CHANGE REQUEST 1204

SUBJECT: Contractor Updating of the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM)

This Program Memorandum (PM) serves as a reminder to Part A and Part B contractors regarding the annual ICD-9-CM coding update for claims received on or after October 1, 2000. To assist you in updating your system we have attached the new ICD-9-CM addendum (Table of Drugs, Index Addenda, Tabular Addenda, and Procedures).

Carrier Information:

You are required to accept both old and new ICD-9-CM codes for claims received October 1 through December 31, 2000. This grace period give providers sufficient time to obtain and integrate the updated ICD-9-CM codes into their billing systems. For claims received on or after January 1, 2001, the latest version of the ICD-9-CM codes must be used by providers.

In a regularly scheduled bulletin (published at least 45 days prior to October 1, 2000) you are to inform providers that they must begin using the updated ICD-9-CM codes for claims submitted on or after October 1, 2000 and that the updated diagnostic codes must be used for services billed on or after January 1, 2001. In addition, please include information explaining the options available to providers for obtaining the updated ICD-9-CM codes. Bulletins should emphasize the importance for providers to use the most recent version of the ICD-9-CM coding book and to code to the highest level of specificity.

Intermediary Information:

You are required to accept new ICD-9-CM codes for diagnoses and procedures for hospital discharges and outpatient services occurring on or after October 1, 2000. The new Grouper 18.0 will assign Diagnosis Related Groups based on new codes. The Medicare Code Editor (MCE) 17.0 and Outpatient Code Editor (OCE) 1.1 will use the codes in validating coding for discharges and outpatient services beginning October 1, 2000, or later.

You should publish this material in your next regularly scheduled bulletin.

These changes are particularly important for Outpatient Prospective Payment System (OPPS) providers because of the relationship between coding and payment. Encourage hospitals to send a copy to the Director of Medical Records. Other providers which code diagnoses and procedures (non-OPPS providers) are also affected. In addition, the new diagnosis codes are used in hospital outpatient billing.

Handle questions on the operation of Grouper, MCE, or OCE in accordance with your regular procedures. For diagnosis coding questions contact Donna Pickett, or Amy Blum, (301) 458-4200, at the National Center for Health Statistics. For procedure coding questions contact Pat Brooks (410) 786-5318, Ann Fagan (410) 786-5662 or Amy Gruber (410) 786-1542, HCFA Division of Acute Care.

HCFA-Pub. 60AB

The *effective date* for this PM is October 1, 2000.

The *implementation date* for this PM is October 1, 2000.

These instructions should be implemented within your current operating budget.

This PM may be discarded after October 1, 2001.

If you have any questions, contact the appropriate regional office. Regional office staff can direct their questions on carrier operations to Patricia Gill on (410) 786-1297. Intermediary questions can be directed to Barbara Strickland on (410) 786-0508.
