PART 2c
VITAL STATISTICS ICD-10 ACME DECISION TABLES
For
CLASSIFYING UNDERLYING CAUSES OF DEATH, 2004

SECTION I - INTRODUCTION

This manual contains the decision tables used by the ICD-10 ACME system to assign the underlying causes of death within the framework of the rules and instructions contained in the Vital Statistics Instructions For Classifying the Underlying Cause of Death, 2004 (Part 2a). Corrections and refinements in the Decision Tables and/or in the ACME computer programs are incorporated at the beginning of each data year prior to processing of that year's data. Updating only annually maintains comparability throughout each data year of NCHS and State mortality medical data. Refining the accuracy of the tables at more frequent intervals is desirable from a coder's viewpoint, but data analysis considerations must take priority.

Major Revisions from Previous Manuals

1. HIV: HIV will no longer link with trivial and ill-defined conditions unless Indexed as such in Volume 3, effective 2004. These Table entries have been removed.

2. Effective 2004, conditions classifiable to category A811 will not be accepted due to any other condition, except itself.

3. The following ICD-10 codes have been deleted from the table of Trivial Conditions (Table H) effective 2004: H590 - H599.

4. The following created ICD-10 code has been deleted from the table of valid multiple cause codes (Table B) effective 2004: F0300

5. The following created ICD-10 codes have been added to the table of valid multiple cause codes (table B): I4200, I4210, I4220, I4250, I4280, I4290, J8410, and J8490.

Table A (Valid Codes for Multiple and Underlying Cause Coding) lists each ICD code that is valid for both multiple and underlying cause coding. Table B (Valid Codes for Multiple Cause Coding) lists each ICD code that is valid for multiple cause coding but invalid for underlying cause coding. Table C (Invalid Codes for Multiple and Underlying Cause Coding) lists each ICD code that is invalid for both multiple and underlying cause coding. Table D (Causal Relationship) shows which pairs of multiple cause codes constitute acceptable causal relationships (reported sequences). Table E (Modification) includes direct sequel, ill-defined conditions, senility, linkage, and specificity relationships. Table F contains the reason for every ambivalent entry in Table E. This is further guidance to help in the selection of the most appropriate underlying cause of death. Table G (Code Conversions) cites each special code generated for multiple cause coding and the underlying cause to which it converts. Table H (ICD-10 Trivial Conditions) lists the codes for conditions considered for coding purposes to be trivial (a condition unlikely itself to cause death).

These tables provide guidance on acceptable sequences, highly improbable sequences, and modifications in assigning underlying causes of death in compliance with the International Rules set forth in ICD-10. The tables are designed in accordance with the selection and modification rules contained in Part 2a and the rules for coding conditions contained in Part 2b of the Vital Statistics Instruction Manual series. When the decision tables are used in the process of assigning underlying causes of death, the applicable pair of conditions should be viewed within the framework of the basic coding principles in Part 2b. Otherwise, error in the underlying cause of death can result.

The decision tables have been tested and reviewed. Test results have established that the ACME system will produce the same underlying cause of death as that assigned in the manual coding process in approximately 99 percent of the cases. Nonetheless, there are certain considerations that must be taken into account in their use.

First, an undertaking that attempts to deal with such a mass body of data with an objective of making firm conclusions on each code relationship with each other code for each decision table will, by its very nature, contain some inconsistent entries and oversight. As these are detected through use of the ACME system, corrections will be made in subsequent issues of this manual.

Secondly, the tables provide decisions used by NCHS in applying selection and modification rules in arriving at underlying causes of death. These decisions are intended to provide guidance to coders and to further standardize the mortality medical classification process. The tables are not intended to convey any conclusive medical judgment or knowledge. It is recognized that many of these relationships involve conditions about which medical opinion is divided.

SECTION II - GUIDANCE IN USE OF DECISION TABLES

Addresses and Subaddresses - Tables D, E, and F contain address and subaddress codes. The address always consists of a single 3 - 5 digit code enclosed in dashes e.g. "--- G08 ---." The subaddress is given under the address code and may consist of a single code or a span of codes. Interpretation is as follows for subaddresses:

G10	is a single 3 digit code
I800-I809	includes any valid 4th digit contained in category I80
K20-K219	includes all valid codes contained in categories K20 thru K219

Asterisk codes – ICD-10 provides for the classification of certain diagnostic statements according to two different axes - etiology or underlying disease process and manifestation or complication. Thus, there are two codes for those diagnostic statements subject to dual classification. The etiology or underlying disease process codes are marked with a dagger (H), and the manifestation or complication codes are marked with an asterisk (*) following the code in ICD-10. NCHS does not use the asterisk codes in multiple cause coding.

The asterisk codes have not been used for underlying cause coding; they are therefore not in the decision tables. It is noted that certain codes in ICD-10 can be regarded as asterisk or dagger codes depending on the inclusion term being referenced. When such codes are contained in the decision tables they are defined as dagger codes.

Created ICD-10 Categories - In ICD-10 a number of categories contain inclusion terms which are dissimilar in terms of how they causally relate to or combine with other categories. This dissimilarity in effect dictates that the causal relationship must be designated as having an ambivalent ("maybe") relationship in the ACME decision tables. As a result, the ACME underlying cause of death assignment for such cases is conditional in nature and must be reviewed by a nosologist. A number of the affected categories are relatively high in frequency and; therefore, reduce systems throughput capability of the automated assignment. NCHS has chosen to eliminate ambivalent systems rejects for 29 high frequency ICD categories by modifying the inclusion terms which are assigned to such categories. This has been accomplished by removing certain inclusion terms from an existing category and creating an artificial category not currently used by the ICD for those terms. This isolates the affected terms into separate categories so causal and modification relationships can be specifically stated as "yes" or "no." The resultant set of special codes thus includes existing ICD-10 codes, in which inclusion terms have been modified, and newly defined artificial codes not currently in ICD-10.

Prior to using Decision Tables D and E, any term indexed to one of the ICD categories being modified must be recoded to its corresponding special category. All table entries (address, subaddress, and recodes) in both tables employ these special codes in lieu of the regular ICD codes. When the final underlying cause is one of the special artificial codes, that underlying cause must be converted back to its regular ICD category (see Section VII, Table G).

The following list includes each original ICD category which has been modified, the corresponding special code which was used in the decision tables, and the definition of the special code. In general, for the special codes already in ICD-10, the definition merely cites the extent to which the category is being modified (usually with an "excludes" statement). For created codes, the definition cites the contents of the artificial category.

A169 Respiratory tuberculous unspecified
Excludes: Any term indexed in ICD-10 to A169 not qualified as respiratory or pulmonary (A1690)
*A1690 Tuberculosis NOS
Includes: Any term indexed in ICD-10 to A169 not qualified as respiratory or pulmonary

E039 Hypothyroidism, unspecified
Excludes: Any term indexed to E039 qualified as advanced, grave, severe, or with a similar qualifier (E0390)
*E0390 Advanced hypothyroidism
Grave hypothyroidism
Severe hypothyroidism
Includes: Any term indexed to E039 qualified as advanced, grave, severe, or with a similar qualifier

G122 Motor neuron disease
Excludes: Any term indexed to G122 qualified as advanced, grave, severe, or with a similar qualifier (G1220)
*G1220 Advanced motor neuron disease
Grave motor neuron disease
Severe motor neuron disease
Includes: Any term indexed to G122 qualified as advanced, grave, severe, or with a similar qualifier

G20 Parkinson’s disease
Excludes: Any term indexed to G20 qualified as advanced, grave, severe, or with a similar qualifier (G2000)
*G2000 Advanced Parkinson’s disease
Grave Parkinson’s disease
Severe Parkinson’s disease
Includes: Any term indexed to G20 qualified as advanced, grave, severe, or with a similar qualifier

G309 Alzheimer's disease, unspecified

Excludes: Any term indexed to G309 qualified as advance, grave, severe, or with a similar qualifier (G3090)

*G3090 Advance Alzheimer's disease
Severe Alzheimer's disease
Includes: Any term indexed to G35 qualified as advanced, grave, severe, or with a similar qualifier

I420 Dilated cardiomyopathy

Excludes: Any term indexed to I420 qualified as familial, idiopathic, or primary (I4200)

*I4200 Familial dilated cardiomyopathy
Idiopathic dilated cardiomyopathy
Primary dilated cardiomyopathy
Includes: Any term indexed to I420 qualified as familial, idiopathic, or primary

I421 Obstructive hypertrophic cardiomyopathy

Excludes: Any term indexed to I421 qualified as familial, idiopathic, or primary (I4210)

*I4210 Familial obstructive hypertrophic cardiomyopathy
Idiopathic obstructive hypertrophic cardiomyopathy
Primary obstructive hypertrophic cardiomyopathy
Includes: Any term indexed to I421 qualified as familial, idiopathic, or primary

I422 Other hypertrophic cardiomyopathy

Excludes: Any term indexed to I422 qualified as familial, idiopathic, or primary (I4220)

*I4220 Familial other hypertrophic cardiomyopathy
Idiopathic other hypertrophic cardiomyopathy
Primary other hypertrophic cardiomyopathy
Includes: Any term indexed to I422 qualified as familial, idiopathic, or primary

I425 Other restrictive cardiomyopathy

Excludes: Any term indexed to I425 qualified as familial, idiopathic, or primary (I4250)

*I4250 Familial other restrictive cardiomyopathy
Idiopathic other restrictive cardiomyopathy
Primary other restrictive cardiomyopathy
Includes: Any term indexed to I425 qualified as familial, idiopathic, or primary

I428 Other cardiomyopathies
Excludes: Any term indexed to I428 qualified as familial, idiopathic, or primary (I4280)
*I4280 Familial other cardiomyopathies
Idiopathic other cardiomyopathies
Primary other cardiomyopathies
Includes: Any term indexed to I428 qualified as familial, idiopathic, or primary

I429 Cardiomyopathy, unspecified
Excludes: Any term indexed to I429 qualified as familial, idiopathic, or primary (I4290)
*I4290 Familial cardiomyopathy
Idiopathic cardiomyopathy
Primary cardiomyopathy
Includes: Any term indexed to I429 qualified as familial, idiopathic, or primary

I500 Congestive heart failure
Excludes: Any term indexed to I500 qualified as advanced, grave, severe, or with a similar qualifier (I5000)
*I5000 Advanced congestive heart failure
Grave congestive heart failure
Severe congestive heart failure
Includes: Any term indexed to I500 qualified as advanced, grave, severe, or with a similar qualifier

I514 Myocarditis, unspecified
Excludes: Any term indexed in ICD-10 to I514 when qualified as arteriosclerotic (I5140)
*I5140 Arteriosclerotic myocarditis
Includes: Any term indexed in ICD-10 to I514 when qualified as arteriosclerotic

I515 Myocardial degeneration
Excludes: Any term indexed in ICD-10 to I515 when qualified as arteriosclerotic (I5150)
*I5150 Arteriosclerotic myocardial degeneration
Includes: Any term indexed in ICD-10 to I515 when qualified as arteriosclerotic

I600 Subarachnoid hemorrhage from carotid siphon and bifurcation
Excludes: Ruptured carotid aneurysm (into brain) (I6000)
*I6000 Ruptured carotid aneurysm (into brain)

I606 Subarachnoid hemorrhage from other intracranial arteries
Excludes: Ruptured aneurysm (congenital) circle of Willis (I6060)
*I6060 Ruptured aneurysm (congenital) circle of Willis (I6060)

I607 Subarachnoid hemorrhage from intracranial artery, unspecified
Excludes: Rupture berry aneurysm (congenital) brain (I6070)
Rupture miliary aneurysm (I6070)
*I6070 Rupture berry aneurysm (congenital) brain
Rupture miliary aneurysm

I608 Other subarachnoid hemorrhage
Excludes: Ruptured aneurysm brain meninges (I6080)
Ruptured arteriovenous aneurysm cavernous sinus (I6080)
Ruptured (congenital) arteriovenous aneurysm cavernous sinus (I6080)
*I6080 Ruptured aneurysm brain meninges
Ruptured arteriovenous aneurysm (congenital) brain
Ruptured (congenital) arteriovenous aneurysm cavernous sinus

*I609 Subarachnoid hemorrhage, unspecified
Excludes: Ruptured arteriosclerotic cerebral aneurysm (I6090)
Ruptured (congenital) cerebral aneurysm NOS (I6090)
Ruptured mycotic brain aneurysm (I6090)
*I6090 Ruptured arteriosclerotic cerebral aneurysm
Ruptured (congenital) cerebral aneurysm NOS
Ruptured mycotic brain aneurysm

J101 Influenza with other respiratory manifestations, influenza virus identified
Excludes: Influenza, flu, grippe (viral), influenza virus identified (without specified manifestations) (J1010)
*J1010 Influenza, flu, grippe (viral), influenza virus identified (without specified manifestations)

J111 Influenza with other respiratory manifestations, virus not identified
Excludes: Influenza, flu, grippe (viral), influenza virus not identified (without specified manifestations) (J1110)
*J1110 Influenza, flu, grippe (viral), influenza virus not identified (without specified manifestations)

J841 Other interstitial pulmonary diseases with fibrosis
Excludes: Chronic pneumonia, not elsewhere classified
*J8410 Chronic pneumonia NOS, not elsewhere classified

J849 Interstitial pulmonary disease, unspecified
Excludes: Interstitial pneumonia, not elsewhere classified
*J8490 Interstitial pneumonia, not elsewhere classified

J984 Other disorders of lung
Excludes: Lung disease (acute) (chronic) NOS (J9840)
*J9840 Lung disease (acute) (chronic) NOS

K319 Disease of stomach and duodenum, unspecified
Excludes: Disease stomach NOS (K3190)
Lesion, stomach NOS (K3190)
*K3190 Disease, stomach NOS
Lesion, stomach NOS

K550 Acute vascular disorders of intestine
Excludes: Any term indexed in ICD-10 to K550 when qualified as embolic (K5500)
*K5500 Acute embolic vascular disorders of intestine
Includes: Any term indexed in ICD-10 to K550 when qualified as embolic

K631 Perforation of intestine (nontraumatic)
Excludes: Intestinal penetration, unspecified part (K6310)
Intestinal perforation, unspecified part (K6310)
Intestinal rupture, unspecified part (K6310)
*K6310 Intestinal penetration, unspecified part
Intestinal perforation unspecified part
Intestinal rupture, unspecified part

K720 Acute and subacute hepatic failure
Excludes: Acute hepatic failure (K7200)
*K7200 Acute hepatic failure

K721 Chronic hepatic failure
Excludes: Chronic hepatic failure (K7210)
*K7210 Chronic hepatic failure

K729 Hepatic failure, unspecified
Excludes: Hepatic failure (K7290)
*K7290 Hepatic failure

M199 Arthrosis, unspecified
Excludes: Any term indexed to M199 qualified as advanced, grave, severe or with a qualifier (M1990)
*M1990 Advanced arthrosis
Grave arthrosis
Severe arthrosis
Includes: Any term indexed to M199 qualified as advanced, grave, severe or with a similar qualifier

Q278 Other specified congenital malformations of peripheral vascular system
Excludes: Congenital aneurysm (peripheral) (Q2780)
*Q2780 Congenital aneurysm (peripheral)

Q282 Arteriovenous malformation of cerebral vessels
Excludes: Congenital arteriovenous cerebral aneurysm (nonruptured) (Q2820)
*Q2820 Congenital arteriovenous cerebral aneurysm (nonruptured)

Q283 Other malformations of cerebral vessels
Excludes: Congenital cerebral aneurysm (nonruptured) (Q2830)
*Q2830 Congenital cerebral aneurysm (nonruptured)

R58 Hemorrhage, not elsewhere classified
Excludes: Hemorrhage of unspecified site (R5800)
*R5800 Hemorrhage of unspecified site

R99 Other ill-defined and unspecified causes of mortality
Excludes: Cause unknown (R97)
*R97 Cause unknown

SECTION III - DESCRIPTION AND USE OF TABLES A - C

Not all codes in ICD-10 are used for mortality medical coding. Table A lists in numerical order the ICD-10 codes which are valid for both underlying cause and multiple cause coding. Table B gives in numerical order the code numbers which are valid for multiple cause only. The two sets are different because (1) injury and poisoning codes are valid only for multiple cause coding, (2) special artificial codes are used only for multiple cause coding, and (3) certain other codes are defined for multiple cause coding use only (including postprocedural disorders). Created codes are discussed in Section II. More information on the valid code sets and their derivation can be found in Parts 2a, 2b, and 11 of this Vital Statistics Instruction Manual series. ACME uses Table A - C to assure that all multiple cause codes are valid prior to attempting assignment of an underlying cause of death. Table A validates the final underlying cause assignment.

SECTION IV - DESCRIPTION AND USE OF TABLE D

This table is referred to as the Causal Relationship Table. The codes in the table show when two conditions constitute an acceptable causal relationship (reported sequence). This table is used in the application of three of the selection rules: General Principle, Selection Rule 1 and Selection Rule 2.

The address code represents the condition on an upper line in Part I of each relationship of the two codes under question. Subaddress codes identify the conditions which can give rise to the condition classifiable to the address code. All subaddress codes (except an ambivalent relationship discussed below) recorded under an address code are in an acceptable causal relationship to the address code. All valid codes not recorded under the address code (i.e. either as an acceptable causal relationship or as an ambivalent relationship) are in an unacceptable causal relationship. In other words, the missing codes cannot cause the address code.

For some subaddresses, not all inclusion terms of the code (or code span) can cause the inclusions in the address code; and/or some but not all inclusions in the address can be due to the inclusions of the subaddress. Where such ambivalent causal relationships exist between the address and the subaddress, the subaddress code is flagged with an "M" (maybe).

If in processing a record the ACME system encounters a relationship(s) which is a "maybe" in the tables, the system assumes the relationship(s) to be acceptable and assigns an underlying cause on that basis. However, the record is listed for nosological review and correction in case the relationship is unacceptable.

In order to minimize the core storage requirement of the decision tables on the computer, those codes which are highly infrequent in mortality coding have not been "addressed" in Table D. Accordingly, the user will note that certain codes in Table A cannot be found as address codes in Table D. If, in processing a record, the ACME system encounters one of these codes as an address, the record is listed for manual underlying cause coding.

SECTION V - DESCRIPTION AND USE OF TABLE E

This table is referred to as the Modification Table. It includes direct sequel relationships (Selection Rule 3), senility and ill-defined conditions (Rule A), linkages (Rule C), and specificity (Rule D). For purposes of ACME selection, Rules E and F are integrated into the above decision tables and/or are handled at the multiple cause coding stage. Rule B (trivial conditions) is discussed in Section VII.

The address code in Table E is the tentative underlying cause. In the process of classifying the conditions on a certificate, the first tentative underlying cause is the underlying cause selected through the use of General Principle, Rule 1, or Rule 2. This may be modified one or more times through use of Selection Rule 3 and the modification rules.

In the process of modification, the subaddress codes identify conditions which either combine with the tentative underlying cause to create a third code or are preferred over the tentative underlying cause. In both cases, the new code (preference or combination code) becomes the new address code. This process of modification (or modification and reselection) may be repeated several times before the final underlying cause is assigned.

The symbol "M" is also used in this table to denote ambivalent ("maybe") relationships. Ambivalents in this table are processed in the same manner as those in Table D.

The symbol "#" is used in this table to denote that special considerations are required in the application of Rule C (linkage).

(1) In order to apply Rule C to categories C000-D489 (neoplasms), the address and subaddress must be reported together in Part I or together in Part II. However, for certain categories, the address may be reported in Part I and the subaddress in Part II or vice versa. These exceptions are flagged with the “#” in Table E.

(2) In applying Rule C to categories F03, F09, and F29, certain subaddresses must be reported on the same line with the address in order to be selected by Rule C. The subaddresses are flagged with the “#” in Table E.

The following abbreviations precede each code relationship to designate the applicable table:

DS: When the tentative underlying cause is considered a direct sequel of another condition on the certificate in Part I (must be on same or lower line as tentative underlying cause) or Part II, and the code for the other condition is preferred over the code for the tentative underlying cause.

DSC: When the tentative underlying cause is considered a direct sequel of another condition on the certificate in Part I (must be on same or lower line as tentative underlying cause) or Part II, and the codes for the tentative underlying cause and the other condition combine into a third code.

IDDC: When the tentative underlying cause is an ill-defined condition in the due to position to another condition, and the codes for the tentative underlying cause and the other condition combine into a third code.

SENMC: When the tentative underlying cause is senility (R54), and is reported with mention of another condition on the certificate, and the codes for the tentative underlying cause and the other condition combine into a third code.

SENDC: When the tentative underlying cause is senility (R54) and is reported in a due to position to another condition, and the codes for the tentative underlying cause and the other condition combine into a third code.

LMP: When the tentative underlying cause is reported with mention of another condition, in Part I or Part II of the certificate, and the code for the other condition is preferred over the code for the tentative underlying cause.

LMC: When the tentative underlying cause is reported with mention of another condition, in Part I or Part II of the certificate, and the codes for the tentative underlying cause and the other condition combine into a third code.

LDP: When the tentative underlying cause is reported in the due to position to another condition, and the code for the other condition is preferred over the code for the tentative underlying cause.

LDC: When the tentative underlying cause is reported in the due to position to another condition and the codes for the tentative underlying cause and the other condition combine into a third code.

SMP: When the tentative underlying cause describes a condition in general terms, and a condition which provides more precise information about the site or nature of this condition is reported anywhere on the certificate, and the code for the more precise condition is preferred over the code for the tentative underlying cause.

SMC: When the tentative underlying cause describes a condition in general terms, and a condition which provides more precise information about the site or nature of this condition is reported anywhere on the certificate, and the codes for the tentative underlying cause and the other condition combine into a third code.

SDC: When the tentative underlying cause is reported in the due to position to another condition, and can be regarded as an adjective modifying this condition, and the codes for the tentative underlying cause and the other conditions combine into a third code.

SECTION VI - DESCRIPTION AND USE OF TABLE F

Table F contains an explanation for most ambivalent entry in Table E (modification rules). This provides further guidance in the selection of the most appropriate underlying cause of death. Ambivalent entries in Table E are identified with an "M." If the conditions given in Table F are met, the code or the combined code is then selected to be used as the underlying cause of death. This selected code or combination code can be further modified as well. (Reasons are not included for some of the direct sequel relationships).

SECTION VII - DESCRIPTION AND USE OF TABLE G

Table G contains the list of created ICD-10 categories. If one of these codes is assigned as the underlying cause of death, ACME converts the special code back to its complementary ICD category for purposes of final underlying cause of death assignment. In each case, only the underlying cause of death is converted; the multiple cause codes are not modified by ACME. Table G lists these code conversions.

SECTION VIII - DESCRIPTION AND USE OF TABLE H

This table contains the list of codes representing conditions considered to be trivial in assigning the underlying cause of death. If a selected underlying cause is on this list, the ACME system applies Rule B to establish the appropriate course of action which may involve selecting a non-trivial condition as the underlying cause of death. See Part 2a for specific guidance on trivial conditions.

Table H
ICD-10 Trivial Conditions

(For application of Rule B in assigning
underlying causes of death)

CODE	CATEGORY OR SUBCATEGORY
A31.1	Cutaneous mycobacterial infection
A42.8	Other forms of cutaneous actinomycosis
A60.0	Herpesviral infection of genitalia and urogenital tract
A71.0 - A71.9	Trachoma
A74.0	Chlamydial conjunctivitis
B00.2	Herpesviral gingivostomatitis and pharyngotonsillitis
B00.5	Herpesviral ocular disease
B00.8	Other forms of herpesviral infection
B07	Viral warts
B08.1	Molluscum contagiosum
B08.8	Other specified viral infections characterized by skin and mucous membrane lesion
B30.0 - B30.9	Viral conjunctivitis
B35.0 - B35.9	Dermatophytosis
B36.0 - B36.9	Other superficial mycoses
B85.0 - B85.4	Pediculosis and phthiriasis

Table H
ICD-10 Trivial Conditions

F45.3 - F45.9	Somatoform disorders
F50.1,F50.3 - F50.9	Eating disorders
F51.0 - F51.9	Nonorganic sleep disorders
F52.0 - F52.9	Sexual dysfunction, not caused by organic disorder or disease
F60.0 - F60.9	Specific personality disorders
F61	Mixed and other personality disorders
F62.0 - F62.9	Enduring personality changes, not attributable to brain damage and disease
F63.0 - F63.9	Habit and impulse disorders
F64.0 - F64.9	Gender identity disorders
F65.0 - F65.9	Disorders of sexual preference
F66.0 - F66.9	Psychological and behavior disorders associated with sexual development and orientation
F68.0 - F68.8	Other disorders of adult personality and behavior
F69	Unspecified disorder of adult personality and behavior
F95.0 - F95.9	Tic disorders
F98.0 - F98.9	Other behavioral and emotional disorders with onset usually occurring in childhood and adolescence
G43 - G43.2 G43.8 - G43.9	Migraine, except complicated migraine (G43.3)

Table H
ICD-10 Trivial Conditions

G44.0 - G44.2	Other headache syndromes
G45.0 - G45.9	Transient cerebral ischaemic attacks and related syndromes.
G50.0 - G50.9	Disorders of trigeminal nerve
G51.0 - G51.9	Facial nerve disorders
G54.0 - G54.9	Nerve root and plexus disorders
G56.0 - G56.9	Mononeuropathies of upper limb
G57.0 - G57.9	Mononeuropathies of lower limb
G58.7	Mononeuritis multiplex
H00.0 - H00.1	Hordeolum and chalazion
H01.0 - H01.9	Other inflammation of eyelid
H02.0 - H02.9	Other disorders of eyelid
H04.0 - H04.9	Disorders of lacrimal system
H10.0 - H10.9	Conjunctivitis
H11.0 - H11.9	Other disorders of conjunctiva
H15.0 - H15.9	Disorders of sclera
H16.0 - H16.9	Keratitis
H17.0 - H17.9	Corneal scars and opacities
H18.0 - H18.9	Other disorders of cornea

H20.0 - H20.9	Iridocyclitis
H21.0 - H21.9	Other disorders of iris and ciliary body
H25.0 - H25.9	Senile cataract
H26.0 - H26.9	Other cataract
H27.0 - H27.9	Other disorders of lens
H30.0 - H30.9	Chorioretinal inflammation
H31.0 - H31.9	Other disorders of choroid
H33.0 - H33.5	Retinal detachments and breaks
H34.0 - H34.9	Retinal vascular occlusions
H35.0 - H35.9	Other retinal disorders
H40.0 - H40.9	Glaucoma
H43.0 - H43.9	Disorders of vitreous body
H46	Optic neuritis
H47.0 - H47.7	Other disorders of optic (2nd) nerve and visual pathways
H49.0 - H49.9	Paralytic strabismus
H50.0 - H50.9	Other strabismus
H51.0 - H51.9	Other disorders of binocular movement
H52.0 - H52.7	Disorders of refraction and accommodation
H53.0 - H53.9	Visual disturbances

Table H
ICD-10 Trivial Conditions

H54.0 - H54.7	Blindness and low vision
H55	Nystagmus and other irregular eye movements
H57.0 - H57.9	Other disorders of eye and adnexa
H60.0 - H60.9	Otitis externa
H61.0 - H61.9	Other disorders of external ear
H80.0 - H80.9	Otosclerosis
H83.3 - H83.9	Other diseases of inner ear
H90.0 - H90.8	Conductive and sensorineural hearing loss
H91.0 - H91.9	Other hearing loss
H92.0 - H92.2	Otalgia and effusion of ear
H93.0 - H93.9	Other disorders of ear, not elsewhere classified
J00	Acute nasopharyngitis (common cold)
J06.0 - J06.9	Acute upper respiratory infections of multiple and unspecified sites
J30.0 - J30.4	Vasomotor and allergic rhinitis
J33.0 - J33.9	Nasal polyp
J34.2	Deviated nasal septum
J35.0 - J35.9	Chronic disease of tonsils and adenoids
K00.0 - K00.9	Disorders of tooth development and eruption

Table H
ICD-10 Trivial Conditions

K01.0 - K01.1	Embedded and impacted teeth
K02.0 - K02.9	Dental caries
K03.0 - K03.9	Other diseases of hard tissues of teeth
K04.0 - K04.9	Diseases of pulp and periapical tissues
K05.0 - K05.6	Gingivitis and periodontal diseases
K06.0 - K06.9	Other disorders of gingiva and edentulous alveolar ridge
K07.0 - K07.9	Dentofacial anomalies (including malocclusion)
K08.0 - K08.9	Other disorders of teeth and supporting structures
K09.0 - K09.9	Cyst of oral region, not elsewhere classified
K10.0 - K10.9	Other diseases of jaws
K11.0 - K11.9	Diseases of the salivary glands
K14.0 - K14.9	Diseases of tongue
L01.0 - L01.1	Impetigo
L03.0	Cellulitis of finger and toe.
L04.0 - L04.9	Acute lymphadenitis
L05.0 - L05.9	Pilonidal cyst
L08.0 - L08.8	Other infections of skin and subcutaneous tissue
L20.0 - L20.9	Atophic dermatitis
L21.0 - L21.9	Seborrhoeic dermatitis

L22	Diaper (napkin) dermatitis
L23.0 - L23.9	Allergic contact dermatitis
L24.0 - L24.9	Irritant contact dermatitis
L25.0 - L25.9	Unspecified contact dermatitis
L28.0 - L28.2	Lichen simplex chronicus and prurigo
L29.0 - L29.9	Pruritus
L30.0 - L30.9	Other dermatitis
L41.0 - L41.9	Parapsoriasis
L42	Pityriasis rosea
L43.0 - L43.9	Lichen planus
L44.0 - L44.9	Other papulosquamous disorders
L55.0 - L55.1 L55.8 - L55.9	Sunburn, except sunburn of third degree (L55.2)
L56.0 - L56.9	Other acute skin changes due to ultraviolet radiation
L57.0 - L57.9	Skin changes due to chronic exposure to nonionizing radiation
L58.0 - L58.9	Radiodermatitis
L59.0 - L59.9	Other disorders of skin and subcutaneous tissue related to radiation
L60.0 - L60.9	Nail disorders

Table H
ICD-10 Trivial Conditions

L63.0 - L63.9	Alopecia areata
L64.0 - L64.9	Androgenic alopecia
L65.0 - L65.9	Other nonscarring hair loss
L66.0 - L66.9	Cicatricial alopecia (scarring hair loss)
L67.0 - L67.9	Hair colour and hair shaft abnormalities
L68.0 - L68.9	Hypertrichosis
L70.0 - L70.9	Acne
L72.0 - L72.9	Follicular cysts of skin and subcutaneous tissue
L73.0 - L73.9	Other follicular disorders
L74.0 - L74.9	Eccrine sweat disorders
L75.0 - L75.9	Aprocrine sweat disorders
L80	Vitiligo
L81.0 - L81.9	Other disorders of pigmentation
L83	Acanthosis nigricans
L84	Corns and callosities
L85.0 - L85.9	Other epidermal thickening
L87.0 - L87.9	Transepidermal elimination disorders
L90.0 - L90.9	Atrophic disorders of skin
L91.0 - L91.9	Hypertrophic disorders of skin

Table H
ICD-10 Trivial Conditions

L92.0 - L92.9	Granulomatous disorders of skin and subcutaneous tissue
L94.0 - L94.9	Other localized connective tissue disorders
L98.0 - L98.3 L98.5 - L98.9	Other disorders of skin and subcutaneous tissue, not elsewhere classified
M20.0 - M20.6	Acquired deformities of fingers and toes
M21.0 - M21.9	Other acquired deformities of limbs
M22.0 - M22.9	Disorders of patella
M23.0 - M23.9	Internal derangement of knee
M24.0 - M24.9	Other specific joint derangements
M25.0 - M25.9	Other joint disorders, not elsewhere classified
M35.3	Polymyalgia rheumatica
M40.0 - M40.5	Kyphosis and lordosis
M43.6	Torticollis, unspecified
M43.8 - M43.9	Other and deforming dorsopathies
M48.0	Spinal stenosis
M53.0 - M53.9	Other dorsopathies, not elsewhere classified
M54.0 - M54.9	Dorsalgia
M60.0 - M60.9	Myositis
M65.0 - M65.9	Synovitis and tenosynovitis

Table H
ICD-10 Trivial Conditions

M66.0 - M66.5	Spontaneous rupture of synovium and tendon
M67.0 - M67.9	Other disorders of synovium and tendon
M70.0 - M70.9	Soft tissue disorders related to use, overuse and pressure
M71.0 - M71.9	Other bursopathies
M75.0 - M75.9	Shoulder lesions
M76.0 - M76.9	Enthesopathies of lower limb, excluding foot
M77.0 - M77.9	Other enthesopathies
M79.0 - M79.9	Other soft tissue disorders, not elsewhere classified
M95.0 - M95.9	Other acquired deformities of musculoskeletal system and connective tissue
M99.0 - M99.9	Biomechanical lesions, not elsewhere classified
N39.3	Stress incontinence
N46	Male infertility
N47	Redundant prepuce, phimosis, and paraphimosis
N60.0 - N60.9	Benign mammary dysplasia
N84.0 - N84.9	Polyp of female genital tract
N85.0 - N85.9	Other noninflammatory disorders of uterus, except cervix
N86	Erosion and ectropion of cervix uteri
N87.0 - N87.9	Dysplasia of cervix uteri

N88.0 - N88.9	Other noninflammatory disorders of cervix uteri
N89.0 - N89.9	Other noninflammatory disorders of vagina
N90.0 - N90.9	Other noninflammatory disorders of vulva and perineum
N91.0 - N91.5	Absent, scanty, and rare menstruation
N92.0 - N92.6	Excessive, frequent, and irregular menstruation
N93.0 - N93.9	Other abnormal uterine and vaginal bleeding
N94.0 - N94.9	Pain and other conditions associated female genital organs and menstrual cycle
N96	Habitual aborter
N97.0 - N97.9	Female infertility
Q10.0 - Q10.7	Congenital malformations of eyelid, lacrimal apparatus, and orbit
Q11.0 - Q11.3	Anophthalmos, microphthalmos and macrophthalmos
Q12.0 - Q12.9	Congenital lens malformations
Q13.0 - Q13.9	Congenital malformations of anterior segment of eye
Q14.0 - Q14.9	Congenital malformations of posterior segment of eye
Q15.0 - Q15.9	Other congenital malformations of eye
Q16.0 - Q16.9	Congenital malformations of ear causing impairment of hearing
Q17.0 - Q17.9	Other congenital malformations of ear

Q18.0 - Q18.9	Other congenital malformations of face and neck
Q38.1	Ankyloglossia
Q65.0 - Q65.9	Congenital deformities of hip
Q66.0 - Q66.9	Congenital deformities of feet
Q67.0 - Q67.8	Congenital musculoskeletal deformities of head, face, spine and chest
Q68.0 - Q68.8	Other congenital musculoskeletal deformities
Q69.0 - Q69.9	Polydactyly
Q70.0 - Q70.9	Syndactyly
Q71.0 - Q71.9	Reduction defects of upper limb
Q72.0 - Q72.9	Reduction defects of lower limb
Q73.0 - Q73.8	Reduction defects of unspecified limb
Q74.0 - Q74.9	Other congenital malformations of limb(s)
Q80.0 - Q80.3 Q80.8 - Q80.9	Congenital ichthyosis, except Harlequin fetus (Q80.4)
Q81.0	Epidermolysis bullosa
Q81.2 - Q81.9	Other forms of epidermolysis bullosa, except epidermolysis bullosa letalis (Q81.1)
Q82.0 - Q82.9	Other congenital malformations of skin
Q83.0 - Q83.9	Congenital malformations of breast

Table H
ICD-10 Trivial Conditions

Q84.0 - Q84.9	Other congenital malformations of integument
S00.0 - S00.9	Superficial injury of head
S05.0, S05.1, S05.8	Superficial injuries (any type) of eye and orbit (any part)
S10.0 - S10.9	Superficial injury of neck
S20.0 - S20.8	Superficial injury of thorax
S30.0 - S30.9	Superficial injury of abdomen, lower back and pelvis
S40.0 - S40.9	Superficial injury of shoulder and upper arm
S50.0 - S50.9	Superficial injury of forearm
S60.0 - S60.9	Superficial injury of wrist and hand
S70.0 - S70.9	Superficial injury of hip and thigh
S80.0 - S80.9	Superficial injury of lower leg
S90.0 - S90.9	Superficial injury of ankle and foot
T09.0	Superficial injury of trunk, level unspecified
T11.0	Superficial injury of upper limb, level unspecified
T13.0	Superficial injury of lower limb, level unspecified
T14.0	Superficial injury of unspecified body region
T20.1	Burn of first degree of head and neck
T21.1	Burn of first degree of trunk

T22.1	Burn of first degree of shoulder and upper limb, except wrist and hand
T23.1	Burn of first degree of wrist and hand
T24.1	Burn of first degree of hip and lower limb except ankle and foot
T25.1	Burn of first degree of ankle and foot
