether the COBA trading partner's name should be printed on the beneficiary MSN. *Effective with the October 2004 systems release, CWF shall also include a 1-digit Test/Production Indicator "T" (test mode) or "P" (production mode) on the BOI reply trailer 29 that is returned to the intermediary or carrier.*

A. MSN Crossover Messages

As specified above, during the COBA parallel production period (July 6, 2004, to October 1, 2004), CWF will exclusively return an "N" MSN indicator via the BOI reply trailer, in accordance with the information received via the COIF submission. If an intermediary or carrier receives a "Y" MSN indicator during the parallel production period, it shall ignore it.

Beginning with the October 2004 systems release, when a contractor receives a BOI reply trailer 29 from CWF that contains a Test/Production Indicator "T" (test mode), it shall ignore the MSN Indicator provided on the trailer. Instead, the Medicare intermediary or carrier shall follow its existing procedures for inclusion of trading

partner names on MSNs for those trading partners with whom it has existing Trading Partner Agreements (TPAs).

Beginning with the October 2004 systems release, when an intermediary or carrier receives a BOI reply trailer 29 from CWF that contains a Test/Production Indicator “P” (production mode), it shall read the MSN indicator (Y=Yes, print trading partner’s name; N=Do not print trading partner’s name) returned on the BOI reply trailer 29. (Refer to Pub.100-4, chapter 28, §70.6 for additional details.)

B. Electronic Remittance Advice (835)/Provider Remittance Advice Crossover Messages

Beginning with the October 2004 release, when contractors receive a BOI reply trailer (29) from CWF that contains a “T” Test/Production Indicator, they shall not print information received from the BOI reply trailer (29) in the required crossover fields on the 835 Electronic Remittance Advice or other provider remittance advice(s) that is/are in production. Contractors shall, however, populate the 835 ERA (or provider remittance advice(s) in production) with required crossover information when they have existing agreements with trading partners.

Beginning with the October 2004 release, when contractors receive a BOI reply trailer (29) from CWF that contains a “P” Test/Production Indicator, they shall use the returned BOI trailer information to take the following actions on the provider’s 835 Electronic Remittance Advice:

- 1) Record code 19 in CLP-02 (Claim Status Code) in Loop 2100 (Claim Payment Information) of the 835 ERA (v. 4010-A1). [NOTE: Record “20” in CLP-02 (Claim Status Code) in Loop 2100 (Claim Payment Information) when Medicare is the secondary payer.]*
- 2) Update the 2100 Loop (Crossover Carrier Name) on the 835 ERA as follows:*
 - NM101 [Entity Identifier Code]—Use “TT,” as specified in the 835 Implementation Guide.*
 - NM102 [Entity Type Qualifier]—Use “2,” as specified in the 835 Implementation Guide.*
 - NM103 [Name, Last or Organization Name]—Use the COBA trading partner’s name that accompanies the first sorted COBA ID returned to you on the BOI reply trailer.*
 - NM108 [Identification Code Qualifier]—Use “PI” (Payer Identification.)*
 - NM109 [Identification Code]—Use the first COBA ID returned to you on the BOI reply trailer. (See line 24 of the BOI aux. file record.*

If the 835 ERA is not in production and the contractor receives a “P” Test/Production Indicator, it shall use the information provided on the BOI reply trailer (29) to populate the existing provider remittance advices that it has in production.

When a beneficiary’s claim is associated with more than one COBA ID (i.e., the beneficiary has more than one health insurer/benefit plan that has signed a national COBA), CWF shall sort the COBA IDs and trading partner names in the following order: 1) Eligibility-based Medigap, 2) Supplemental, 3) TRICARE, 4) Others, and 5) Eligibility-based Medicaid. When two or more COBA IDs fall in the same range (see item 24 in the BOI Auxiliary File table above), CWF shall sort numerically within the same range.

3. Claim-Based Medigap and Medicaid Crossover Processes Involving CWF

As with eligibility file-based crossover, the CWF shall load the initial COIF submission from the COBC as well as all future updates that pertain to claim-based Medigap insurers and State Medicaid Agencies.

For claim-based crossover, the CWF shall only search the Coordination of Benefits Agreement Insurance File (COIF) if the carrier or DMERC has included a claim-based Medigap ID (55000—59999) or claim-based Medicaid ID (78000-79999) in field 36 of the HUBC or HUDC query. If claim-based COBA IDs are entered in field 36 of the HUBC or HUDC query, CWF shall:

- a) Search the COIF to locate the claim-based Medicaid and/or Medigap COBA ID and corresponding COBA Trading Partner Name;*
- b) Apply the Medigap claim-based trading partner’s claims selection criteria;*
- c) Return a Claim-based reply trailer 37 to the carrier or DMERC that includes values for claim-based COBA ID (sorted by Medigap, then Medicaid), COBA Trading Partner Name, and MSN Indicator when a claim-based COBA ID is found on the COIF and the claim is to be sent to the COBC to be crossed over;*
- d) Return an alert code 7704 on the “01” response via a Claim-based alert trailer 21 to the carrier or DMERC, as specified in Requirement 23 above, if a claim-based COBA ID in the Medigap claim-based range (55000-59999) is not located on the COIF; and*
- e) Return nothing to the carrier or DMERC if a Medicaid claim-based COBA ID (78000-79999) is not found on the COIF.*

As established above, the CWF will only return a Claim-based reply trailer 37 if: 1) it locates a claim-based COBA ID on the COIF, and 2) the claim is to be sent to the COBC for crossover.

4. CWF Treatment of Non-assigned Medicaid Claims

If CWF receives a non-assigned Medicare claim for a beneficiary whose BOI auxiliary record contains a COBA ID with a current effective date in the Medicaid eligibility-based range (70000-77999), it shall reject the claim. The CWF shall return an edit to the carrier or DMERC that specifies that non-assigned Medicare claims cannot be sent to Medicaid. At the same time, CWF shall also return a Medicaid reply trailer 36 to the carrier or DMERC that contains the trading partner's COBA ID and beneficiary's effective and termination dates under Medicaid. If the carrier or DMERC determines that the non-assigned claim's service dates fall during a period when the beneficiary is eligible for Medicaid, it shall convert the assignment indicator from "non-assigned" to "assigned" and retransmit the claim to CWF. After the claim has been retransmitted, the CWF will only return a BOI reply trailer to the carrier or DMERC if the claim is to be sent to the COBC to be crossed over.

80.1.5 - Claims Crossover Disposition Indicators

(Rev. 158, 04-30-04)

Effective with the October 2004 systems release, when a COBA trading partner is in production mode (Test/Production Indicator sent via the COIF submission=P), CWF shall annotate each processed claim on detailed history in the Health Insurance Master Record (HIMR) with a claims crossover disposition indicator after it has applied the COBA trading partner's claims selection criteria. (See the table below for a listing of the indicators.) In addition, when a COBA trading partner is in production mode, CWF shall annotate each processed claim with a 10-position COBA ID (5-digit COBA ID preceded by 5 zeroes) to identify the entity to which the claim was crossed or not crossed, in accordance with the terms of the COBA.

CWF shall not annotate processed Medicare claims on the detailed history screens in HIMR when a COBA trading partner is in test mode (Test/Production Indicator sent via the COIF submission=T).

Once the claims crossover process is *fully* consolidated under the Coordination of Benefits Contractor (COBC), Medicare intermediary and carrier customer service staff will have access to a CWF auxiliary file that will display the crossover disposition of each beneficiary claim. The crossover disposition indicators that will appear on the HIMR detailed history screens (INPH, OUTH, HOSH, PTBH, DMEH, and HHAH) are summarized below.

Claims Crossover Disposition Indicator	Definition/Description
A	This claim was selected to be crossed over.
B	This Type of Bill (TOB) excluded.
C	Non-assigned claim excluded.
D	Original Medicare claims paid at 100%.
E	Original Medicare claims paid at greater than 100% of the submitted charges excluded.
F	100% denied claims, with no additional beneficiary liability excluded.
G	100% denied claims, with additional beneficiary liability excluded.
H	Adjustment claims, monetary, excluded.
I	Adjustment claims, non-monetary/statistical, excluded.
J	MSP claims excluded.
K	This claim contains a provider identification number (ID) or provider state that is excluded by the COBA trading partner.
L	Claims from this Contractor ID excluded.
M	The beneficiary has other insurance (such as Medigap, supplemental, TRICARE, or other) that pays before Medicaid. Claim excluded by Medicaid.
N	NCPDP claims excluded.

NOTE: In the future, CMS may expand the above list beyond Indicator “N.” Once all remaining one-digit alpha indicators are committed, CMS will institute the use of two-position claims crossover disposition indicators.

Utilization edit rejects are denoted by a value of UR in the disposition field on the Part A reply record. Trailer 08, containing one utilization error code, will follow. Trailer 12 will be returned for UR and AA dispositions. Listed below are the possible utilization error codes with a general description.

Inpatient, SNF, Outpatient, Home Health, and Hospice Utilization Error Codes

Error Code	Explanation
-------------------	--------------------

AAAA	HOSPITAL
------	----------

UR "AAAA" is set for VA claims which have passed all consistency and utilization edits.

Purpose:

To indicate that no errors have been set.

Resolution:

No resolution necessary.

RT01	OP
------	----

Claim is waiting retrieval of archived history. Claim is to be recycled in six days.

Purpose:

To recall archived outpatient history that relates to current claim processing.

Resolution:

The Host retrieves the archived history records. This retrieval process executes weekly. Resubmit the claim in six days.

RT02	OP
------	----

Attempted history retrieval, but the beneficiary history pointers were full.

Purpose:

The retrieval process found a matching record, but the pointers are full, and the record cannot be retrieved from archived history.

Resolution:

Contact the Host to perform an ARCMINI purge (archiving and purging of pointers) to retrieve the history record.

**Error
Code**

Explanation

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Resolution:

Return to provider indicating that the period they are attempting to establish has a start date that conflicts with a Change of Ownership or a subsequent period. The provider will need to investigate and resubmit, if appropriate, with corrected information.

5129

HOSP

Hospice NOE (Bill Type 8XA) with Action Code of 2 and original Hospice Start Date (field 29) matches a current posted Hospice second, third, or fourth Period Start Date and the new Hospice Start Date is greater than the current posted Start1 Date and prior election period is not revoked.

Purpose:

CWF will not allow a gap to be created between two established Hospice periods unless a revocation of Hospice benefits has occurred on the prior period. For claims and periods after August 4, 1997, this edit will apply to periods 2 up to a maximum of 180 periods.

Resolution:

Return to provider indicating that the period they are attempting to establish has a start date that would create a gap between election periods. The provider will need to investigate and resubmit, if appropriate, with corrected information.

512A

HOSP

Hospice NOE (Bill Type 8XA) with Action Code of 2 and original Hospice Start Date (Field 29) matches a current posted Hospice period Start2 Date, but the new date is equal to or greater than the Change of Ownership Start2 Date for this election period.

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Error Code **Explanation**

Resolution:

Return to provider indicating that the period they are attempting to establish has a start date that conflicts with a Change of Ownership start date. The provider will need to investigate and resubmit, if appropriate, with corrected information.

5130 HOSP

Hospice NOE (Bill Type 8XA) with Action Code of 2 and original Hospice Start Date (field 29) matches a current posted Hospice period Start Date, and the new Hospice Start Date is less than current posted Start Date and is less than the prior Hospice period's Termination Date.

Purpose:

If a gap does not exist between the Hospice periods that will allow posting of the new Start Date, the prior period must be adjusted with a change of election notice prior to acceptance of change notices for subsequent periods. For claims and periods after August 4, 1997, this edit will apply to periods two up to a maximum of 180 periods.

Resolution:

Return to provider indicating that the period they are attempting to establish has a start date that conflicts with a prior period. The provider will need to investigate and resubmit, if appropriate, with corrected information.

5132 HOSP

Hospice NOE (Bill Type 8XA) with Action Code of 2 and original Hospice Start Date (field 29) matches a current posted Hospice Start1 Date and the new Hospice Start Date is greater than the Date of Earliest Billing Action (DOEBA) in the matching Hospice election period.

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Error Code	Explanation
-------------------	--------------------

Resolution:

Return to provider indicating that the period they are attempting to establish has a start date that conflicts with the Date of Earliest Billing Action (DOEBA). The provider will need to investigate and resubmit, if appropriate, with corrected information.

5133 HOSP

Hospice NOE (Bill Type 8XA) with Action Code of 2 and Original Hospice Start Date (field 29) matches a current posted Hospice Start Date and the new Hospice Start Date is greater than the Termination Date of the period and the period has been revoked by the beneficiary (Revocation Indicator is equal to 1).

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Resolution:

Return to provider indicating that the period they are attempting to establish has a start date that conflicts with the Termination Date of the period. The provider will need to investigate and resubmit, if appropriate, with corrected information.

5134 HOSP

Hospice NOE Bill Type 8XA with Action Code of 2 and Original Hospice Start Date (field 29) matches a current posted Hospice Start Date and the new Hospice Start Date is greater than the Start1 Date of the next posted Hospice election period (when present).

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

**Error
Code**

Explanation

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Resolution:

Verify Intermediary Number and resubmit if appropriate. Or, return to provider indicating that the Provider Number conflicts with previously posted information.

5141

HOSP

Hospice NOE Bill Type 8XB with Action Code of 2 and Start Date matches a posted Hospice period Start1 Date or Change of Ownership Start1 Date on the Hospice Master File, and a Start2 Date or Change of Ownership Start2 Date is present for the election period (only the latest provider within a period can revoke the election).

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Resolution:

Return to provider indicating that the period they are attempting to terminate has a start date that conflicts with a previously posted Change of Ownership date. The provider will need to investigate and resubmit, if appropriate, with corrected information.

5142

HOSP

Hospice NOE Bill Type 8XB with Action Code of 2 and NOE Hospice Start Date matches a posted Hospice period Start1, or Start2 Date, but the election period has not been revoked, or canceled (Revocation Indicator is zero).

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Error Code **Explanation**

Resolution:

Return to provider indicating that the period they are attempting to terminate has previously been revoked or canceled. The provider will need to investigate and resubmit, if appropriate, with corrected information.

5143 HOSP

Hospice NOE Bill Type 8XB with Action Code of 2 and NOE Hospice Start Date matches a posted Hospice period Start1 or Start2 Date but the NOE new Hospice Thru Date is greater than the CWF calculated Termination Date (Hospice Start1 Date +89 for the first and second periods, or +29 for the third period).

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Resolution:

Return to provider indicating that the period they are attempting to terminate has a Thru Date that conflicts with the CWF calculated Termination Date. The provider will need to investigate and resubmit, if appropriate, with corrected information.

5144 HOSP

Hospice NOE Bill Type 8XB with Action Code of 2 and NOE Hospice Start Date matches a posted Hospice period Start1 or Start2 Date and the NOE original Revocation Date (Field 29) is equal to the Hospice period Revocation Date but NOE Hospice Through Date is less than the Date of Last Billing Action (DOLBA) for the Hospice period.

Purpose:

To ensure that election periods are consistently established according to the beneficiary's entitlement.

Error Code **Explanation**

Resolution:

Return to provider indicating that the period they are attempting to terminate has a Thru Date that conflicts with a previously posted claim. The provider will need to investigate and resubmit, if appropriate, with corrected information.

5145 HOSP

Hospice NOE (Bill Type 8XB) with Action Code of 2, NOE Hospice Start Date matches a posted Hospice period Start1, or Start2 Date, and the NOE original Revocation Date (Field 29) is equal to the Hospice period Revocation Date, but a posted Hospice history is present with Occurrence Code 23 (Canceled Date), or 42 (Revocation Date).

Purpose:

CWF will not update a Hospice Revocation Date with a NOE transaction if a claim was the source of the posted Revocation Date. In this situation a debit/credit action must be performed to adjust the Hospice Revocation Date.

Resolution:

Return to provider indicating that the period they are attempting to terminate conflicts with a previously posted claim, a debit/credit action must be performed to adjust this revocation date.

5146 HOSP

Hospice NOE type 8xB with Action Code of 2 and NOE Hospice Start Date matches a posted Hospice period Start1 or Start2 Date and new Hospice Revocation Date is equal to zeros, and a later period is present with a Start1 Date not equal to the new calculated Hospice Termination Date plus one.

Purpose:

CWF will not accept a removal of a Revocation Date if a gap or an overlap would be created in the Hospice enrollment by doing so.

Resolution:

Return to provider indicating that the termination they are attempting to reverse would cause conflict with a later period. The provider will need to investigate and resubmit, if appropriate, with corrected information.

Purpose:

CWF will not create a new Hospice election period from a bill that spans across two or more posted periods.

Resolution:

Return to provider indicating that either the claim should be split or a new NOE should be submitted for the gap.

5165 HOSP

Hospice claim From Date falls within a posted Hospice election period and claim Thru Date is greater than Termination Date on the period and a subsequent election period is posted but is not contiguous with the prior period; i.e., A gap exists between the two periods.

Purpose:

CWF will not create a new Hospice election period from a bill with a Thru Date greater than a Termination Date if a gap exists between two periods. A gap should exist only if one period has been revoked.

Resolution:

Return to provider indicating that a new NOE should be submitted for the gap in election periods before resubmitting this claim.

Hospice claim From Date falls within a posted Hospice election period, and both the Change of Ownership Start1 Date and Start2 Date are equal to zeros (neither a Change of Ownership nor a Change of Provider has occurred), and the Provider Number on the claim is not equal to Provider 1 in effect for the billing period on the posted Hospice election period.

Purpose:

To ensure that only the provider that the beneficiary has elected is paid for Hospice services.

Resolution:

Return to provider for verification of provider number, the NOE provider is different than the billing provider.

Explanation

Resolution:

Deny the claim for the provider and the beneficiary. The provider is responsible for developing correct data and resubmitting the bill.

Use MSN 9.7 - "We have asked your provider to resubmit the claim with the missing or correct information." (NOTE: Add-on to other messages as appropriate.)

5202

H, S, HOSP

No record of Hospice election.

Purpose:

To provide for Hospice benefits only after notice of election by the beneficiary.

Resolution:

Check with the Host via inquiry to determine the status of the beneficiary. The Satellite should check their records for a Hospice notice of election. If there is evidence that a notice of election has been received and processed, the Satellite should notify the Host.

5203

H, S, HOSP

The Dates of Service do not fall within a period of Hospice election.

Purpose:

To ensure that Hospice benefits are covered only during a period of Hospice election.

Resolution:

The Host will start a new period of Hospice care based on the bill, if the From Date on the bill is within a 90 day period of election or one day after the 90 day period ends. (A period ending by the beneficiary's action will not be extended). If three Hospice periods have already been established, the Host will not start a fourth period.

Explanation

Resolution:

Deny the claim indicating that services were furnished after the date of death on file. The provider must submit the correct Dates of Service. If the provider indicates that the beneficiary is not dead, validate the information by checking the Date of Death Update Field. If a "2" appears in this field, adjust the prior claim. If the beneficiary is dead and the date is wrong, verify through the SSO.

Use MSN 5.3 - "Our records show that the date of death was before the date of service."

5212

H, S, HH, HOSP, OP

The claim has a patient status of beneficiary deceased with a Thru Date prior to another claim with a patient status of beneficiary deceased.

Purpose:

To ensure that patient status of beneficiary deceased is submitted on only one bill.

Resolution:

Return to provider for correction of patient status.

Use remittance message MA 130 - "Resubmit this claim with the missing or correct information."

5220

H, S, HH, HOSP, OP

Services prior to the date of entitlement.

Purpose:

To prevent payment for services prior to the beneficiary's entitlement.

Resolution:

Deny the claim. If the provider disagrees, research the entitlement information through the local SSO.

Use MSN 5.1 - "Our records show that you do not have Medicare entitlement under the number shown on this notice. If you do not agree, please contact your local Social Security office."

For PPS claims:

- The Admission Date is not within a risk GHO period, but the GHO Pay Code on the claim is one, or the Condition Code 69 is present;
- The Admission Date falls within a risk GHO period, but the Statement Dates fall on, or after, the Hospice Revocation Date, but before the month following the Revocation Date, the GHO Pay Code indicated on the claim is other than zero, or the Condition Code 69 is present, however a risk GHO is not liable for claims during the month of Hospice revocation; or
- The Statement Dates are within a Hospice period and the claim has a Condition Code 07 indicating treatment of a non-terminal illness. This includes abbreviated Encounter (TOB 11z) records.

H, S

For Non-PPS Inpatient and SNF claims:

- The Statement Dates do not fall within a risk GHO period but the GHO Pay Code on the claim is one, or the Condition Code 69 is present;
- The Statement Dates fall within a risk GHO period, but on, or after, a Hospice Revocation Date, but before the month following the Revocation Date, the GHO Pay Code indicated on the claim is one, or the Condition Code 69 is present, however a risk GHO is not liable for claims during the month of Hospice revocation; or
- The Statement Dates are within a Hospice period and the claim has a Condition Code 07 Indicating treatment of a non-terminal illness. This includes abbreviated Encounter (TOB 11z) records.

Purpose:

To ensure that GHO and Hospice claims are processed correctly.

Error Code	Explanation
-------------------	--------------------

Resolution:

Return to provider indicating that there is conflicting information on the claim and/or the beneficiary's master file pertaining to GHO/Hospice status or GHO/Hospice only billable items.

5237 H, S, HH, HOSP, OP

- Claim indicates a CHOICES GHO site but the beneficiary does not have a GHO Auxiliary record, or the GHO Auxiliary record is not associated with a CHOICES GHO site;
- The claim indicates a CHOICES site, but the GHO Pay Code on the claim is not equal to one;
- For PPS claims: The claim Admit Date does not fall within a CHOICES GHO period;
- For Non-PPS/SNF claims: The claim From and Thru Dates do not fall within a CHOICES GHO period;
- Claim indicates an ESRD Managed Care Demonstration GHO site but the beneficiary does not have a GHO Auxiliary Record, or the GHO Auxiliary Record is not associated with an ESRD Managed Care Demonstration GHO site;
- Claim indicates an ESRD Managed Care Demonstration site, but the GHO Pay Code on the claim is not equal to one;

Resolution:

Check bill history to determine if the posted bill was sent by the provider. If not, obtain a Host HIMR to determine which Satellite processed the posted bill. Correct the bill or notify the provider that the bill has been canceled as a duplicate bill. If another FI processed the bill incorrectly, have the other FI submit credit, debit, or cancel-only bills to correct the Host history.

5601 H, S

This bill overlaps a posted bill From Date and Thru date.

Purpose:

To prevent payment to providers for overlapping claims.

Resolution:

For HUIP Bills - The Satellite checks its bill history to determine if the posted HUIP bill was sent by them. If not, request a HIMR from the Host to determine the origin of the posted bill, and contact the originating Satellite to determine where the error in billing dates occurred. The Satellite at fault takes action to correct the error and submits either credit/debit actions or corrects the bill and resubmits it. If this bill needs to be corrected, notify the provider and prepare a remittance advice, if indicated.

For HUOP Bills - This bill overlaps the service dates of a posted HUOP bill and matches Provider Number, Bill Type, Revenue Codes; the last digit of the Bill Type is not a 5 (late charges), and the Action Code is a 1 or 3. Check the bill history to determine if the posted bill was sent by that provider. If another FI processed the posted bill, determine who is at fault. The FI at fault should prepare either a credit/debit adjustment or correct this bill and resubmit. The final remittance advice(s) reflects payment to the provider.

**Error
Code**

Explanation

Purpose:

To assure correct payment on an MSP claim.

Resolution:

Analyze CWF auxiliary file; create a new "I" MSP auxiliary record; and resubmit claim.

6803

H, S, HH, HOSP, OP

MSP is not indicated on the bill, but there is an MSP Auxiliary Record indicating that the MSP service dates are within the From and Thru dates on the bill.

Purpose:

To assure that proper payment is made by a primary payer.

Resolution:

Change the claim to indicate MSP, notify the provider and/or change the remittance advice to the provider and send the corrected claim to the Host.

Resolution:

(1) Deny claim. Advise beneficiary/provider: "Resubmit claim with other payer's Explanation of Benefits for possible secondary payment. If other insurance has terminated, resubmit with documentation showing termination dates of other insurance."

If the contractor has documentation showing termination of the insurance coverage indicated in the CWF MSP occurrence, process as follows:

(2) Post a termination date; or

(3) Resubmit claim as MSP.

6805

H, S, HH, HOSP, OP

MSP conditional payment claim and matching MSP record with "Y" validity indicator not found.

Error Code	Explanation
-------------------	--------------------

Purpose:

To ensure that MSP data is captured on CWF for possible future MSP involvement.

Resolution:

Input an MSP Maintenance Transaction Record to annotate MSP data to CWF.

Resolution:

(1) Create an "I" MSP Auxiliary Record.

(2) Resubmit claim.

6806	H, S, OP, HH, HOSP
------	--------------------

The bill shows an MSP Override Code of M or N and no MSP Auxiliary Record is found with dates that fall within the Dates of Service on the bill.

Purpose:

To assure proper primary payer on all bills.

**Error
Code**

Explanation

Resolution:

Change the bill to indicate Medicare primary payer and notify the provider unless development has assured the contractor that it is correct. Send an MSP maintenance transaction record to update the Host MSP Auxiliary File and resubmit the bill.

Resolution: (AB-00-107)

(1) Resubmit claim without an override code; or

(2) Create an "I" MSP auxiliary record. An auxiliary record must be present to process a claim using an override code.

Override Codes will be used as follows:

Override code M = GHP services involved. Verify MSP auxiliary record exists. Matching criteria: Dates of Service on claim fall within Effective and Termination Dates on auxiliary record and validity indicator is equal to "Y."

The service provided is:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

Override Code N = Non-GHP involved. Verify MSP auxiliary record exists. Matching criteria are: Dates of Service on the claim fall within Effective and Termination Dates on auxiliary record and validity indicator is equal to "Y."

The service provided is:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

NOTE: Part B/carrier - Override Code "M" or "N" should be placed in MSP Code (field 95) of the CWF Part B claim record. When processing any primary claim not using an Override Code, this field must be left blank.

6810

Part A claim was processed and only a Part B/carrier (Insurer type K) matching record was found.

Purpose:

To ensure the correct processing of MSP data.

8032 HH

Part A visits submitted exceed those available, and the claim links two Home Health Benefit periods.

Part A Bill Type Code is 33X and the Part A visits submitted exceeds those available, or a Home Health claim with Value Code "62" for Dates of Service on, or after, 10/01/2000, and the Part A visits exceed those available. Furthermore, the Part A visits will cause two Home Health Benefit Periods to combine as one period.

Purpose:

To ensure that utilization of Home Health visits do not exceed the allowed number.

Resolution:

Shared system will automatically correct TOB and resubmit.

9000 H, S

Hospital bill not subject to PPS or covered SNF bill contains Dates of Service (statement From and Thru date) that span more than two calendar years. Only PPS hospital and noncovered SNF claims can contain more than two calendar years within the Dates of Service.

Purpose:

To accommodate correct processing of bills spanning 3 or more years with covered and noncovered days and are part of two spells of illness in addition to a catastrophic record.

Resolution:

Return to provider indicating that the bill needs to be split.

80.3 - Part B/Carrier and DMEPOS Utilization Error Codes

(Rev. 1, 10-01-03)

B3-6011, CWF Editutil (<http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>), B-02-049,

Utilization edit rejects are denoted by a value of "UR" in the disposition field on the Part B/carrier Reply Record. A Trailer 08, containing four utilization error codes, will always follow. A Trailer 12 will also be returned for UR & AA dispositions. Listed below are the possible utilization error codes with a general description of the error and a general description of the corrective action to be taken. This action is meant to be a re-examination of the claim information the contractor has on hand, and correction of the information submitted on the CWF Part B/carrier or DMEPOS Claim Record, not an exhaustive search for additional information.

Part B/Carrier and DMEPOS Utilization Error Codes

Error Code	Explanation
-------------------	--------------------

RT01	Claim is waiting retrieval of archived history.
------	---

Purpose:

To inform the FI that archived history is being retrieved and that they should hold claim before attempting to reprocess.

Resolution:

The Host retrieves the archive history records, a process that is executed weekly. Resubmit the claim in 6 working days.

RT02	Attempted history retrieval, but the beneficiary history pointers were full.
------	--

Purpose:

To notify the carrier that a history retrieval was unsuccessful.

Resolution:

Request the record manually or use the accrete process.

5050	Beneficiary record has been deleted by CMS.
------	---

Purpose:

To notify the carrier/DMERC that a Beneficiary Record has been deleted.

Error Code **Explanation**

Resolution:

The beneficiary number requested by this claim is not available to the HOST. This record has been deleted at the CMS central office. The number the contractor is trying to use is a possible incorrect number and should be investigated through Social Security.

If beneficiary number is correct, deny claim using MSN 5.1 - "Our records show that you do not have Medicare entitlement under the number shown on this notice. If you do not agree, please contact your local Social Security office."

5052 Beneficiary Identification Incorrect - The Name and/or Claim Number shown on the bill is incorrect or claim number is not in file (not used for UR, used only for Disposition Codes 50, 51, 52, 53, 54, 55).

Purpose:

To ensure that the correct beneficiary is identified.

Resolution:

Take action indicated by the disposition code received. (See §20.2.2)

5053 Beneficiary is temporarily blocked due to a merge of beneficiary data mandated by CMS.

Purpose:

To prevent processing of transactions while beneficiary history data is being merged.

Resolution:

Recycle claim every 15 days until approval, adjustment, or reject response is received, or until otherwise notified.

5054 Beneficiary Auxiliary record missing and requested from CMS.

Purpose:

To inform the carrier/DMERC that a Beneficiary Record is temporarily unavailable and that they should hold claim before attempting to reprocess.

Explanation

Resolution:

Change the bill to indicate Medicare primary payer and notify the provider unless development has assured the contractor that it is correct. Send an MSP Maintenance Transaction record to update the Host MSP Auxiliary File and resubmit the bill.

Resolution: (AB-00-107)

(1) Resubmit claim without an override code; or

(2) Create an "I" MSP auxiliary record. An auxiliary record must be present to process a claim using an override code.

Override codes will be used as follows:

Override code M = GHP services involved. Verify MSP auxiliary record exists. Matching criteria: Dates of service on claim fall within effective and termination dates on auxiliary record and validity indicator is equal to "Y."

The service provided is:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

Override code N = Non-GHP involved. Verify MSP auxiliary record exists. Matching criteria are: Dates of service on the claim fall within effective and termination dates on auxiliary record and validity indicator is equal to "Y."

The service provided is:

- Not a covered service under the primary payer's plan;
- Not a covered diagnosis under the primary payer's plan; or
- Benefits have been exhausted under the primary payer's plan.

NOTE: Part B - Override code "M" or "N" should be placed in MSP Code (field 95) of the CWF Part B Claim record. When processing any primary claim not using an override code, this field must be left blank.

Error Code **Explanation**

Purpose:

To limit the duration that Medicare will pay for rental equipment.

Resolution:

Deny the claim.

D904 DMEPOS Only

Claims for the maintenance of DMEPOS items are allowed only if the rental cap has been met and cannot take place until six months have passed from the Certification End Date (three months for parenteral pumps).

Purpose:

Maintenance fees are paid only after a rental cap has been met and can be billed only once every 6 months.

Resolution:

Deny the claim using MSN 8.14 - "Your equipment supplier must furnish and service this item for as long as you continue to need it. Medicare will pay for maintenance and/or servicing for every 6-month period after the end of the 15th paid rental month."

D906 DMEPOS Only

Inexpensive/Routinely Purchased item rental payments cannot exceed the cost of the item. The sum of the rental payments must not exceed the DME allowed amount.

Purpose:

The total rental payment amount may not exceed the allowed amount of a direct purchase.

Resolution:

Deny or reduce the allowed amount on the claim. Use MSN 8.6 - "A partial payment has been made because the purchase allowance has been reached. No further rental payments can be made."

PEN Pump (HCPCS code Category "10") or Oxygen (DMEPOS Category "5") claim with Dates of Service that are greater than the CMN Scheduled Recertification Date and less than the CMN End Date on the CMN record.

Purpose:

To ensure required CMN information is up-to-date.

Resolution:

Return to provider, indicating that a new CMN will need to be filed prior to processing of this claim.

80.4 - IP, SNF, OP, HH, and Hospice Consistency Error Codes

(Rev. 1, 10-01-03)

A3-3809, CWF Editcons (<http://cms.csc.com/cwf/downloads/docs/pdfs/editcons.pdf>),
A-02-031, A-02-064

The following are Part A consistency edits and the Bill Types each edit is applied to:
General-all; H-Hospital; S-Skilled Nursing Facility; HH-Home Health; HOSP-Hospice;
OP-Outpatient; NOE-Hospice Notice of Election.

Consistency edit rejects are denoted by a value of "ER" in the disposition field on the Part A Reply Record. A Trailer of 08 containing up to four Consistency error codes will always follow. Listed below are the possible Consistency error codes with a general description.

Error Code	Explanation	Action
2504	H, S The coinsurance rate (Coinsurance Amount divided by Coinsurance Days) exceeds the rate that applies to the calendar year in which the coinsurance days occur.	Recalculate the coinsurance rate.
2506	H, S Coinsurance days are shown, but no amount is shown for either Value Code 09 or Value Code 11.	Verify coinsurance days, Value Code 09, and Value Code 11. Resubmit claim if appropriate.
2507	H The sum of coinsurance days plus lifetime reserve days in either the year of admission or the year of discharge on a bill that spans a calendar year end, is greater than the number of days in the period covered by the statement for either the year of admission or discharge on the bill.	Verify coinsurance days, lifetime reserve days, admission date, and discharge date. Resubmit claim.
2601	H, S On a hospital bill, this item contains an entry other than a number or a number that exceeds 60. An entry for a SNF bill is inappropriate as lifetime reserve days apply only to inpatient hospital stays.	Verify lifetime reserve days and resubmit claim.
2602	H <ul style="list-style-type: none"> • The lifetime reserve days are shown, but no amount is shown for either value code 08 or value code 10; or • A valid Value Code 08 or 10 amount is present, but no lifetime reserve days are present. 	Verify lifetime reserve days, value code 08 amount, and value code 10 amount. Resubmit claim if appropriate.

Error Code	Explanation	Action
2603	H The lifetime reserve rate (lifetime reserve amount divided by lifetime reserve days) exceeds the rate that applies to the calendar year in which the lifetime reserve days occurred.	Recalculate the lifetime reserve rate and resubmit claim.
Occurrence Codes		
The third digit of the following error codes represents the sequence in which the code occurred. The sequence is 1 through 0, with 0 representing the 10th code.		
28#1	H, S, HH, HOSP, OP Invalid occurrence code.	Correct the occurrence code and resubmit claim.
28#2	S Date Guarantee of Payment Began--entry is inappropriate as this item applies only to hospital bills.	Remove date from claim and resubmit.
28#3	H Date Guarantee of Payment Began--Hospital Bill. Date is earlier than the admission date or later than the statement covers Thru Date.	Verify dates and resubmit claim.
28#4	H Date of Guarantee of Payment Began--Utilization days cannot exceed 12 days beyond the admission date, if admission date and the statement covers period From Date are the same, unless the billing dates cover the period 12/24 through 1/2, in which case 13 days cannot be exceeded.	Verify dates and resubmit claim or return to provider for correction.

Error Code	Explanation	Action
28#5	H If the Guarantee of Payment Date is shown and the admission date and From Date are not equal, utilization days cannot exceed 12 days, unless the billing dates cover the period 12/24 thru 1/2, in which case 13 days cannot be exceeded.	Verify dates and resubmit claim or return to provider for correction.
28#6	H The Date Guarantee of Payment Began is earlier than the Date Benefits Exhausted (Occurrence Code 23).	Verify dates and resubmit claim or return to provider for correction.
28#7	H The Date Guarantee of Payment Began plus utilization days (less coinsurance and non-utilization days) cannot exceed the statement covers period Thru Date, unless the patient status code is 30 (Still Patient), in which case the Thru Date cannot be exceeded by more than 1 day.	Verify dates and resubmit claim or return to provider for correction.
28#8	H, S Active Care Ended date is after the Thru Date.	Verify dates and resubmit claim or return to provider for correction.
28#9	H, S Utilization days exceed the number of days between the From Date and the Date Active Care Ended (Occurrence code 22) minus any days for Noncovered Level of Care (Occurrence Span Codes 74, 76, 77, 79, and M1) reported on the bill.	Recalculate utilization days and resubmit claim.

Error Code	Explanation	Action
28#A	H, S Utilization days are greater than the number of days between the From Date and the date benefits exhausted and on a hospital bill, and Guarantee of Payment Began Date is not present.	Recalculate utilization days and verify all dates. Resubmit claim if appropriate.
28#B	HH, HOSP, OP The benefits exhausted date is prior to the From Date.	Verify the benefits exhausted date and the From Date. Benefits exhaust date should be later than From Date on claim. Resubmit claim.
28#C	HH, HOSP, OP The date the benefits were exhausted is not greater than the stay From Date.	Verify the benefits exhausted date and the stay From Date. Resubmit claim if appropriate, otherwise deny.
28#E	H, S, OP, HH More than one Benefits Exhausted Date Occurrence Code (A3, B3, C3-in any combination) is present on the claim.	Verify appropriate Occurrence Code and remove others. Resubmit claim.
28#L	H More than one Occurrence Code 20 has been found on a single claim.	Verify Occurrence Code 20 date and remove all other occurrences from claim. Resubmit claim.
28#M	HOSP Occurrence Code 42 date does not equal the service Thru Date on the claim.	Verify dates and resubmit claim.

Error Code	Explanation	Action
28#N	H, S, OP <ul style="list-style-type: none"> • Claim indicates benefits exhausted, Medicare is primary and the Occurrence Code present is not A3; • Claim indicates benefits exhausted, Medicare is secondary and the Occurrence Code present is not B3; or • Claim indicates benefits exhausted, Medicare is tertiary and the Occurrence Code present is not C3. Occurrence Span Codes and Dates Required		
The third digit of the following error codes represents the sequence of the Occurrence Span Code reported on the bill.		
33#1	H, S A span code from or Thru Date is an invalid or inconsistent date entry.	Verify span code dates and resubmit claim.
33#2	S Qualifying Stay Dates--The Thru Date is the same as, or prior to, the From Date.	Correct dates and resubmit claim.

Error Code	Explanation	Action
33#3	S Qualifying Stay Dates--The 3-day stay requirement is not met or in the case of a Rural Primary Care Hospital (RPCH) 2 days. The Thru Date is not 3 or more days later than the From Date or in the case of a RPCH 2 days.	Verify dates. Resubmit claim if appropriate or deny for lack of a qualifying stay. Use MSN 13.2 - "Skilled nursing facility benefits are available only after a hospital stay of at least 3 days."
33#4	S Qualifying Stay Dates--the Thru Date is later than the current admission date.	Verify dates. Resubmit if appropriate or deny for lack of qualifying stay. Use MSN 13.2 - "Skilled nursing facility benefits are only available after a hospital stay of at least 3 days."
33#5	H Occurrence span code 70 dates are invalid due to: 1) Span code From Date is equal to the From Date of the statement and it is not a catastrophic transition claim; or 2) The claim from and Thru Dates are catastrophic.	Verify dates and resubmit or deny claim if appropriate.
33#6	OP Screening Colorectal or Screening Prostate Cancer are billed multiple times on the same claim.	Deny duplicate line items using MSN 7.1 - "This is a duplicate of a charge already submitted."

Condition Codes

The second and third digit of the following error codes represents the sequence of the condition code reported on the bill.

Error Code	Explanation	Action

80.5 - Part B and DMEPOS Consistency Error Codes

(Rev. 1, 10-01-03)

B3-6011, CWF EditCons (<http://cms.csc.com/cwf/downloads/docs/pdfs/editcons.pdf>)

Consistency edit rejects are denoted by a value of "ER" in the disposition field on the Part B Reply Record. A Trailer 08, containing up to four consistency error codes, will always follow. Listed below are the possible consistency error codes with a general description of the error and a general description of the corrective action to be taken. This action is meant to be a reexamination of the claim information the contractor has on hand, and correction of the information submitted on the CWF Part B or DMEPOS Claim Record, not an exhaustive search for additional information.

A/B Crossover edit rejects are denoted by a value of CR in the disposition field on the Reply Record. A Trailer 08 containing one crossover error code, will always follow. Also, Trailer 12 will be returned. A/B Crossover alerts are denoted by a value of 01 in the disposition field on the Reply Record. A Trailer 13 containing one crossover Alert Code, will always follow. Listed below are the possible crossover Error and Alert Codes with a general description.

A/B Crossover Error Codes

Error Code	Explanation
7010	<p>Reject</p> <ul style="list-style-type: none">• An inpatient, outpatient, or home health bill with dates of service equal to or overlapping a Hospice election period, and Condition Code 07 (Treatment of a non-terminal condition) is not present on the bill; or• An MCCD Notice of Election (89A) From Date overlaps a Hospice election period. <p>Purpose:</p> <p>To detect bills during a hospice benefit period when a non-terminal condition is not reported.</p> <p>Resolution:</p> <p>Deny the bill, use MSN 27.1 - "This service is not covered because you are enrolled in a hospice."</p>
7020	<p>Reject</p> <p>Claim Bill Type is 12X and the From/Thru dates are equal to the posted outpatient 73X Bill Type service dates or Span Code 72 From/Thru dates.</p> <p>Purpose:</p> <p>To detect duplicate billing of inpatient and FQHC services.</p>

Error Code**Explanation****Resolution:**

Deny the claim as a duplicate, use MSN 7.1 - "This is a duplicate of a charge already submitted."

7050

Reject

- An Outpatient claim (Bill Type 12X, 13X, 14X, 22X, 23X, 24X, 71X, 72X, 73X, 74X, 75X, 83X, or 85X) has From/Thru Dates (or Occurrence Span Code 72 From/Thru Dates), which are equal to, overlap, or are within the From/Thru Dates on a Hospital Inpatient claim (Bill Type 11X, 21X, or 41X) in history. The Provider Number on the incoming claim is the same as the Provider Number on the history claim; or
- An Outpatient claim (Bill Type 12X, 13X, 14X, 22X, 23X, 33X, 34X, 74X, or 75X) for physical therapy, occupational therapy, and/or speech therapy has From/Thru Dates (or Occurrence Span Code 72 From/Thru Dates) which are equal to, overlap, or are within the From/Thru Dates on an SNF Inpatient claim (Bill Type 18X, 21X, or 28X,) for physical therapy, occupational therapy, or speech therapy. The Provider Number on the incoming claim is the same as the Provider Number on the history claim.

Purpose:

To detect duplicate bills for physical, speech and/or occupational therapy.

Resolution:

Deny the bill as a duplicate, use MSN 7.1 - "This is a duplicate of a charge already submitted."

7055

Reject

Outpatient services (Bill Types 13X, 14X, or 83X) billed with From/Thru Dates that are equal to, within, or overlapping the From/Thru Dates on an outpatient ambulatory surgical claim (ASC - Bill type 83X). The Provider Number of both claims are the same.

Purpose:

To ensure that Medicare does not pay for the same services more than once.

**Error
Code**

Explanation

Resolution:

Review claim to ensure both claims are valid and not duplicate billings, deny if duplicate, override error and resubmit if both bills are valid.

If denied, use MSN 7.1 - "This is a duplicate of a charge already submitted."

7080

Reject

OP, HH

- An Outpatient claim has a From/Thru Date that overlaps an Inpatient claim and the Provider Numbers are different; or
- A Home Health claim has a detail line item Date of Service that overlaps an Inpatient, SNF, or RNHCI claim on history.

Purpose:

To detect outpatient claims that should have been bundled into the inpatient bill.

Resolution:

Deny the bill, use MSN 21.7 - "This service should be included on your inpatient bill. The provider must review the original (paid) inpatient bill to determine that all charges were included. The hospital pays the supplier."

7108

Alert

An outpatient bill for physical therapy (PT), speech therapy (ST), or occupational therapy (OT) for the same or overlapping dates of service (or Occurrence Span Code 72 dates), and a revenue code, HCPCS code, or a revenue to HCPCS code match for PT, ST, or OT bill on history. Billed by the same provider or another provider, physician, or independent therapist. The incoming outpatient bill is matched against both Part A outpatient and Part B carrier claims.

Purpose:

To detect duplicate billings either by the same provider or for a beneficiary receiving the same services from multiple provider specialties that can perform physical, speech, and/or occupational therapy services.

**Error
Code**

Explanation

Resolution:

Deny the bill if the same provider submitted a duplicate claim, use MSN 21.7 - "This service should be included on your inpatient bill." If the services are furnished by a different provider or are not duplicated, refer the bill to medical review for determination of medical necessity. If the claim is denied as a duplicate or as the result of medical review, recover the erroneous payment and process an adjustment to the Host.

7109

Reject

An Outpatient claim with the Thru date (or Occurrence Span Code 72 Thru Date) greater than the Inpatient Admission Date minus four days or is equal to the Inpatient Admission Date and one or more diagnostic Revenue Codes or procedure codes are present.

Purpose:

To detect outpatient bills that should be included on an inpatient history bill.

Resolution:

Return the outpatient bill to the provider. The provider may adjust the inpatient bill if charges were omitted. If Part B deductible or coinsurance were collected by the provider, any monies collected must be returned to the beneficiary.

7111

Reject

An inpatient PPS bill (type 111, condition code 65 not present) is posted to the Host history and the From date (on the posted bill) is equal to the Through date on the incoming inpatient PPS bill (type 111, condition code 65 not present) and the patient discharge status is 01 (discharged to home or self care).

As of October 1, 2002, this edit is bypassed if one of the bills, either history or incoming has an IRF provider number (XX-3025 – XX-3099 or the third position of the provider number is "T").

Purpose:

To identify transfers between PPS hospitals. This reject prevents incorrect DRG payments.

**Error
Code**

Explanation

Resolution:

Change the patient status code to 02 (transferred to another acute care facility) and reprocess the bill.

7112

Reject

Inpatient claim (HUIP record) From Date or From Date minus 1 day equals the last service date (or Occurrence Span Code 72 First/Last Visit Date) on a posted Part B claim (HUOP record) and the provider numbers are the same.

Purpose:

To detect inpatient bills that have posted Part B bills with charges that should have been bundled into the inpatient bill.

Resolution:

Cancel the outpatient bill, use MSN 21.7 - "This service should be included on your inpatient bill." Notify the provider why the outpatient bill was canceled. If any beneficiary Part B deductible was collected on the canceled Part B bill, the beneficiary must be paid any amounts collected towards that outpatient bill. Ensure that the inpatient bill has the outpatient charges included. After the outpatient bill is canceled, resubmit the inpatient bill for processing.

7113

Reject

An inpatient claim with the Admission Date less than 4 days from the Through Date (or Occurrence Span Code 72 date) on an outpatient history record and the outpatient claim is for diagnostic services only.

Purpose:

To detect outpatient bills for diagnostic services that should have been bundled into the inpatient bill.

Resolution:

Cancel the outpatient claim and recover any payment, use MSN 21.7 - "This service should be included on your inpatient bill." Return the inpatient bill for verification that the appropriate charges are posted to the inpatient bill.

Error Code**Explanation**

7114

Reject

An outpatient claim that contains both therapeutic and diagnostic services with the Through date equal to or up to 4 days less than an Inpatient Admission Date.

Purpose:

To detect therapeutic or diagnostic services on an outpatient bill that should be included on an inpatient claim.

Resolution:

Return the outpatient bill to the provider to re-bill for only the therapeutic services and to determine whether an adjustment to the inpatient bill is needed to include diagnostic services. Use MSN 21.7 - "This service should be included on your inpatient bill."

7115

Reject

An Inpatient claim against a posted Outpatient history claim which contains therapeutic and diagnostic services and the Thru Date (or Span Code 72 Thru Date) on the Outpatient claim is greater than the Inpatient Admission Date minus 4 days or is equal to the Inpatient Admission Date. Both claims contain the same provider number.

Purpose:

To detect outpatient diagnostic services that should have been included in the inpatient bill.

Resolution:

Cancel the outpatient claim containing the therapeutic and diagnostic services, use MSN 21.7 - "This service should be included on your inpatient bill." Return the inpatient bill for verification that the outpatient diagnostic services have been included on the inpatient bill. Resubmit the inpatient bill for processing. The provider may re-bill the therapeutic services separately.

Error Code**Explanation**

7119

Reject

An Outpatient claim with the Thru Date (or Span Code 72 Thru Date) equal to an Inpatient Admission Date, or 1 day less than the Inpatient Admission Date. One or more diagnostic Revenue Codes are on the Outpatient claim and the Inpatient history claim has a Condition Code of 65. . Both claims contain the same provider number.

Purpose:

To detect outpatient bills that should be included on an inpatient history bill.

Resolution:

Return the outpatient bill to the provider, use MSN 21.7 - "This service should be included on your inpatient bill." The provider may adjust the inpatient bill if charges were omitted. If Part B deductible or coinsurance were collected by the provider, any monies collected must be returned to the beneficiary.

7120

Reject

An Inpatient claim with Condition Code 65, an Admission Date or the Admission Date minus 1 day equal to an Outpatient history Thru date (or Occurrence Span Code 72 Thru Date), and the Outpatient history claim has one or more diagnostic Revenue Codes present. . Both claims contain the same provider number.

Purpose:

To detect outpatient bills for diagnostic services that should have been bundled into the inpatient bill.

Resolution:

Cancel the outpatient claim and recover any payment, use MSN 21.7 - "This service should be included on your inpatient bill." Return the inpatient bill for verification that the appropriate charges are posted to the inpatient bill.

Explanation

Purpose:

To ensure that payment is made for only one eyewear for each cataract surgery with an IOL insertion.

Resolution:

Deny the claim, use MSN 26.3 - "Only one pair of eyeglasses or contact lenses is covered after cataract surgery with lens implant."

7230

Reject

Outpatient, Part B or DMEPOS claim submitted with eyewear on/after an intraocular lens (IOL) insertion and more than one piece of eyewear is being billed on the claim.

Purpose:

To ensure that the beneficiary's eyewear benefit is limited to a single eyewear for each cataract surgery with the insertion of an IOL.

Resolution:

Deny the claim, use MSN 26.3 - "Only one pair of eyeglasses or contact lenses is covered after cataract surgery with lens implant."

7530

Alert

An outpatient bill (Bill Types 13X, 14X, 34X, 74X, or 75X) is one of three or more in a series of outpatient bills from different providers for the same beneficiary, same revenue and/or HCPCS Code(s), and dates of service within 30 days.

Purpose:

To detect inappropriate utilization of services by beneficiaries.

Resolution:

Forward the bill to medical review. If services are subsequently denied, recover the erroneous payment and process an adjustment to CWF. If denied, use MSN 15.5 - "The information provided does not support the need for similar services by more than one doctor during the same time period."

7531

Alert

The Discharge Date of one PPS Inpatient claim is equal to the Admission Date of another PPS Inpatient claim.

An inpatient PPS bill (type 111, condition code 65 not present) is posted to the Host history with a patient discharge status code other than 02 (discharged/transferred to another acute care facility), 05 (discharged/transferred to another type of institution) or 07 (left against medical advice or discontinued care). Condition code 61 (cost outlier) is not present or the DRG is not equal to 385 or 456 and an inpatient PPS bill with a From date equal to the Through date of the posted bill.

As of October 1, 2002, this edit is bypassed if one of the bills, either history or incoming has an IRF provider number (XX-3025 – XX-3099 or the third position of the provider number is "T").

**Error
Code**

Explanation

Purpose:

To identify transfers between PPS hospitals. This alert identifies the posted bill that had an inappropriate patient discharge status.

Resolution:

Adjust the original bill using a 11I Bill Type and change the patient status code to 02 (discharged/transferred to another acute care facility). Process the adjustment according to the transfer payment guidelines.

7532

Alert

The same provider bills outpatient services monthly or more frequently for the same beneficiary for a period of 6 months or more. The Bill Type(s) is 13X, 23X, 34X, 71X, 74X, 75X. The revenue code(s) is 42X, 43X, 44X, 51X, 52X, 90X, 91X, 94X.

Purpose:

To detect over-utilization of services.

Resolution:

Refer the claim to medical review. If services are subsequently denied, recover the erroneous payment and process an adjustment to CWF. If denied, use MSN 15.6 - "The information provided does not support the need for this many services or items within this period of time."

7533

Alert

A home health bill (33X or 34X) for a DME or prosthetic device with dates of service equal to or overlapping a supplier billing for the same DME/prosthetic device.

Purpose:

To detect duplicate billing for DME by an HHA and a DME supplier.

Resolution:

Deny duplicate bills, use MSN 7.1 - "This is a duplicate of a charge already submitted." Recover the erroneous payment from the HHA and process an adjustment to CWF. If the bill is not a duplicate, release the bill.

**Error
Code**

Explanation

Purpose:

To eliminate outpatient billings for the same services which should have been included in the inpatient claim.

Resolution:

Cancel the outpatient bill. Send a notice to the provider explaining that the charges should have been included on the inpatient bill and they should look to the hospital for payment. Use MSN 21.7 - "This service should be included on your inpatient bill."

7546

Alert

HH

The Outpatient record (Bill Type 34X) with Revenue Code 0636, HCPCS Code J0630 on history, does not have the same Provider Number as the incoming Home Health claim.

Purpose:

If an open HH episode exists, this service can be billed only by the same provider as is on episode record.

Resolution:

Verify service dates, deny if claim dates overlap. Use MSN 21.18 - "This item or service is not covered when performed or ordered by this provider."

7547

Alert

DME

Method II ESRD supplies billed during Inpatient stay.

Purpose:

During an inpatient stay, the hospital or SNF is responsible for providing all supplies and equipment needed for dialysis. In the month following a home dialysis patient's hospitalization, the supplier must reduce the monthly delivery of, and billing for, new supplies to account for the supplies the Method II beneficiary did not use during his or her hospitalization.

**Error
Code**

Explanation

Resolution:

If the Inpatient stay was 3 or more days, deny the portion of the claim that coincided with the inpatient stay (do not deny the admission or discharge day), or return to provider for correction. Use MSN 16.27 - "This service is not covered since our records show you were in the hospital at this time."

8100

Alert

An inpatient claim (11X), outpatient claim (13X) or ASC claim (83X) for the same beneficiary, having the same one time only surgical procedure performed on different dates of service in the same or a different place of service as a claim on history.

Purpose:

To detect billings for surgical procedures that are not bilateral procedures that had been previously performed.

Resolution:

Review the bill to determine if the correct procedure code(s) was entered into the system. If the corrected code is not a duplicate of the code in the Trailer 13 record, release the claim for processing. If the coding is correct, forward the claim to medical review. If the alerted claim is subsequently denied, recover the erroneous payment and process an adjustment to CWF, use MSN 7.1 - "This is a duplicate of a charge already submitted." If the alerted claim is correct but a prior claim is in error, adjust the prior claim or contact the appropriate servicing FI for the prior claim.

RD36	<p>Select Date not equal to a Select Date in any method selection iteration and not greater than the Select Date in the current iteration.</p>

Error Code Explanation

Purpose:

If the Override Code is blank, the Select Date must either:

- Match one of the existing select dates on the ESRD Auxiliary record;
or
- Be greater than the most recent select date on the ESRD Auxiliary record.

Resolution:

Verify data submitted, correct and resubmit if appropriate.

RD37 Override Code is a 1, 2, or 3, but the iteration requested does not exist.

Purpose:

To ensure that if the Override Code is 1, 2, or 3, an iteration with that value already exists.

Resolution:

Verify data submitted, correct and resubmit if appropriate.

RD38 Override Code is a 1, 2, or 3, and based upon the Exception Indicator and Select Date year, the Option Year is incorrect.

Purpose:

If the Override Code is 1, 2, or 3, and the Option Year has been entered:

- If the Exception Indicator is Y, the Option Year on the transaction must equal the Select Year on the transaction (or the Select Year on the ESRD Auxiliary Record if there is none on the transaction).
- If the Exception Indicator is N, the Option Year on the transaction must be 1 greater than the Select Year on the transaction (or the Select Year on the ESRD Auxiliary Record if there is none on the transaction).

Resolution:

Verify data submitted, correct and resubmit if appropriate.

RD39 Override Code is a 4, and the Select Date is not equal to a Select Date on any of the method selection iterations on the Beneficiary Master Record.

Error Code	Explanation
	<p>Purpose:</p> <p>If Override Code is 4, Select Date must match one of the existing Select Dates on the ESRD Auxiliary Record.</p> <p>Resolution:</p> <p>Verify data submitted, correct and resubmit if appropriate.</p>
RD40	<p>If override code is 1, 2, 3, or 4, the ESRD auxiliary record must already contain method selection data.</p> <p>Purpose:</p> <p>To ensure Override Code corresponds to information on the ESRD Auxiliary Record.</p> <p>Resolution:</p> <p>Verify data submitted, correct and resubmit if appropriate.</p>
RD41	<p>If Override Code is 1, 2, or 3, and the Select Date is changed, the Select Date must not match the Select Date on any other existing iteration.</p> <p>Purpose:</p> <p>To ensure a change in the Select Date does not duplicate an existing iteration.</p> <p>Resolution:</p> <p>Verify data submitted, correct and resubmit if appropriate.</p>

80.9 - Duplicate Checking Alert Error Codes

(Rev. 1, 10-01-03)

B-02-065, B-02-049, CWF EditAlert

<http://cms.csc.com/cwf/downloads/docs/pdfs/editalrt.pdf>

The following error codes refer to the duplicate claim Alert Codes. These codes will be included on the Trailer 06 returned on PAID claims. The alert is given so that the contractor can investigate if a duplicate claim exists and cancel the inappropriate claim if necessary.

To resolve these ALERT codes, the contractors investigate if a duplicate exists and cancel the duplicate claim and/or adjust the first claim and recover any overpayments if appropriate.

Duplicate Checking Alert Error Codes

Error Code	Explanation
761x	Duplicate claim processed with different ICN. ("x" equals 1, 2, 4, 5, or 6 only).
762x	Beneficiary receiving duplicate services from different providers.
763x	Beneficiary receiving duplicate services where only the revenue codes are different.
764x	Beneficiary receiving duplicate services where only the HCPCS codes are different.
765x	Beneficiary receiving duplicate services where only the charges are different.
766x	Beneficiary receiving duplicate services from different FIs.

Part B Alerts

7600	Duplicate claim being processed except for Document Control Number (DCN).
76x1	Duplicate billing(s) by the same provider.
76x2	Beneficiary receiving duplicate billing(s) from multiple providers.
76x3	Beneficiary receiving duplicate billings by the same provider but is not contractor specific.

Error Code	Explanation
DMEPOS	
DA01	A DMEPOS claim has capped rental, electrical wheelchair, or PEN pump items, and 60 days have passed since the last claim without an intervening Inpatient or SNF bill. Claims with modifiers "MS" and "KH" are excluded.
DA02	A claim for DMEPOS items with service dates that overlap an Inpatient admission are not allowed. This edit is bypassed for Therapeutic Shoe Insert claims, and select NOC code claims. Effective January 1, 2003, only the start date of claims for HCPCS codes A4253, A4255, A4256, and A4259 is considered for this edit (not the entire span of service dates). Beginning April 1, 2003, override of this edit is allowed.
DA03	Maintenance/service allowed only every 6 months. DMEPOS Claims for the maintenance or servicing (Modifier MS) of rental items and rented enteral pumps (HCPCS Code B9000 and B9002) that have met their cap are allowed only every 6 months following the 22nd month after delivery.
DA04	Maintenance/service allowed only every 3 months. DMEPOS claims for the maintenance or servicing (Modifier MS) for rented parenteral pumps (HCPCS Code B9004 and B9006) that have met their cap are allowed only every 3 months after the rental limit has been met.
DA05	For immunosuppressive drug claims duplicate billing by the same supplier detected. This edit is bypassed for Therapeutic Shoe insert claims, and claims with selected NOC HCPCS codes. Beginning April 1, 2003, override of this edit will be allowed.

80.10 - Duplicate Checking Reject Error Codes

(Rev. 1, 10-01-03)

B-02-065, B-02-049, CWF EditUtil

(<http://cms.csc.com/cwf/downloads/docs/pdfs/editutil.pdf>)

The following error codes refer to the duplicate claim Reject Codes. **To resolve these error codes contractors verify and correct invalid data, then resubmit transaction or deny as duplicate claim.**

Duplicate Checking Reject Error Codes

Error Code	Explanation
5613	OP, HH Duplicate claim being processed with different ICN.
5700	Part B Possible split global surgical claim.
5701	Part B Non-Utilization Days, as indicated by Noncovered Occurrence Span Code, and Benefit Exhaust Dates, are less than the Non-Utilization field submitted on the claim. Complete global fee for the same surgery may already have been paid. Bypass Non-Payment Codes "B," "C," "E," "F," "G," "H," "J," "K," "N," "Q," "T," "U," "V," "W," or "Y."
5702	Part B Complete global fee for the same post-op procedure may already have been paid.
5703	Possible duplicate billing - billing by the same physician for the same surgery within 90 days.
5704	Possible duplicate billing - billing by the same physician for any procedure within 90 days.
5705	Possible split global surgical claim within 90 days.
BD01	Duplicate billing by the same supplier detected.
BD02	More than one supplier may be billing for the same items to the same beneficiary.
BD03	The same service provided by the same supplier using its NSC assigned number, and its Part B carrier assigned number. There is a DMEPOS claim on history for the same item which is being submitted on the Part B claim. The Provider HIC Number corresponding to the NSC assigned Supplier HIC Number on the DMEPOS claim matches the Provider HIC Number on the Part B claim.
DA05	Duplicate billing by the same supplier detected. This edit is bypassed for Therapeutic Shoe Insert claims and claims with selected NOC HCPCS codes. Beginning April 1, 2003, override of this edit will be allowed.

Error Code	Explanation
DA06	More than one supplier may be billing for the same items to the same beneficiary. This edit is bypassed for claims with selected NOC HCPCS codes. Beginning April 1, 2003, override of this edit will be allowed.
DA07	Same service provided by the same supplier using its Part B carrier HIC Number, and the NSC HIC Number of a business owned by the supplier. There is a Part B claim on history for the same supply that is being submitted on the DMEPOS claim. The NSC Supplier Number corresponding to the Provider Number on the Part B claim matches the NSC Supplier number on the DMEPOS claim. This edit is bypassed for claims with selected HCPCS codes. Beginning April 1, 2003, override of this edit will be allowed.
DA09	A claim for the purchase of an inexpensive and routinely purchased DMEPOS item with Service Dates that overlap an Inpatient admission is not allowed, unless the purchase date is equal to the Date of Admission, or Date of Discharge. Effective January 1, 2003, only the start date of claims for HCPCS code A4253 is considered for this edit (not the entire span of service dates). Beginning April 1, 2003, override of this edit is allowed.

80.11 - Certificate of Medical Necessity (CMN) Maintenance Transaction Error Codes

(Rev. 1, 10-01-03)

B-02-043, CWF EditMnts

<http://cms.csc.com/cwf/downloads/docs/pdfs/editmnts.pdf>

Certificate of Medical Necessity (CMN) Maintenance Transaction error codes indicate either a consistency error in the CMN Transaction Record (HUCM), or an error attempting to update the Host CMN Auxiliary file with an HUCM transaction. Consistency errors and file update errors can be encountered by the Hosts during Satellite Auxiliary file processing. Such transactions will be rejected with a "CM" Disposition Code in the CMN Transaction Reply Record. A trailer 08 with up to four error codes will always follow.

Consistency errors are numbered C001 through C069. General file update errors are numbered starting with the C100 code. Other update errors are numbered according to the type of CMN transaction being processed: C2xx for initial certifications, C3xx for revisions, and C4xx for re-certifications.

Listed below are the possible CMN consistency and file update errors. The consistency errors are documented with the requirements for the specific field, and a corrective action to be taken in case the error occurs. Each file update error includes a description of the error, and a corrective action. File update errors should always be investigated by querying the current information for the beneficiary at the CWF Host.

To resolve these error codes verify and correct invalid data according to the information specified under "purpose," then resubmit transaction.

CMN Maintenance Transaction Error Codes

Error Code	Explanation
C001	Invalid CMN transaction record type. Purpose: To ensure valid values: HUCM, HBCM, HICM
C004	Invalid beneficiary surname. As of January 1, 2003, CWF will accept apostrophes, hyphens, and periods in a beneficiary's name. Purpose: To ensure presence and proper alphabetic format.
C005	Invalid beneficiary first name initial. As of January 1, 2003, CWF will accept apostrophes, hyphens, and periods in a beneficiary's name. Purpose: To ensure presence and proper alphabetic format.
C007	Invalid beneficiary date of birth. Purpose: To ensure presence and proper numeric format.
C008	Invalid beneficiary sex code. Purpose: To ensure valid values: 0, 1, or 2.
C009	Invalid DMERC Number.

Error Code	Explanation
	<p>Purpose:</p> <p>To ensure valid numeric format.</p>
C010	<p>Invalid CMN Control Number.</p> <p>Purpose:</p> <p>To ensure presence of CMN Control Number.</p>
C014	<p>Invalid DMEPOS certification type.</p> <p>Purpose:</p> <p>To ensure valid values:</p> <p>1 = Initial CMN</p> <p>2 = Revision</p> <p>3 = Re-certification (Cat 5 and 7 only)</p>
C015	<p>Invalid DMEPOS CMN transaction type.</p> <p>Purpose:</p> <p>To ensure valid values:</p> <p>1 = Add</p> <p>2 = Update</p> <p>3 = Delete</p>
C016	<p>Invalid approved HCPCS code.</p> <p>Purpose:</p> <p>To ensure presence of HCPCS code.</p>
C017	<p>Invalid DMEPOS category.</p> <p>Purpose:</p> <p>To ensure valid values: 1, 2, 3, 4, 5, 6, 7, 8, 9, or A.</p>

Error Code	Explanation
C018	<p>Invalid initial certification date.</p> <p>Purpose:</p> <p>To ensure format is valid date and date is not more than 60 days in the future.</p>
C019	<p>Invalid re-certification/revision date.</p> <p>Purpose:</p> <p>To ensure re-cert/revision date is greater than initial certification date and not more than 60 days in the future.</p>
C020	<p>Invalid scheduled re-certification date.</p> <p>Purpose:</p> <p>To ensure valid values:</p> <p>If cert. type = 1</p> <ul style="list-style-type: none"> • Initial cert. date plus 3 months if category 5 and medical necessity length = 3. • Initial cert. date plus 12 months if category 5 and medical necessity length = 12. <p>If Cert. Type = 3</p> <ul style="list-style-type: none"> • Re-certification date plus 3 months if medical necessity length = 3. • Re-certification date plus 12 months if medical necessity length = 12.
C021	<p>Invalid discontinue certification date.</p> <p>Purpose:</p> <p>To ensure valid values: Can be used only if adding cert. type 2. Must be greater than, or equal to, the initial certification date.</p>

Error Code	Explanation
C022	<p>Invalid medical necessity length.</p> <p>Purpose:</p> <p>To ensure valid values:</p> <p>Must be 00-15 or 99, if Category is 4 and Cert. Type is 2 or 3.</p> <p>Must be 01-15 or 99, if Category is 4 and Cert. Type is 1.</p> <p>Must be 00-36, if Category is 6 and Cert. Type is 2 or 3.</p> <p>Must be 01-36, if Category is 6 and Cert. Type is 1.</p> <p>Must be 00-15 or 99, for PEN pumps, and must be 03-99 for other PEN items, if Category is 7 and Cert. Type is 2 or 3.</p> <p>Must be 01-15 or 99, for PEN pumps, and must be 03-99 for other PEN items, if Category is 7 and Cert. Type is 1.</p> <p>Must be 00-99, if Category is 5 and Cert. Type is 2 or 3.</p> <p>Must be 01-99 if Category is 5 and Cert. Type is 1.</p>
C024	<p>Invalid diagnosis code 1.</p> <p>Purpose:</p> <p>To ensure only valid ICD9 Diagnosis Codes are submitted.</p>
C025	<p>Invalid Diagnosis Code 2.</p> <p>Purpose:</p> <p>To ensure only valid ICD9 Diagnosis Codes are submitted.</p>
C026	<p>Invalid Diagnosis Code 3.</p> <p>Purpose:</p> <p>To ensure only valid ICD9 Diagnosis Codes are submitted.</p>

Error Code	Explanation
C027	Invalid Diagnosis Code 4. Purpose: To ensure only valid ICD9 Diagnosis Codes are submitted.
C028	Invalid date last seen. Purpose: To ensure only spaces or valid dates are submitted.
C029	Invalid patient residence. Purpose: To ensure valid values: 12, 31-34, 54-56, 61, or spaces.
C030	Invalid ordering physician UPIN. Purpose: To ensure valid format: Positions 1-3, alphabetic or numeric. Positions 4-6, numeric only.
C032	Invalid ordering physician surname. Purpose: To ensure presence of ordering physician surname.
C033	Invalid ordering physician initial. Purpose: To ensure presence of ordering physician initial.
C034	Invalid supplier number. Purpose: To ensure the presence of a valid supplier number.

Error Code	Explanation
C036	Invalid delivery date. Purpose: To ensure valid format: Zeros if not used, or valid date.
C037	Invalid warranty information. Purpose: To ensure presence when the CMN warranty indicator is equal to Y
C039	Invalid replacement item. Purpose: To ensure valid values: Y, N, or spaces.
C041	Invalid flow rate. Purpose: To ensure valid values: Spaces, QE, QF, or QG.
C042	Invalid ABG level. Purpose: To ensure only valid ABG levels are submitted.
C043	Invalid ABG date. Purpose: To ensure valid format: zeros if not used, or valid date.
C044	Invalid saturation level. Purpose: To ensure a valid format: numeric, spaces if not used.

Error Code	Explanation
C045	Invalid oximetry date. Purpose: To ensure a valid format: zeros if not used, or valid date.
C047	Invalid oximetry test condition. Purpose: To ensure valid values: 1, 2, 3, or spaces.
C048	Invalid severity of illness. Purpose: To ensure valid values: N, Y, or spaces.
C049	Invalid route of administration. Purpose: To ensure valid values: 1, 3, 7, or spaces.
C050	Invalid impairment indicator. Purpose: To ensure valid values: N, Y, or spaces.
C051	Invalid method of administration. Purpose: To ensure valid values: 1, 2, 3, 4, or spaces.
C053	Invalid PB indicator. Purpose: To ensure valid values: N, Y, or spaces.

Error Code	Explanation
C054	Invalid type of therapy. Purpose: To ensure valid values: E, P, or spaces.
C055	Invalid frequency per week. Purpose: To ensure valid values: If field 54 is P, frequency per week = number of feedings required per week. If field 54 is E, frequency per week = number of daily feedings (field 59) times 7.
C058	Invalid enteral calories per day. Purpose: To ensure valid format: numeric.
C062	Invalid transplant failure indicator. Purpose: To ensure valid values: N, Y, or spaces. Must be spaces if Cert. Type equals 1 and Cat. equals 6.
C065	Invalid facility name. Purpose: To ensure valid values: valid facility name, or spaces.
C066	Invalid facility city. Purpose: To ensure presence of facility city.

Error Code	Explanation
C067	<p>Invalid facility state.</p> <p>Purpose:</p> <p>To ensure valid value: AK, AL, AR, AS, AZ, CA, CO, CT, DC, DE, FC, FL, FM, GA, GU, HI, IA, ID, IL, IN, KY, KS, LA, MA, MD, ME, MH, MI, MN, MO, MP, MS, MT, NB, NC, ND, NE, NH, NM, NJ, NV, NY, OH, OK, OR, PA, PR, PW, RI, SC, SD, TN, TX, UT, VA, VI, VT, WA, WI, WV, or WY.</p>
C068	<p>Invalid transplant discharge date.</p> <p>Purpose:</p> <p>To ensure presence and valid date format.</p>
C069	<p>ABG or oximetry tests required on initial CMN.</p> <p>Purpose:</p> <p>To ensure valid values:</p> <ul style="list-style-type: none"> • Either ABG test data (fields 42-43), and/or oximetry test data (fields 44-47) must be supplied; or • Both ABG test data (fields 42-43), and oximetry test data (fields 46-47) must be supplied. Incomplete sets of test information are not allowed.
C076	<p>PEN pumps and electric wheelchairs with Medical Necessity of 99 must have a Type of Service A or P. Capped rental may not have a Medical Necessity of 99.</p> <p>Purpose:</p> <p>To ensure valid values for Medical Necessity and Type of Service fields.</p>
C077	<p>Invalid contractor number for Host site.</p> <p>Purpose:</p> <p>To ensure that the transaction contractor number matches the header contractor number.</p>
C078	<p>Invalid scheduled re-certification date, or necessity length for parenteral nutrition or pump.</p>

Error Code	Explanation
	<p>Purpose:</p> <p>To ensure valid values:</p> <p>If Cert. Type = 1 and DMEPOS Category 7/HCPCS Category 20, B9004, or B9006: Initial Cert. Date must be plus 6 months, or less, and not blanks and Necessity Length must be 6 months, or less.</p>
C100	<p>HIC number not valid for equatable conversion. The HIC Number indicated on the HUCM must be valid for equatable conversion.</p> <p>Purpose:</p> <p>To ensure the railroad board beneficiary HIC number converts to a valid Social Security HIC number.</p>
C101	<p>Carrier number must be a valid DMERC Number. The number indicated on the HUCM transaction is not equal to a valid DMERC HIC Number.</p> <p>Purpose:</p> <p>To ensure that the CMN auxiliary maintenance transaction contractor number is found on the carrier locality code/address table.</p>
C102	<p>Surname must match beneficiary surname. The surname indicated on the HUCM transaction does not match the surname on the Beneficiary record. As of January 1, 2003, CWF will accept apostrophes, hyphens, and periods in a beneficiary's name.</p> <p>Purpose:</p> <p>To ensure that the CMN auxiliary maintenance transaction beneficiary surname matches the master beneficiary surname.</p>
C103	<p>First initial must match beneficiary first initial.</p> <p>Purpose:</p> <p>To ensure the CMN auxiliary maintenance transaction beneficiary initial matches the master beneficiary initial.</p>
C104	<p>Date of birth must match beneficiary date of birth. The Date of Birth indicated on the HUCM transaction does not match the Date of Birth on the Beneficiary record.</p>

Error Code	Explanation
	<p>Purpose:</p> <p>To ensure that the CMN auxiliary maintenance transaction beneficiary date of birth matches the master beneficiary date of birth.</p>
C105	<p>Sex code must match beneficiary sex code.</p> <p>Purpose:</p> <p>To ensure that the CMN auxiliary maintenance transaction beneficiary sex code matches the master beneficiary sex code.</p>
C106	<p>No matching CMNAUX initial record. A matching initial CMNAUX record must exist to accept the HUCM transaction.</p> <p>Purpose:</p> <p>To ensure the CMN auxiliary maintenance transaction has a matching record on the CMN auxiliary file.</p>
C107	<p>No matching CMNAUX revision/re-certification record.</p> <p>Purpose:</p> <p>To ensure a matching revision or re-certification CMNAUX record exists on the CMN Auxiliary file.</p>
C108	<p>HUCM initial CMN not found. No initial certification was found with the initial Certification Date indicated on the HUCM transaction.</p> <p>Purpose:</p> <p>To ensure a matching Certification Date exists on the CMN Auxiliary file.</p>
C109	<p>HUCM revision or re-certification not found. No revision or re-certification was found with the revision or re-certification Date indicated on the HUCM transaction.</p> <p>Purpose:</p> <p>To ensure a matching record is found on the CMN Auxiliary file.</p>

Error Code	Explanation
C110	<p>Contractor numbers must match. Only the originating contractor (DMERC) can update, or delete an existing initial, revision, or re-certification HUCM transaction. This edit is waived if the existing occurrence is a skeleton CMN.</p> <p>Purpose:</p> <p>To ensure that only an eligible contractor can make a change to an HUCM transaction.</p>
C111	<p>HCPCS code is not valid.</p> <p>Purpose:</p> <p>To ensure only valid HCPCS codes are submitted.</p>
C112	<p>HCPCS code is not valid for the DMEPOS category.</p> <p>Purpose:</p> <p>To ensure that the HCPCS code on the HUCM is valid for the DMEPOS category indicated on the HUCM transaction.</p>
C113	<p>HUCM update must contain original medical necessity length.</p> <p>Purpose:</p> <p>To ensure that when an HUCM update transaction is received, the medical necessity length on the transaction matches the length originally submitted.</p>
C115	<p>Skeleton CMN cannot be revised or re-certified. A skeleton CMN cannot be revised, or re-certified, except for the setting of the Discontinue Date.</p> <p>Purpose:</p> <p>To ensure that a skeleton CMN cannot be revised or re-certified, except for the setting of the Discontinue Date.</p>
C116	<p>HCPCS code has been cross-referenced to a new National Code. New certifications for this item must use the current HCPCS code.</p> <p>Purpose:</p> <p>To ensure that only current HCPCS codes are accepted.</p>

Error Code	Explanation
C117	Invalid type of service.
	Purpose:
	To ensure the type of service is spaces or matches a code on the HCPCS file.
C200	Invalid initial certification date.
	Purpose:
	To ensure that when adding a subsequent initial certification the initial Certification Date of the HUCM transaction is greater than the initial Certification Date of the current CMNAUX occurrence.
C201	Initial certification not greater than end date of an existing certification, or if a TENs unit, the initial certification not greater than, or equal to, the End Date of an existing certification.
	Purpose:
	To ensure that when adding a new initial certification, the HUCM initial Certification Date follows the prior Certification Date, unless the certification is for a TENs unit, then the Certification Date must be the same as, or greater than, the prior Certification Date, or if medical necessity length is 99, the prior Certification must be discontinued.
C202	Useful life of prior item not expired.
	Purpose:
	To ensure that an HUCM transaction to add a CMN has an initial certification prior to the end of the Useful Life Period of the current CMNAUX occurrence for the item. This transaction is permitted only for replacement items, or if the previous CMN has been discontinued, and the initial date is greater than the previous CMN's Discontinue Date.
C203	EPO permitted for ESRD Method II beneficiaries only.
	Purpose:
	To ensure that an initial CMN for EPO can be added only if the beneficiary had selected ESRD Method II when the CMN was issued.

Error Code	Explanation
C300	Revision date is after the certification end date. Purpose: To ensure that the revision date on an HUCM transaction cannot be after the termination date of the certification.
C302	New revision must be later than a prior revision. Purpose: To ensure that an HUCM revision date cannot be later than the date on the most current CMNAUX revision.
C303	Purchased DMEPOS item cannot be revised. Purpose: To ensure that a certification for a purchased item in DMEPOS Category 1-4, 9, A, and PEN pumps in Category 7 cannot be revised.
C400	Re-certification dates do not match. Purpose: To ensure that an HUCM re-certification date is equal to, greater than, or within the 30 days preceding the current certification's scheduled re-certification date.
C401	Discontinued certifications cannot be re-certified. Purpose: To ensure that the HUCM re-certification date is not after the CMNAUX discontinue date.
C402	New re-certification must follow prior re-certification. Purpose: To ensure that an HUCM re-certification date follows the date on the most current CMNAUX re-certification.

Error Code	Explanation
C403	Cannot re-certify old certifications.
	Purpose:
	To ensure that re-certifications are accepted for the current certification only.
C404	Re-certification re-tests required.
	Purpose:
	When adding the first oxygen re-certification, and the ABG Level was > 55, or the Saturation Level was > 88 on the initial CMN, either ABG test results (fields "42-43"), or oximetry test results (fields 44-47) must be supplied.
C405	ABG/Oximetry retest not performed within 61-90 days.
	Purpose:
	When adding the first oxygen re-certification, and the ABG Level was > 55, or the Saturation Level was > 88 on the initial CMN, the ABG, or Oximetry Test Date must be within 61-90 days of the initial Certification Date.
C406	Re-certification of parenteral nutrient and PEN pumps (HCPCS Codes B9004 or B9006) for lifetime cannot take place PRIOR to 6 months from the initial certification date.
	Purpose:
	To ensure that re-certifications take place within the required timeframe.

80.12 - Utilization Alert Codes

CWF Edit Alert (<http://cms.csc.com/cwf/downloads/docs/pdfs/editalrt.pdf>)

Alert Codes are sent to the Satellite when CWF believes that there is a potential problem or error in the claim. **The presence of an alert indicates that the Satellite should examine the information and make adjustments if necessary.**

Utilization Alert Codes

Alert Code	Explanation
5370	Part B This edit deactivated with R2003200. Mammography claim missing the certificate number, or certificate number is not numeric.
5371	Part B This edit deactivated with R2003200. Mammography certificate number does not match on mammography facility ID #.
5372	Part B This edit deactivated with R2003200. Mammography bill submitted with service From Date not equal to, or greater than, certification Start Date and service From Date not less than, or equal to, the certification Stop Date.
5512	DMEPOS Beneficiary has received emergency supplies at least once before.
7701	OP Outpatient claims with statement From Dates 01/01/1998 and later require HCPCS Code 90999 and a Modifier between G1 and G5 when the Revenue Code is equal to 0820, 0821, or 0829. Claims 1998 thru 12/31/02 alert is valid and claims from 01/01/2003 forward alert is deactivated and changed to Consistency Edit 58#4.

Alert Code	Explanation
C114	<p>CMN</p> <p>Claims History Alert. A HUCM delete transaction has been accepted and an entire certification, revision, or re-certification has been deleted. However, claims had been accepted for this item during the deleted certification period. The HUCM disposition is set to "AL" if this condition occurs.</p>
D911	<p>DMEPOS</p> <p>Purchase decision for a capped rental item must be received prior to the thirteenth rental month. For capped rental items, a purchase decision Modifier ("BP," "BR," or "BU") must be present on the claim for the eleventh rental month.</p>
D920	<p>DMEPOS</p> <p>No CMN was found for the submitted HCPCS, but the line item was successfully validated against a skeleton CMN for a commonly down coded HCPCS.</p>
D926	<p>DMEPOS</p> <p>Capped Rental, Electric Wheelchair, or PEN Pump rental months recalculated based on paid claims history data.</p>
D927	<p>DMEPOS</p> <p>Inexpensive and routinely purchased item rental payments recalculated based on paid claims history data and may be suspect.</p>

80.13 - Beneficiary Other Insurance Information (HUBO) Maintenance Transaction Error Codes

(Rev. 1, 10-01-03)

CWF EditMnts (<http://cms.csc.com/cwf/downloads/docs/pdfs/editmnts.pdf>)

HUBO (Beneficiary Other Insurance Information) Maintenance Transaction edit rejects are denoted by a value of "BO" in the disposition field on the Reply Record. A Trailer 08 containing up to four error codes will always follow. Listed below is the possible BOxx Maintenance Transaction error codes with a general description. **Each error must be corrected and the transaction resubmitted to CWF.**

The "50xx" series of Beneficiary edits that are returned on claim transaction response records that receive a Disposition "50," "51," etc. can also be returned on this maintenance transaction. The narrative description for these error codes is in the claim transaction edit sections.

HUBO Maintenance Transaction Error Codes

Error Code	Explanation
BO01	Beneficiary Health Insurance Number is missing, or invalid.
BO02	Beneficiary Surname is missing, or invalid.
BO03	Beneficiary Date of Birth is missing, or invalid.
BO04	Beneficiary Sex Code is invalid.
BO05	The Contractor Number is not equal to "11120."
BO06	The Date of Accretion is invalid.
BO07	The Deletion Date is invalid.
BO08	The Document Control Number is invalid.
BO09	The Action Type is missing, or invalid.
BO10	The Update Date is invalid.
BO11	The Insurance Coverage Type is missing, or invalid.
BO12	The Insurer Name or Address Info is invalid.
BO13	The Insurance Policy Number is invalid.

Error Code	Explanation
BO14	The Insurance Effective Date is invalid.
BO15	The Termination Date is invalid.
BO16	The Identifier Number is invalid.
BO17	The COBA Number is invalid.
BO18	The Plan ID Number is invalid.
BO19	The Other Insurer Number is invalid.
BO20	No match for update or delete found on BOI file.
BO21	Duplicate occurrence exists on the BOI file.
BO22	Record already deleted on BOI file.

80.14- Consolidated Claims Crossover Process

(Rev. 158, 04-30-04)

A. The Mechanics of the CWF Claims Selection Process and BOI and Claim-based Reply Trailers

1. CWF Receipt and Processing of the Coordination of Benefits Agreement Insurance File (COIF)

Effective July 6, 2004, the COBC will begin to send copies of the Coordination of Benefits Agreement Insurance File (COIF) to the nine CWF host sites on a weekly basis. The COIF will contain specific information that will identify the COBA trading partner, including name, COBA ID, address, and tax identification number (TIN). It will also contain each trading partner's claims selection criteria exclusions (claim or bill types that the trading partner does not want to receive via the crossover process) along with an indicator (Y=Yes; N=No) regarding whether the trading partner wishes its name to be printed on the Medicare Summary Notice (MSN). During the COBA parallel production period, which is estimated to run from July 6, 2004, to October 1, 2004, CWF will exclusively return an "N" MSN indicator to the intermediary or carrier.

The CWF shall load the initial COIF submission from COBC as well as all future weekly updates.

Upon receipt of a claim, the CWF shall take the following actions:

- e) *Search for a COBA eligibility record on the BOI auxiliary record for each beneficiary and obtain the associated COBA ID(s) [NOTE: There may be multiple COBA IDs];*
- f) *Refer to the COIF associated with each COBA ID (NOTE: CWF shall pull the COBA ID from the BOI auxiliary record) to obtain the COBA trading partner's name and claims selection criteria;*
- g) *Apply the COBA trading partner's selection criteria; and*
- h) *Transmit a BOI reply trailer 29 to the Medicare intermediary or carrier only if the claim is to be sent, via 837 COB flat file or National Council for Prescription Drug Programs (NCPDP) file, to the COBC to be crossed over. (See Pub.100-4, Chap. 28, §70.6 for more information about the claim file transmission process involving the Medicare intermediary or carrier and the COBC.)*

Effective with the October 2004 systems release, CWF shall read the COIF submission to determine whether a Test/Production Indicator "T" (test mode) or "P" (production mode) is present. CWF will then include the Test/Production Indicator on the BOI reply trailer 29 that is returned to the Medicare intermediary or carrier. (See additional details below.)

2. BOI Reply Trailer 29 Processes

For purposes of eligibility file-based crossover, if CWF selects a claim for crossover, it shall return a BOI reply trailer 29 to the Medicare intermediary or carrier. The returned BOI reply trailer 29 shall include, in addition to COBA ID(s), the COBA trading partner name(s), an "A" crossover indicator that specifies that the claim has been selected to be crossed over, the insurer effective and termination dates, and a 1-digit indicator ["Y"=Yes; "N"=No] that specifies whether the COBA trading partner's name should be printed on the beneficiary MSN. *Effective with the October 2004 systems release, CWF shall also include a 1-digit Test/Production Indicator "T" (test mode) or "P" (production mode) on the BOI reply trailer 29 that is returned to the intermediary or carrier.*

A. MSN Crossover Messages

As specified above, during the COBA parallel production period (July 6, 2004, to October 1, 2004), CWF will exclusively return an "N" MSN indicator via the BOI reply trailer, in accordance with the information received via the COIF submission. If an intermediary or carrier receives a "Y" MSN indicator during the parallel production period, it shall ignore it.

Beginning with the October 2004 systems release, when a contractor receives a BOI reply trailer 29 from CWF that contains a Test/Production Indicator “T” (test mode), it shall ignore the MSN Indicator provided on the trailer. Instead, the Medicare intermediary or carrier shall follow its existing procedures for inclusion of trading partner names on MSNs for those trading partners with whom it has existing Trading Partner Agreements (TPAs).

Beginning with the October 2004 systems release, when an intermediary or carrier receives a BOI reply trailer 29 from CWF that contains a Test/Production Indicator “P” (production mode), it shall read the MSN indicator (Y=Yes, print trading partner’s name; N=Do not print trading partner’s name) returned on the BOI reply trailer 29. (Refer to Pub.100-4, chapter 28, §70.6 for additional details.)

B. Electronic Remittance Advice (835)/Provider Remittance Advice Crossover Messages

Beginning with the October 2004 release, when contractors receive a BOI reply trailer (29) from CWF that contains a “T” Test/Production Indicator, they shall not print information received from the BOI reply trailer (29) in the required crossover fields on the 835 Electronic Remittance Advice or other provider remittance advice(s) that is/are in production. Contractors shall, however, populate the 835 ERA (or provider remittance advice(s) in production) with required crossover information when they have existing agreements with trading partners.

Beginning with the October 2004 release, when contractors receive a BOI reply trailer (29) from CWF that contains a “P” Test/Production Indicator, they shall use the returned BOI trailer information to take the following actions on the provider’s 835 Electronic Remittance Advice:

- 2) Record code 19 in CLP-02 (Claim Status Code) in Loop 2100 (Claim Payment Information) of the 835 ERA (v. 4010-A1). [NOTE: Record “20” in CLP-02 (Claim Status Code) in Loop 2100 (Claim Payment Information) when Medicare is the secondary payer.]*
- 2) Update the 2100 Loop (Crossover Carrier Name) on the 835 ERA as follows:*
 - NM101 [Entity Identifier Code]—Use “TT,” as specified in the 835 Implementation Guide.*
 - NM102 [Entity Type Qualifier]—Use “2,” as specified in the 835 Implementation Guide.*
 - NM103 [Name, Last or Organization Name]—Use the COBA trading partner’s name that accompanies the first sorted COBA ID returned to you on the BOI reply trailer.*
 - NM108 [Identification Code Qualifier]—Use “PI” (Payer Identification.)*

- *NM109 [Identification Code]—Use the first COBA ID returned to you on the BOI reply trailer. (See line 24 of the BOI aux. file record.*

If the 835 ERA is not in production and the contractor receives a “P” Test/Production Indicator, it shall use the information provided on the BOI reply trailer (29) to populate the existing provider remittance advices that it has in production.

When a beneficiary’s claim is associated with more than one COBA ID (i.e., the beneficiary has more than one health insurer/benefit plan that has signed a national COBA), CWF shall sort the COBA IDs and trading partner names in the following order: 1) Eligibility-based Medigap, 2) Supplemental, 3) TRICARE, 4) Others, and 5) Eligibility-based Medicaid. When two or more COBA IDs fall in the same range (see item 24 in the BOI Auxiliary File table above), CWF shall sort numerically within the same range.

3. Claim-Based Medigap and Medicaid Crossover Processes Involving CWF

As with eligibility file-based crossover, the CWF shall load the initial COIF submission from the COBC as well as all future updates that pertain to claim-based Medigap insurers and State Medicaid Agencies.

For claim-based crossover, the CWF shall only search the Coordination of Benefits Agreement Insurance File (COIF) if the carrier or DMERC has included a claim-based Medigap ID (55000—59999) or claim-based Medicaid ID (78000-79999) in field 36 of the HUBC or HUDC query. If claim-based COBA IDs are entered in field 36 of the HUBC or HUDC query, CWF shall:

- f) Search the COIF to locate the claim-based Medicaid and/or Medigap COBA ID and corresponding COBA Trading Partner Name;*
- g) Apply the Medigap claim-based trading partner’s claims selection criteria;*
- h) Return a Claim-based reply trailer 37 to the carrier or DMERC that includes values for claim-based COBA ID (sorted by Medigap, then Medicaid), COBA Trading Partner Name, and MSN Indicator when a claim-based COBA ID is found on the COIF and the claim is to be sent to the COBC to be crossed over;*
- i) Return an alert code 7704 on the “01” response via a Claim-based alert trailer 21 to the carrier or DMERC, as specified in Requirement 23 above, if a claim-based COBA ID in the Medigap claim-based range (55000-59999) is not located on the COIF; and*

- j) Return nothing to the carrier or DMERC if a Medicaid claim-based COBA ID (78000-79999) is not found on the COIF.*

As established above, the CWF will only return a Claim-based reply trailer 37 if: 1) it locates a claim-based COBA ID on the COIF, and 2) the claim is to be sent to the COBC for crossover.

4. CWF Treatment of Non-assigned Medicaid Claims

If CWF receives a non-assigned Medicare claim for a beneficiary whose BOI auxiliary record contains a COBA ID with a current effective date in the Medicaid eligibility-based range (70000-77999), it shall reject the claim. The CWF shall return an edit to the carrier or DMERC that specifies that non-assigned Medicare claims cannot be sent to Medicaid. At the same time, CWF shall also return a Medicaid reply trailer 36 to the carrier or DMERC that contains the trading partner's COBA ID and beneficiary's effective and termination dates under Medicaid. If the carrier or DMERC determines that the non-assigned claim's service dates fall during a period when the beneficiary is eligible for Medicaid, it shall convert the assignment indicator from "non-assigned" to "assigned" and retransmit the claim to CWF. After the claim has been retransmitted, the CWF will only return a BOI reply trailer to the carrier or DMERC if the claim is to be sent to the COBC to be crossed over.

80.15 Claims Crossover Disposition Indicators

(Rev. 158, 04-30-04)

Effective with the October 2004 systems release, when a COBA trading partner is in production mode (Test/Production Indicator sent via the COIF submission=P), CWF shall annotate each processed claim on detailed history in the Health Insurance Master Record (HIMR) with a claims crossover disposition indicator after it has applied the COBA trading partner's claims selection criteria. (See the table below for a listing of the indicators.) In addition, when a COBA trading partner is in production mode, CWF shall annotate each processed claim with a 10-position COBA ID (5-digit COBA ID preceded by 5 zeroes) to identify the entity to which the claim was crossed or not crossed, in accordance with the terms of the COBA.

CWF shall not annotate processed Medicare claims on the detailed history screens in HIMR when a COBA trading partner is in test mode (Test/Production Indicator sent via the COIF submission=T).

Once the claims crossover process is *fully* consolidated under the Coordination of Benefits Contractor (COBC), Medicare intermediary and carrier customer service staff will have access to a CWF auxiliary file that will display the crossover disposition of each beneficiary claim. The crossover disposition indicators that will appear on the

HIMR detailed history screens (INPH, OUTH, HOSH, PTBH, DMEH, and HHAH) are summarized below.

Claims Crossover Disposition Indicator	Definition/Description
A	This claim was selected to be crossed over.
B	This Type of Bill (TOB) excluded.
C	Non-assigned claim excluded.
D	Original Medicare claims paid at 100%.
E	Original Medicare claims paid at greater than 100% of the submitted charges excluded.
F	100% denied claims, with no additional beneficiary liability excluded.
G	100% denied claims, with additional beneficiary liability excluded.
H	Adjustment claims, monetary, excluded.
I	Adjustment claims, non-monetary/statistical, excluded.
J	MSP claims excluded.
K	This claim contains a provider identification number (ID) or provider state that is excluded by the COBA trading partner.
L	Claims from this Contractor ID excluded.
M	The beneficiary has other insurance (such as Medigap, supplemental, TRICARE, or other) that pays before Medicaid. Claim excluded by Medicaid.
N	NCPDP claims excluded.

NOTE: In the future, CMS may expand the above list beyond Indicator “N.” Once all remaining one-digit alpha indicators are committed, CMS will institute the use of two-position claims crossover disposition indicators.

90 - CWF Adjustment Actions

(Rev. 1, 10-01-03)

A3-3816

The CWF performs only two types of internal adjustment actions: (1) correcting utilization on bills that are already posted and notifying the Satellite of that action using a Form CMS-L1001, and (2) canceling posted bills when CWF discovers an error in the posted utilization and notifying the Satellite of that action using a Form CMS-L1002. Section 90.1 describes the actions contractors are to take in response to these notices.

90.1- Notification of Internal Adjustment Action(s) Taken by CMS

(Rev. 1, 10-01-03)

A3-3816.1

Forms CMS-L1001 and CMS-L1002, Notification of Internal Adjustment Action(s) Taken by CMS, are issued when CWF identifies and internally adjusts specific provider bills that were accepted and now reflect incorrect utilization of available benefits. Carriers and FIs are notified of these adjustments via Form CMS-L1001 for debit/credit and Form CMS-L1002 for cancel only.

These forms are used by CWF when merging two active Beneficiary Master Records for some reason (e.g., cross-reference process) or processing an out-of-sequence inpatient hospital or SNF claim that causes two benefit periods to become one benefit period. If CWF can determine what the correct benefits are, the Form CMS-L1001 is used to correct the utilization on a previously processed claim. However, if CWF cannot determine what the correct benefits are, the previously processed claim is cancelled and a Form CMS-L1002 is used.

Upon receipt of a Form CMS-L1001, the contractor must correct internal files and either recover any overpayment or pay any underpayment. Do not resubmit the claim to CWF.

Upon receipt of a Form CMS-L1002, the contractor must reprocess the claim and resolve the disposition of the claim. Resubmit the corrected claim to CWF as an initial claim. If this action results in a need for adjustment to other claims, the contractor adjusts those claims and submits them to CWF as adjustments. If one or more of the "other" claims requiring adjustment is a result of a Form CMS-L1001, the new debit is the claim to be adjusted. The contractor uses Bill Type xxG to identify all adjustments made in response to a CWF notification. This includes those "other" claims to be adjusted as a result of a Forms CMS-L1001 or CMS-L1002.

Upon receipt of Forms CMS-L1001 and/or CMS-L1002, the contractor will also receive pertinent data to assist it in resolving any discrepancies. However, this information may

not be sufficient by itself. If not, the contractor inquires into the CWF online system via the HIMR transaction for additional information.

Ensure that in-house records comply with the adjustment action. Also, the contractor notifies the provider. Beyond that, no further action is necessary.

NOTE: When scrambled utilization is detected and CMS can identify the appropriate beneficiaries, CWF initiates the necessary internal adjustment actions to remove utilization from the incorrect record. If a bill has not been posted for the correct record, the contractor submits one. The CWF cannot create the initial bill for the beneficiary's record.

100 - CWF Unsolicited Response

AB-01-111, AB-01-149, AB-02-002, AB-02-021, AB-02-023, AB-02-037, B-02-059, B-02-067, B-02-087, A-02-008, A-02-068, A-02-107

The CWF unsolicited response and automatic adjustment process is a means to retroactively adjust certain paid claims where subsequent claims or other subsequent actions are the first indicator that payment was inappropriate. Examples are:

- Home Health Agency (HHA)
- Medicare Quality Partnerships Demonstration (formerly referred to as "Medicare Centers of Excellence Demonstration")
- Medicare Provider Partnership Demonstration
- Skilled Nursing Facility (SNF)

The CWF sends an unsolicited response to carriers and/or FIs in response to these inappropriate claims. Edit codes usually are in the AB crossover categories.

When the carrier or FI receives an unsolicited response they are required to review each designated line item for possible recovery of payment. Claims subject to these unsolicited response edits are outlined in the following sections.

100.1 - Claims Related to an HH PPS Episode

AB-01-111, A-02-008

The CWF sets an error code for paid therapy and non-routine supply claims that contain line items for a date of service that is within a home health episode that is subject to HH PPS consolidated billing. These claims would have been processed prior to the posting of a claim for a HH PPS episode.

Upon receipt of a HH PPS claim, CWF will search paid claims history to determine whether any services subject to consolidated billing related to the HH PPS episode period

were paid by any FI or carrier. CWF will compare the period between the HH claim from and through date (which represent the episode start date and the date of discharge) to the line item service dates of the claims on history. Services that must be consolidated in the HH PPS claim will be identified. CWF will generate an unsolicited response, with a trailer containing the identifying information regarding the claim subject to consolidated billing and a trailer containing line item specific information that identifies all the individual services on that claim that fall within the HH claim dates. The unsolicited response will have all necessary information to identify the claim, including document control number and health insurance claim number. CWF will electronically transmit this unsolicited response to the FI or carrier that originally processed the claim with consolidated services. These unsolicited responses will be included in the existing unsolicited response file. The unsolicited responses in that file that are claims to be adjusted for consolidated billing will be identified with a unique transaction identifier and disposition code. The previously paid claim will not be canceled and will remain on CWF paid claims history, pending subsequent adjustment.

Upon receipt of the unsolicited response file, the FI shared system software will read the line item information in the new trailer for each claim and perform an automated adjustment to each claim. Carriers will perform a manual adjustment. The adjustment will line-item deny the services subject to consolidated billing. The adjusted claims will then be returned to CWF, so that the claim on CWF paid claims history is replaced with the adjusted record. FIs will return the claims with action code "3." Carriers and durable medical equipment regional carriers (DMERCs) will return the claims with entry code "5." Carriers must return both the covered and the denied services to CWF on the adjustment claim. FIs must return only the covered lines to CWF on the adjustment claim.

When CWF adjusts the claim on history, the deductible will be updated on the beneficiary's file and the corrected deductible information will be returned to the FI or carrier in Trailer 11.

Any monies due back to Medicare resulting from these denials will be recovered using current recovery procedures.

In the event that a denial is reversed upon appeal, based upon evidence that the home health claim information on CWF that generated the denial was inaccurate, an override procedure for the CWF denial is available to permit payment to be made.

In cases where all services on the claim are identified in CWF as subject to consolidated billing, the claim will be adjusted by the FI or carrier shared system to line item deny all the services on the claim. Carriers must return these fully denied claims to CWF, in order to reflect the denial actions in CWF paid claims history and to update the information in CMS' National Claims History file. Carrier and DMERC systems will use existing processes for the submission of fully denied claims. FIs should hold fully denied claims resulting from these changes until instructions are released.

It also allows CMS to correct situations where two HIC Numbers exist for the same Beneficiary because of a clerical error. The volume of these corrections is expected to be low, but the project will be an on-going process, not a one-time fix.
