Subject: Support for Revisions to A-76

We firmly support the proposed revisions to Circular A-76. Our firm is engaged in the provision of geospatial services to various, governmental, agencies and professional firms in the private sector. There are thousands of federal employees involved in geospatial activities, such as ; surveying, mapping, charting and image acquisition. These activities are essentially commercial in nature. We further recommend that the proposed revisions specify that, any and all, public - private competition for surveying, mapping, engineering and architectural services, be implemented, in accordance with the 'Qualifications Based Selection' (QBS) process, as outlined in the Brooks Act and mandated in Federal Acquisition Regulations. Your consideration of our position, in this matter, is appreciated.

Respectfully,

John Combs, PLS, CP
