# INCIDENT MANAGEMENT SITUATION REPORT FRIDAY NOVEMBER 12, 2004 – 1000 MST NATIONAL PREPAREDNESS LEVEL 1

#### **CURRENT SITUATION:**

Initial attack activity was light nationally with 233 new fires reported for the week. One large fire was contained in the Southern Area.

#### **SOUTHERN AREA LARGE FIRES:**

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
JONES FORK	KY	KYS	200	100		0	0	0	0	0	NR

#### OUTLOOK:

**Weather Discussion:** Early in the weekend, two weather systems will be affecting the mainland United States. The first will be along the immediate mid-Atlantic coast, where rains are likely from the Outer Banks northward to coastal Maine. The other will bring light rain and high elevation light snow to New Mexico and Colorado. A storm front will enter the Pacific Northwest on Monday. Much of the Southeast and California will remain dry.

#### INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Every firefighter will give and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information:

- Did they ask questions? Talk about what it is like giving a briefing. Do you get empty stares? What feedback are you looking for to ensure they understand you?
- Did they take notes? What kind of information would you like to see people write down?
- Did they repeat information back? What other ways can you identify that your briefing is registering?
- Did you give all the necessary information? How will you ensure that you covered everything necessary?
  - Task
  - Location
  - Communications
  - Hazards
  - Who, when, etc.
- It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:
  - Did you really listen? What do you do to make yourself pay attention to everything being said?
  - Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?
- To reduce the risks, take the time and get it right!
- You must know the location of the assignment and:
  - What is to be done.
  - Who you are to report to and how often to report.
  - When you are expected to complete the assignment.
  - Hazards.
  - Communication plan frequencies.
  - Weather and fire behavior.
  - Status of adjoining forces.
