CMS Manual System Pub. 100-04 Medicare Claims Processing Transmittal 286 Department of Health & Human Services (DHHS) Centers for Medicare & Medicaid Services (CMS) Date: AUGUST 27, 2004

CHANGE REQUEST 3421

SUBJECT: Medicare Physician Fee Schedule Database (MPFSDB) 2005 File Layout

I. SUMMARY OF CHANGES: Provides the annual file layout for 2005 for Medicare carriers.

NEW/REVISED MATERIAL - EFFECTIVE DATE*: January 1, 2005 IMPLEMENTATION DATE: January 3, 2005

Disclaimer for manual changes only: The revision date and transmittal number apply to the red italicized material only. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

II. CHANGES IN MANUAL INSTRUCTIONS: (N/A if manual not updated.)
(R = REVISED, N = NEW, D = DELETED) – (Only One Per Row.)

R/N/D	CHAPTER/SECTION/SUBSECTION/TITLE
R	23/Addendum

III. FUNDING: Medicare contractors shall implement these instructions within their current operating budgets.

IV. ATTACHMENTS:

X	Business Requirements
X	Manual Instruction
	Confidential Requirements
	One-Time Notification
	Recurring Update Notification

^{*}Unless otherwise specified, the effective date is the date of service.

Attachment - Business Requirements

Pub. 100-04 Transmittal: 286 Date: August 27, 2004 Change Request 3421

SUBJECT: Medicare Physician Fee Schedule Database (MPFSDB) 2005 File Layout

I. GENERAL INFORMATION

A. Background: The Medicare physician fee schedule database (MPFSDB) is the file layout for carriers. It includes the total fee schedule amount, related component parts, and payment policy indicators.

NOTE: Reminder to carriers that the MPFSDB will not be populated with discontinued codes since the 90 day grace period for billing discontinued codes is being eliminated. There is no longer a need to price discontinued services for January, February and March. Carriers shall use the 2005 HCPCS file to view discontinued codes.

B. Policy: This is the annual file layout for 2005.

C. Provider Education: None.

II. BUSINESS REQUIREMENTS

"Shall" denotes a mandatory requirement

[&]quot;Should" denotes an optional requirement

Requirement Number	Requirements	Responsibility (place an "X" in the columns that apply)									
								Shared System Maintainers			Other
		FI	RHHI	Carrier	DMERC	FISS	MCS	VMS	CWF		
3421.1 Chapter 23, Addendum	Carriers shall recognize the 2005 MPFSDB file layout.			X							
3421.2	Carriers shall use 2005 HCPCS file to view discontinued codes.			X							

III. SUPPORTING INFORMATION AND POSSIBLE DESIGN CONSIDERATIONS

A. Other Instructions: N/A

X-Ref Requirement #	Instructions

B. Design Considerations: N/A

X-Ref Requirement #	Recommendation for Medicare System Requirements			

C. Interfaces: N/A

D. Contractor Financial Reporting /Workload Impact: N/A

E. Dependencies: N/A

F. Testing Considerations: N/A

IV. SCHEDULE, CONTACTS, AND FUNDING

Effective Date*: January 1, 2005	Medicare contractors shall implement these instructions
Implementation Date: January 3, 2005	within their current operating budgets.
Pre-Implementation Contact(s): Vera A. Dillard (410) 786-6149	- Augess
Post-Implementation Contact(s): Vera A. Dillard (410) 786-6149	

^{*}Unless otherwise specified, the effective date is the date of service.

2005 File Layout

Addendum - MPFSDB Record Layouts

(Rev. 286, Issued 08-27-04, Effective: 01-01-05/Implementation: 01-03-05)

The CMS MPFSDBs include the total fee schedule amount, related component parts, and payment policy indicators. The record layout of the 2001, 2002, 2003, 2004 and 2005 files are provided below.

2005 File Layout

HEADER RECORD

FIELD#	DATA ELEMENT NAME	LOCATION	PIC
1	Header ID	1-4	x(4) Value "Head"
2	Header Number	5	x(1)
3	Data Set Name	6-50	x(45)
4	Record Length	51-53	x(3)
5	Filler	54-54	x(1)
6	Block size	55-58	<i>x</i> (4)
7	Filler	59-59	x(1)
8	Number of Records Number does not include this header record.	60-69	9(10)
9	Date Created	70-77	x(8) YYYYMMDD
10	Blanks	78-345	x(268)

FILE LAYOUT

FIELD # & ITEM	LENGTH & PIC
1	4 Pic x(4)
File Year	
This field displays the effective year of the file.	
2	5 Pic x(5)
Carrier Number	
This field represents the 5-digit number assigned to the carrier.	
3	2 Pic x(2)
Locality	
This 2-digit code identifies the pricing locality used.	
4	5 Pic x(5)
HCPCS Code	
This field represents the procedure code. Each Carrier Procedural Terminology (CPT) code and alpha-numeric HCPCS codes other	

FIELD # & ITEM	LENGTH & PIC
than B, C, E, K and L codes and services representing anesthesia services will be included. The standard sort for this field is blanks, alpha, and numeric in ascending order.	
5	2 Pic x(2)
Modifier	
For diagnostic tests, a blank in this field denotes the global service and the following modifiers identify the components:	
26 = Professional component	
TC = Technical component	
For services other than those with a professional and/or technical component, a blank will appear in this field with one exception: the presence of CPT modifier -53 which indicates that separate Relative Value Units (RVUs) and a fee schedule amount have been established for procedures which the physician terminated before completion. This modifier is used only with colonoscopy code 45378 and screening colonoscopy codes G0105 and G0121. Any other codes billed with modifier -53 are subject to carrier medical review and priced by individual consideration.	
Modifier-53 = Discontinued Procedure - Under certain circumstances, the physician may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances, or those that threaten the well being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued.	
6	<i>50 Pic x(50)</i>
Descriptor	
This field will include a brief description of each procedure code.	
7	$1 \operatorname{Pic} x(1)$
Code Status	
This I position field provides the status of each code under the full fee schedule. Each status code is explained in §30.2.2.	
8	8 Pic 9(4)v9999
Conversion Factor	
This field displays the multiplier which transforms relative values into payment amounts. The file will contain the 2005 conversion factor which will reflect all adjustments.	
9	6 Pic 9(2)v9999
Update Factor	
This update factor has been included in the conversion factor in	

FIELD # & ITEM	LENGTH & PIC
Field 8.	
10	9 Pic 9(7)v99
Work Relative Value Unit	
This field displays the unit value for the physician work RVU.	
11	9 Pic 9(7)v99
Filler	
12	9 Pic 9(7)v99
Malpractice Relative Value Unit	
This field displays the unit value for the malpractice expense RVU.	
13	5 Pic 99v999
Work Geographic Practice Cost Indices (GPCIs)	
This field displays a work geographic adjustment factor used in computing the fee schedule amount.	
14	5 Pic 99v999
Practice Expense GPCI	
This field displays a practice expense geographic adjustment factor used in computing the fee schedule amount.	
15	5 Pic 99v999
Malpractice GPCI	
This field displays a malpractice expense geographic adjustment factor used in computing the fee schedule amount.	
16	3 Pic x(3)
Global Surgery	
This field provides the postoperative time frames that apply to payment for each surgical procedure or another indicator that describes the applicability of the global concept to the service.	
000 = Endoscopic or minor procedure with related preoperative and postoperative relative values on the day of the procedure only included in the fee schedule payment amount; evaluation and management services on the day of the procedure generally not payable.	
010 = Minor procedure with preoperative relative values on the day of the procedure and postoperative relative values during a 10-day postoperative period included in the fee schedule amount; evaluation and management services on the day of the procedure and during this 10-day postoperative period generally not payable.	
090 = Major surgery with a 1-day preoperative period and 90-day postoperative period included in the fee schedule payment amount.	

FIELD # & ITEM	LENGTH & PIC
MMM = Maternity codes; usual global period does not apply.	
$XXX = Global \ concept \ does \ not \ apply.$	
YYY = Carrier determines whether global concept applies and establishes postoperative period, if appropriate, at time of pricing.	
ZZZ = Code related to another service and is always included in the global period of the other service. (Note: Physician work is associated with intra-service time and in some instances the post service time.)	
17	6 Pic 9v9(5)
Preoperative Percentage (Modifier 56)	
This field contains the percentage (shown in decimal format) for the preoperative portion of the global package. For example, 10 percent will be shown as 010000. The total of fields 17, 18, and 19 will usually equal one. Any variance is slight and results from rounding.	
18	6 Pic 9v9(5)
Intraoperative Percentage (Modifier 54)	
This field contains the percentage (shown in decimal format) for the intraoperative portion of the global package including postoperative work in the hospital. For example, 63 percent will be shown as 063000. The total of fields 17, 18, and 19 will usually equal one. Any variance is slight and results from rounding.	
19	6 Pic 9v9(5)
Postoperative Percentage (Modifier 55)	
This field contains the percentage (shown in decimal format) for the postoperative portion of the global package that is provided in the office after discharge from the hospital. For example, 17 percent will be shown as 017000. The total of fields 17, 18, and 19 will usually equal one. Any variance is slight and results from rounding.	
20	$1 \operatorname{Pic} x(1)$
Professional Component (PC)/Technical Component (TC) Indicator	
0 = Physician service codes: This indicator identifies codes that describe physician services. Examples include visits, consultations, and surgical procedures. The concept of PC/TC does not apply since physician services cannot be split into professional and technical components. Modifiers 26 & TC cannot be used with these codes. The total Relative Value Units (RVUs) include values for physician work, practice expense and malpractice expense. There are some codes with no work RVUs.	
I = Diagnostic tests or radiology services: This indicator identifies	

FIELD # & ITEM LENGTH & PIC

codes that describe diagnostic tests, e.g., pulmonary function tests, or therapeutic radiology procedures, e.g., radiation therapy. These codes generally have both a professional and technical component. Modifiers 26 and TC can be used with these codes.

The total RVUs for codes reported with a 26 modifier include values for physician work, practice expense, and malpractice expense.

The total RVUs for codes reported with a TC modifier include values for practice expense and malpractice expense only. The total RVUs for codes reported without a modifier equals the sum of RVUs for both the professional and technical component.

2 = Professional component only codes: This indicator identifies stand alone codes that describe the physician work portion of selected diagnostic tests for which there is an associated code that describes the technical component of the diagnostic test only and another associated code that describes the global test.

An example of a professional component only code is 93010, Electrocardiogram; interpretation and report. Modifiers 26 and TC cannot be used with these codes. The total RVUs for professional component only codes include values for physician work, practice expense, and malpractice expense.

3 = Technical component only codes: This indicator identifies stand alone codes that describe the technical component (i.e., staff and equipment costs) of selected diagnostic tests for which there is an associated code that describes the professional component of the diagnostic tests only.

An example of a technical component code is 93005, Electrocardiogram, tracing only, without interpretation and report. It also identifies codes that are covered only as diagnostic tests and therefore do not have a related professional code. Modifiers 26 and TC cannot be used with these codes.

The total RVUs for technical component only codes include values for practice expense and malpractice expense only.

4 = Global test only codes: This indicator identifies stand alone codes for which there are associated codes that describe: a) the professional component of the test only and b) the technical component of the test only. Modifiers 26 and TC cannot be used with these codes. The total RVUs for global procedure only codes include values for physician work, practice expense, and malpractice expense. The total RVUs for global procedure only codes equals the sum of the total RVUs for the professional and technical components only codes combined.

5 = Incident to codes: This indicator identifies codes that describe

FIELD # & ITEM	LENGTH & PIC
services covered incident to a physicians service when they are provided by auxiliary personnel employed by the physician and working under his or her direct supervision.	
Payment may not be made by carriers for these services when they are provided to hospital inpatients or patients in a hospital outpatient department. Modifiers 26 and TC cannot be used with these codes.	
6 = Laboratory physician interpretation codes: This indicator identifies clinical laboratory codes for which separate payment for interpretations by laboratory physicians may be made. Actual performance of the tests is paid for under the lab fee schedule. Modifier TC cannot be used with these codes. The total RVUs for laboratory physician interpretation codes include values for physician work, practice expense and malpractice expense.	
7 = Physical therapy service: Payment may not be made if the service is provided to either a hospital outpatient or inpatient by an independently practicing physical or occupational therapist.	
8 = Physician interpretation codes: This indicator identifies the professional component of clinical laboratory codes for which separate payment may be made only if the physician interprets an abnormal smear for hospital inpatient. This applies only to code 85060. No TC billing is recognized because payment for the underlying clinical laboratory test is made to the hospital, generally through the PPS rate.	
No payment is recognized for code 85060 furnished to hospital outpatients or non-hospital patients. The physician interpretation is paid through the clinical laboratory fee schedule payment for the clinical laboratory test.	
9 = Concept of a professional/technical component does not apply.	
21	1 Pic (x) I
Multiple Procedure (Modifier 51)	
Indicator indicates which payment adjustment rule for multiple procedures applies to the service.	
0 = No payment adjustment rules for multiple procedures apply. If procedure is reported on the same day as another procedure, base payment on the lower of: (a) the actual charge or (b) the fee schedule amount for the procedure.	
1 = Standard payment adjustment rules in effect before January 1, 1996, or multiple procedures apply. In the 1996 MPFSDB, this indicator only applies to codes with procedure status of "D." If a procedure is reported on the same day as another procedure with an indicator of 1,2, or 3, rank the procedures by fee schedule amount	

FIELD # & ITEM	LENGTH & PIC
and apply the appropriate reduction to this code (100 percent, 50 percent, 25 percent, 25 percent, and by report). Base payment on the lower of: (a) the actual charge or (b) the fee schedule amount reduced by the appropriate percentage.	
2 = Standard payment adjustment rules for multiple procedures apply. If procedure is reported on the same day as another procedure with an indicator of 1, 2, or 3, rank the procedures by fee schedule amount and apply the appropriate reduction to this code (100 percent, 50 percent, 50 percent, 50 percent, and by report). Base payment on the lower of: (a) the actual charge or (b) the fee schedule amount reduced by the appropriate percentage.	
3 = Special rules for multiple endoscopic procedures apply if procedure is billed with another endoscopy in the same family (i.e., another endoscopy that has the same base procedure). The base procedure for each code with this indicator is identified in field 31G.	
Apply the multiple endoscopy rules to a family before ranking the family with other procedures performed on the same day (for example, if multiple endoscopies in the same family are reported on the same day as endoscopies in another family or on the same day as a non-endoscopic procedure).	
If an endoscopic procedure is reported with only its base procedure, do not pay separately for the base procedure. Payment for the base procedure is included in the payment for the other endoscopy.	
4 = Indicator is reserved for possible future use.	
9 = Concept does not apply.	
22	1 Pic (x)1
Bilateral Surgery Indicator (Modifier 50)	
This field provides an indicator for services subject to a payment adjustment.	
0 = 150 percent payment adjustment for bilateral procedures does not apply. If procedure is reported with modifier -50 or with modifiers RT and LT, base payment for the two sides on the lower of: (a) the total actual charge for both sides or (b) 100 percent of the fee schedule amount for a single code. Example: The fee schedule amount for code XXXXX is \$125. The physician reports code XXXXX-LT with an actual charge of \$100 and XXXXX-RT with an actual charge of \$100.	
Payment would be based on the fee schedule amount (\$125) since it is lower than the total actual charges for the left and right sides (\$200).	
The bilateral adjustment is inappropriate for codes in this category because of (a) physiology or anatomy or (b) because the code	

FIELD # & ITEM LENGTH & PIC

descriptor specifically states that it is a unilateral procedure and there is an existing code for the bilateral procedure.

1=150 percent payment adjustment for bilateral procedures applies. If code is billed with the bilateral modifier or is reported twice on the same day by any other means (e.g., with RT and LT modifiers or with a 2 in the units field), base payment for these codes when reported as bilateral procedures on the lower of: (a) the total actual charge for both sides or (b) 150 percent of the fee schedule amount for a single code.

If code is reported as a bilateral procedure and is reported with other procedure codes on the same day, apply the bilateral adjustment before applying any applicable multiple procedure rules.

2 = 150 percent payment adjustment for bilateral procedure does not apply. RVUs are already based on the procedure being performed as a bilateral procedure. If procedure is reported with modifier -50 or is reported twice on the same day by any other means (e.g., with RT and LT modifiers with a 2 in the units field), base payment for both sides on the lower of (a) the total actual charges by the physician for both sides or (b) 100 percent of the fee schedule amount for a single code.

Example: The fee schedule amount for code YYYYY is \$125. The physician reports code YYYYY?LT with an actual charge of \$100 and YYYYY-RT with an actual charge of \$100. Payment would be based on the fee schedule amount (\$125) since it is lower than the total actual charges for the left and right sides (\$200).

The RVUs are based on a bilateral procedure because: (a) the code descriptor specifically states that the procedure is bilateral; (b) the code descriptor states that the procedure may be performed either unilaterally or bilaterally; or (c) the procedure is usually performed as a bilateral procedure.

3 = The usual payment adjustment for bilateral procedures does not apply. If procedure is reported with modifier -50 or is reported for both sides on the same day by any other means (e.g., with RT and LT modifiers or with a 2 in the units field), base payment for each side or organ or site of a paired organ on the lower of: (a) the actual charge for each side or (b) 100% of the fee schedule amount for each side. If procedure is reported as a bilateral procedure and with other procedure codes on the same day, determine the fee schedule amount for a bilateral procedure before applying any applicable multiple procedure rules.

Services in this category are generally radiology procedures or other diagnostic tests which are not subject to the special payment rules for other bilateral procedures.

FIELD # & ITEM	LENGTH & PIC
9 = Concept does not apply.	
23	1 Pic (x)1
Assistant at Surgery	
This field provides an indicator for services where an assistant at surgery is never paid for per IOM.	
0 = Payment restriction for assistants at surgery applies to this procedure unless supporting documentation is submitted to establish medical necessity.	
I = Statutory payment restriction for assistants at surgery applies to this procedure. Assistant at surgery may not be paid.	
2 = Payment restriction for assistants at surgery does not apply to this procedure. Assistant at surgery may be paid.	
9 = Concept does not apply.	
24	$1 \operatorname{Pic}(x) 1$
Co-Surgeons (Modifier 62)	
This field provides an indicator for services for which two surgeons, each in a different specialty, may be paid.	
0 = Co-surgeons not permitted for this procedure.	
I = Co-surgeons could be paid; supporting documentation required to establish medical necessity of two surgeons for the procedure.	
2 = Co-surgeons permitted; no documentation required if two specialty requirements are met.	
9 = Concept does not apply.	
25	1 Pic (x)1
Team Surgeons (Modifier 66)	
This field provides an indicator for services for which team surgeons may be paid.	
0 = Team surgeons not permitted for this procedure.	
<i>I</i> = Team surgeons could be paid; supporting documentation required to establish medical necessity of a team; pay by report.	
2 = Team surgeons permitted; pay by report.	
9 = Concept does not apply.
